

Equality Impact Assessment

The Council has a duty to consider the needs and requirements of the community who are affected by our policies and procedures. This checklist has been developed to ensure that relevant groups are neither directly or indirectly discriminated against in the planning and delivery of Council services in compliance with legislation and good practice.

An impact assessment is a systematic way of finding out the impact of a policy or proposed policy on different groups. Officers are required to identify the likely outcomes/impacts that may result from introducing a policy/procedure.

Examples of groups that can be disadvantaged if their specific needs are not considered are women/parents/carers, people from different ethnic minorities, people with disabilities/impairments and Welsh speakers.

How should you assess impact?

1. Identifying the objectives of your policy and how it will work
2. Examining the data and research available
3. Assessing the likely impact on equality
4. Consulting people who are likely to be affected by your policy
5. Making arrangements to monitor and review your policy and its impact
6. Publishing the results of the assessment

It is the responsibility of the Head of Service or Operational Manager responsible for each policy to ensure that an assessment has been completed for the policy identified.

The form should be completed electronically and returned to the Equalities Section :

1. Objectives

| |
|--|
| What are the objectives of the policy/practice being developed or reviewed? |
|--|

The Community Strategy 2011-21 sets out a ten year vision for the Vale and incorporates the strategies and plans of key partnerships into one integrated strategy. Three year delivery plans will be developed for each partnership which will be reviewed annually.

The strategy and supporting delivery plans do not detail all the activities being undertaken by partners but highlight the key issues being addressed across all areas of the Vale.

The Key Partnerships are;

Local Service Board (LSB)

Health, Social Care and Wellbeing Partnership (HSCWB)

Safer Vale

Learning and Skills

Regeneration

Children and Young People (CYPP)

Communities First and the Older peoples Strategy Forum are also included in the Community Strategy

Ten priority outcomes provide the framework for the Community Strategy;

1. People of all ages are actively engaged in life in the Vale and have the capacity and confidence to identify their own needs as individuals and within communities.
2. The diverse needs of local people are met through the provision of customer focused, accessible services and information.
3. Vale residents and organisations respect the local environment and work together to meet the challenge of climate change.
4. Older people are valued and empowered to remain independent, healthy and active. They have equality of opportunity and receive high quality services to meet their diverse needs.
5. Children and Young people in the Vale are well informed and supported to access a broad range of quality services that enable them to take full advantage of the life opportunities available in their local communities and beyond.

6. People of all ages are able to access co-ordinated learning opportunities and have the necessary skills to reach their full potential, helping to remove barriers to employment.
7. The underlying causes of deprivation are tackled and the regeneration of the Vale continues, opportunities for individuals and businesses are developed and the quality of the built and natural environment is protected and enhanced.
8. The Vale maximises the potential of its position within the region working with its neighbours for the benefit of local people and businesses, attracting visitors, residents and investment.
9. Residents and visitors are safe and feel safe and the Vale is recognised as a low crime area.
10. Health inequalities are reduced and residents are able to access the necessary services, information and advice to improve their wellbeing and quality of life.

In developing this Community Strategy and in implementing the wide range of initiatives developed by different partners there will be due regard to the different needs of the local community. This will include race, gender, disability, age, religion or belief, sexual orientation and gender reassignment.
