

Meeting of:	Cabinet
Date of Meeting:	Thursday, 10 October 2024
Relevant Scrutiny Committee:	Environment and Regeneration
Report Title:	Vale of Glamorgan Local Development Plan 2011-2026: Sixth Annual Monitoring Report 2023/2024
Purpose of Report:	To report to Cabinet the findings of the Council's sixth Local Development Plan Annual Monitoring Report and to seek approval to submit it to the Welsh Government by 31st October 2024.
Report Owner:	Cabinet Member for Community Engagement, Equalities and Regulatory Services
Responsible Officer:	Marcus Goldsworthy, Director of Place
Elected Member and Officer Consultation:	<p>Director of Place Head of Sustainable Development Operational Manager for Planning and Building Control, Lawyer - Legal Division, Operational Manager Accountancy, Operational Manager, Strategy and Resources, Sustainable Communities for Learning Project Manager, Operational Manager, Public Housing Services, Operational Manager, Neighbourhood Services, Healthy Living and Performance Operational Manager Engineering, Operational Manager Transport Services, Operational Manager for Regeneration, Team Leader Countryside Services, Ecologist, Arts Development Officer, Principal Tourism and Marketing Officer, Major Project Manager, Regeneration and Planning, Engineering Manager, Operational Manager Property</p>
Policy Framework:	This is a matter for Executive decision by Cabinet

Executive Summary:

- This report relates to the sixth Local Development Plan (LDP) Annual Monitoring Report (AMR) which assesses the performance of the policies in achieving the integrated Plan objectives which incorporate sustainable development and Strategic Environmental Assessment having regard to the Monitoring Framework set out in the LDP and agreed by the Inspector as part of the LDP Examination and consequently adopted by the Council on 28th June 2017.
- The format of the AMR follows the suggested format set out in the latest Development Plans Manual Edition 3 (March 2020). It includes both core and local monitoring indicators and a 'traffic light' rating system is used as a visual aid to monitor the effectiveness of the Plan's policies and to provide a quick overview of policy performance.
- The report sets out the key policy achievements to date and confirms that while most of the relevant monitoring targets continue to be met, in several areas targets have not been achieved. These again relate to areas likely to be affected by the current economic climate across Wales and the UK and whilst being of concern, the indicators will continue to be monitored in future AMRs and considered more fully through the emerging Replacement Local Development Plan (RLDP).
- Overall, the AMR shows that good progress is being made in implementing most of the Plan's policies and that the LDP strategy remains sound. Accordingly, it is recommended that the sixth AMR is submitted to the Welsh Government by 31st October 2024 and published on the Council's website in accordance with LDP Regulation 37. In addition, the AMR acknowledges that the Council has commenced work on a Replacement Local Development Plan (RLDP), in accordance with LDP Regulation 41.

Recommendations

- 1.** That Cabinet considers and endorses the sixth Local Development Plan (LDP) Annual Monitoring Report (AMR) (subject to consideration of any recommended changes by the Environment and Regeneration Scrutiny Committee) for submission to the Welsh Government by 31st October 2024 and for publication on the Council's website.
- 2.** That the LDP AMR is referred to the Environment and Regeneration Scrutiny Committee for its consideration. Should Scrutiny Committee resolve to accept Local Development Plan (LDP) Annual Monitoring Report (AMR) Cabinet would consider the LDP AMR as agreed and can be submitted to the Welsh Government by 31st October 2024.
- 3.** That delegated authority be granted to the Head of Sustainable Development in consultation with the Cabinet Member for Community Engagement, Equalities and Regulatory Services to make typographical or other minor changes as necessary prior to publication.

Reasons for Recommendations

- 1.** To comply with Regulation 37 of the Town and Country Planning (Local Development Plan) (Wales) Regulations 2005.
- 2.** To ensure appropriate scrutiny of the report.
- 3.** To make typographical or other minor changes as necessary without the need to seek Cabinet approval.

1. Background

- 1.1** The Vale of Glamorgan Local Development Plan (LDP) 2011-2026 was adopted by the Council on 28th June 2017. The LDP is the Council's principal land use planning document and provides the policy framework against which all planning applications and appeals in the Authority are determined.
- 1.2** Section 76 of the Planning and Compulsory Purchase Act 2004 (as amended) and Regulation 37 of the Town and Country Planning (LDP) (Wales) Regulations 2005 (as amended) requires local planning authorities to monitor the LDP in the form of an Annual Monitoring Report (AMR). The Development Plans Manual (Edition 3) (March 2020) (DPM) provides guidance on the content of the AMR, the period which it should cover and when it should be submitted to the Welsh Government.
- 1.3** AMRs cover the preceding financial year from 1st April to 31st March. The AMR must be submitted to the Welsh Government by 31st October each year and published on the Council's web site in accordance with LDP Regulation 37. The Council produced its first AMR in October 2019. The AMR attached at Appendix A

to this report is the sixth AMR prepared by the Council and is based on the monitoring period 1st April 2023 to 31st March 2024.

1.4 The preparation of the AMR enables the Council to assess the extent to which the LDP strategy, policies and allocations are being delivered. In addition, the AMR includes the results of the sustainability monitoring related to the Sustainability Appraisal (SA) Report and integrated assessment as required by Strategic Environmental Assessment Regulations. Specifically, the AMR can assist the Council to:

- Identify areas of success;
- Identify where certain policies are not being successful in delivering their intended objective(s);
- Identify gaps in the evidence base, e.g., through a change in the economy, which need to be addressed and reflected in the LDP; and
- Identify what actions will be taken to address the issues identified to ensure the implementation of the LDP, including any revisions that need to be made to the LDP.

1.5 The format of the AMR is as follows and covers all the matters set out in the DPM:

Section 1 Executive Summary – provides a summary of the key findings and conclusions of the AMR.

Section 2 Introduction – outlines the requirement, purpose, and structure of the AMR.

Section 3 National, Regional and Local Context – provides an overview of the relevant contextual information which could affect the performance of the LDP policy framework. Policy specific contextual information is provided, including changes to the policy framework at a national or local level.

Section 4 LDP and SA Monitoring Frameworks – explains the monitoring process undertaken.

Section 5 LDP Monitoring Framework: Policy Analysis – reports on the performance of the LDP monitoring indicators as set out in the LDP Monitoring Framework.

Section 6 Sustainability Appraisal Monitoring: Objective Analysis – provides an assessment of the performance of the LDP performance against the 15 SA monitoring indicators.

Section 7 LDP Sustainability Monitoring Appraisal - reports on the performance of the SA monitoring indicators.

Section 8 Conclusions and Recommendations – provides an overview of the indicators and Plan performance in the current monitoring period.

1.6 Paragraph 8.12 in the DPM states that the broad structure of the AMR should remain the same each year to provide ease of analysis between successive reports and build upon preceding results. The layout of the LDP monitoring

framework table includes the performance from the previous AMR. A summary table of all previous AMR LDP monitoring results is contained within Appendix 1 of the sixth AMR.

- 1.7 The AMR provides a useful snapshot of the current position, and the monitoring data helps to identify any emerging trends. The findings of the AMRs are used to inform the emerging RLDP which is currently programmed to be subject to public consultation of the Deposit Plan during February and March 2025.
- 1.8 This sixth AMR shows that a number of monitoring triggers have been exceeded. Where monitoring indicators have not been met this is largely due to external factors such as the after-effects of the COVID-19 pandemic and the recent economic climate.

2. Key Issues for Consideration

- 2.1 Section 9 of the LDP, 'Measuring Success', sets out the monitoring framework for the LDP which contains 'local' and 'core' indicators. Both the local and core indicators are linked to the LDP objectives and are important in monitoring the effectiveness of the LDP strategy and policies. Core indicators are considered essential for assessing the implementation of national policy and are prescribed in LDP Regulation 37 and in Table 29 of the revised DPM. Local indicators relate to the Vale of Glamorgan context and refer to the specific requirements of individual policies and proposals contained in the LDP.
- 2.2 A 'traffic light' rating system has been used as a visual aid in monitoring the effectiveness of the Plan's policies and to provide a quick reference overview of policy performance. Generally, the key findings of the sixth AMR are again largely positive, and most indicators fall within the 'green' category indicating that the relevant LDP policies are achieving their objectives and are being implemented effectively. However, as detailed above, several indicators have exceeded monitoring targets and have returned 'yellow', 'amber' or 'red' indicators. Invariably, where monitoring triggers have been exceeded, these are in areas such as housing, employment, and retail where the impacts of the current economic climate across the UK continue to be most evident. As the Council has already commenced work on a Replacement Local Development Plan (RLDP) these matters will continue to be monitored in future AMRs and considered through the emerging RLDP.
- 2.3 An overview of each LDP objective is set out below.

Sustainable Communities

- 2.4 As of 1st April 2024, the LDP has delivered 6,516 additional dwellings, which is 21.2% below the cumulative monitoring target of 8,198 dwellings for the period. This equates to 501 dwellings per annum set against a target of 630.66 per annum. Good progress has been made on meeting the dwelling requirement in the LDP. 6,648 (82%) of new dwellings approved since 2011 have been on allocated LDP sites which is above the monitoring target of 6,058. Within the

monitoring period, no planning permissions were granted for new employment land on strategic employment sites and only one small scale site of 0.014ha was granted approval on local employment sites raising the total employment uses on allocated employment land to 97.62ha which is significantly below the monitoring target of 251ha.

Climate Change

- 2.5** No development has been approved in C1/C2 flood zones that do not meet all of the TAN 15: Development and Flood Risk tests within the 2023/24 monitoring period. In the current monitoring period 1.3MW has been approved on 1 solar farm. This adds an additional 1.13GWh of electricity through renewable energy sources. No planning permissions were granted by the Council during the monitoring period for renewable energy development. It should be noted that the next monitoring target is outside of the timeframe of the current AMR. A Renewable Energy Assessment of the Vale of Glamorgan has recently been completed with a focus on wind and photovoltaic developments. The study includes challenging but achievable targets for renewable energy in the Vale of Glamorgan and will form part of the evidence base for the RLDP.

Transport

- 2.6** The LDP monitoring framework required the completion of six local transport schemes identified under Policies SP7 and MG16 by 2020. This monitoring target was met early in the plan period and the latest AMR again indicates that good progress has been made on several of the other schemes. While work on some future schemes has halted pending the availability of funding for initial phase 1 investigative works, work on other schemes has progressed well with several schemes including the Barry Waterfront to Dinas Powys walking and cycling route, where detailed design and public consultation has been completed and route construction is anticipated mid-2025. Although work on the Bus priority measures at Merrie Harrier, Cardiff Road, Barry to Cardiff via Barry Road has slowed, detailed design works have been completed and feasibility/modelling work will take place during 2024/25. Ecological surveys and detailed design works have been completed and a planning application has been submitted for the NCN88 and associated connections although construction works will be tied in with the wider site development. Any schemes which have not commenced or made significant progress will be reviewed and considered as a part of the RLDP review. With regard to improvements to the Valley Lines, this work is out of the direct control of the Vale of Glamorgan Council and while overall improvements continue, it is regrettable that proposed increases to frequency on the VoG line have been deferred however a commitment from TfW remains and on a positive note, new Class 321 trains will be running on nearly all services to Barry and Barry Island. All relevant planning applications were again accompanied by a Travel Plan or conditioned in line with the Travel Plan SPG and TAN 18. The Council's Active Travel programme continues to expand with schemes across the Vale at various stages of development.

Built and Natural Environment

- 2.7** During the current monitoring period the Council did not monitor indicators 4.2 relating to applications approved within designated Special Landscape Areas; 4.3 relating to applications approved within Green Wedges; 4.4 relating to applications approved within the Glamorgan Heritage Coast; 4.5 relating to applications approved which would have adverse impacts of Sites of Special Scientific Interest and 4.6 relating to applications approved which would have an adverse impact on Sites of Importance for Nature Conservation, as invariably any implications of the proposed developments on these designations would have been fully considered through the planning application process and found to be acceptable. During the monitoring period, no planning applications were approved by the Council contrary to the advice received from Cadw or Natural Resources Wales. During the AMR period, there has been a net increase of 0.61ha of open space in accordance with the monitoring target.
- 2.8** In February 2024 the Welsh Government published the latest iteration of Planning Policy Wales (PPW). Version 12 of PPW included an updated Chapter 6 Distinctive and Natural Places which saw policy changes relating to Green Infrastructure, Net Benefit for Biodiversity and the Step Wise Approach, stronger protection for Sites of Special Scientific Interest, and Trees and Woodland. The amended PPW has direct implications for the intended update to the Council's Biodiversity and Development Supplementary Planning Guidance (SPG) which will now be revised to incorporate the changes in PPW when resources permit. Similarly, the proposed revision to the Design in the Landscape SPG will be undertaken once work on the RLDP has been finalised.

Community Facilities

- 2.9** Both 2024 monitoring targets were met ahead of schedule and new education facilities were provided at Ysgol St Baruc, Barry Waterfront which opened in April 2023 and provided capacity for 420 pupils and a new primary and nursery school on land to the north of the railway line, Rhoose was opened in January 2022 providing capacity for 420 pupils. While there was no specific monitoring target relating to education facilities identified in Policy MG6 (Provision of Educational Facilities) relevant to this year's AMR, significant progress has been made on the remaining indicators for 2026 relating to land at Darren Farm, Cowbridge (MG6 (4)) and land at Upper Cosmeston Farm, Lavernock (MG6 95)). In respect of MG6 (4) the section 106 Agreement has now been completed and a planning application is anticipated in early 2025 with completion of the school anticipated in Q3 of 2026. For site MG6 (5) the outline planning application for this allocated mixed-use site, including for a primary school (planning application ref: 2020/01170/OUT) was approved by Planning Committee in March 2024 subject to the applicant entering into a Section 106 agreement. This application was subject to a call-in direction from the Welsh Minister, until the week commencing 30th September 2024, when the Welsh Minister advised that the Local Planning Authority could now determine the application.
- 2.10** Similarly, good progress has been made on delivering new community facilities identified in Policy MG7 (Provision of Community Facilities). While there has

been a delay in the transfer of land relating to the St Cyres development (MG7(2) refers) caused by continuing site works, it is anticipated that the land transfer will be progressed shortly to the Council and then leased to Dinas Powys Community Council on a 99-year lease. Dinas Powys Community Council are currently considering potential future uses for the site. The remaining monitoring indicator relating to site MG7 (4) Cosmeston Farm, is outside the timeframe of the current AMR however planning application 2020/01179/OUT was approved by the Council in March 2024 (subject to the applicant entering into a s106 agreement) This application was subject to a call-in direction from the Welsh Minister, until the week commencing 30 September 2024, when the Welsh Minister advised that the Local Planning Authority could now determine the application. In respect of Public Open Space provision monitoring targets under Policy MG28 (Public Open Space Allocations) the developers at the site at Bonvilston have gone into administration which mean that the 0.55ha open space have yet to be fully delivered and the monitoring target has only been partially met. In respect of MG28(7) at Rhoose, while 1.43 ha of open space have been provided on the western element of the site, the eastern half of the application for the eastern part of the site (2022/00733/FUL) remains under consideration by the Council as is application (2023/00948/FUL) relating to remaining element of site MG2 (48) Land off Sandy Lane, Ystradowen, where the initial element of this site created 0.43 ha of open space. The remaining monitoring indicator for 2024 relates to the application detailed above at Cosmeston Farm (MG28 (10)). The remaining monitoring targets for public open space provision are outside of the current AMR monitoring period. No developments were approved which resulted in the unacceptable loss of community facilities in an area of identified need contrary to Policy MD5 (Development Within Settlement Boundaries).

Retail

- 2.11** Since 2017, there has been a reduction (6.8%) of retail floorspace in the town and district centres and increases in office floorspace (<1.0%) and leisure floorspace (21.7%). This reflects the changing role of town centres, which is also apparent elsewhere in the UK. The Council will continue to closely monitor this trend in future AMRs and consider the implications of the changes through the RLDP.
- 2.12** Outside of established town and district centres, no new major retail, office, or leisure floorspace was permitted contrary to the relevant LDP policies. No planning applications have been granted for non-A1 uses within the primary and secondary frontages of the town and district retail centres during the monitoring period and A1 uses within the primary and secondary frontages have increased slightly since the last monitoring period. The Councils approach to A1 uses as well as primary and secondary frontages will be fully reviewed as a part of the emerging RLDP.
- 2.13** 2 planning applications were approved within the local and neighbourhood centres during the AMR monitoring period. Neither of the approved applications resulted in a decrease to the level of A1 uses within the local and neighbourhood centres which again appear to be performing well given the current retail climate across Wales and the UK.

2.14 Vacancy rates within the primary shopping frontages of the town and district centres have decreased or remained static since the last AMR period indicating that the centres remain attractive places to operate retail business and that the policies of the LDP are effective. Given the prevailing economic climate and changing shopping habits, the situation across the retail centres will continue to be carefully monitored to establish longer term trends however, the Vale of Glamorgan's main retail centres seem to be showing signs of resilience in a difficult economic environment.

Housing

2.15 The LDP identifies a housing requirement of 9,460 dwellings over the plan period 2011-2026, equating to an average housing requirement of 630.66 dwellings per annum. As of 1st April 2024, a total of 6,516 dwellings were completed within the Vale of Glamorgan of which 4,381 units were general market dwellings against the 2024 AMR target of 6,242 that should have been developed at this point in the plan period, in accordance with the target. The number of additional general market dwellings delivered is 30% below the monitoring target and therefore greater than the monitoring trigger threshold (10% less than the monitoring target over 2 consecutive years). The trigger has been hit as this is the 3rd year this has occurred.

2.16 In terms of affordable housing, a further 170 additional affordable homes have been provided within the current monitoring period, bringing the total number of affordable dwellings provided since 2011 to 2,138, which is slightly below the LDP target of 2,555 by 2024.

2.17 Of the total dwellings completed, 4,734 dwellings were on LDP Policy MG2 allocated housing sites which was below the 2024 AMR target of 7,172 dwellings to be completed on LDP allocated housing sites identified in the indicator, and the third consecutive year that the target has not been achieved. Notwithstanding this, developer interest remains strong within the Authority, with a number of housing developments presently under construction and sites granted permission yet to commence.

2.18 Following the revocation of TAN 1 Joint Housing Land Availability Studies and the publication of the new Development Plan Manual (DPM) in March 2020, the Council updated the LDP monitoring framework with new housing indicators (7.1.1 and 7.1.2 refer). The DPM states that Local Planning Authorities with an LDP that was adopted before the publication of the latest DPM should monitor housing delivery against the annual average requirement. The monitoring data shows that the Council has delivered 6,516 dwellings to date which is less than the 2024 trajectory target of 8,060 dwellings.

2.19 The total number of dwellings completed equates to an annual average of 501 dwellings against the annual average requirement of 630.66 to deliver the LDP housing requirement of 9,460 dwellings by 2026. This lower annual build rate can be primarily attributed to the impact which the current economic climate has had on the house building industry nationally within the early years of the plan.

- 2.20** With regard gypsy and traveller accommodation, the Council's latest Gypsy and Traveller Accommodation Assessment (GTAA)(June 2022) was approved by Cabinet on 19th January 2023 (Minute C199 refers) and the Homes and Safe Communities Scrutiny Committee on 8th February 2023 (Minute 692 refers). The approved GTAA was submitted to the Welsh Government on 21st April 2023 and formally approved by the Welsh Cabinet Secretary for Culture and Social Justice on 19th June 2024. The GTAA identified a need of nine pitches to 2026 with a further two pitches required by 2036. Recent approvals for sites at Brocastle and Twyn Yr Odyn have reduced the identified need to 7 pitches. The establishment of a permanent site for gypsy and travellers within the Vale of Glamorgan remains unresolved and work continues to identify a suitable site(s) that can be developed to meet the need identified in the Council's 2022 GTAA. The findings of the 2022 GTAA will form part of the evidence base for the RLDP, and the identification of appropriate sites will be addressed through the RLDP process and considered at inquiry. The Council is also engaged in regional work in relation to the transit need however it is anticipated that no transit need will be required within the Vale of Glamorgan.
- 2.21** No new dwellings were approved outside a defined settlement boundary contrary to local and national policies.

Economy

- 2.22** During the 2023/24 monitoring period, the Council approved one planning application for employment uses on LDP employment allocations which resulted in an additional 0.014ha of approved employment uses bringing the total employment uses approved since adoption to 97.62ha (AMR Indicator 1.3 refers). This is considerably lower than the 2024 AMR monitoring target of 251ha or 68% of employment land. The evidence base for the LDP indicated strategic employment sites had the potential to deliver up to 5,610 jobs over the Plan period. While the next monitoring target is outside of the time frame of the current AMR, no new jobs were created on strategic employment sites during the current monitoring period and the total jobs approved on strategic employment sites remains at 2,555.
- 2.23** One small scale employment site was approved in the monitoring period which increases the total amount of employment land approved on MG9 allocated sites since the plan was adopted to 11.34ha. However, existing local employment sites maintain good occupancy levels. The Council has identified new policy in the RLDP Preferred Strategy that sets more achievable targets for the delivery of employment land, the ongoing monitoring of this indicator will assist in the justification for a reduction in the employment land provision in the RLDP.

Tourism

- 2.24** The new and enhanced tourism facilities envisaged on Barry Island (Policy MG29[1] refers) has not been delivered in line with the 2018 monitoring target. Since the adoption of the LDP, the Pleasure Park was acquired by a new owner who maintained the fun fair as a tourist attraction on the site. The Council

continues to work on the options for Nells Point (including with the Cardiff Capital Region).

- 2.25** While the final monitoring target (MG29(3) Land at Cottrell Park) lies outside the current monitoring period (2026) a hybrid planning application for the construction of 36 no. hotel bedrooms, detached owner's accommodation, detached storage building with bat compensatory loft space, and ancillary development including car parking, new road infrastructure, the reconfiguration of the 18th green of the Button Gwinnett course and the demolition of an existing dwelling (all with full details provided); together with the provision of 3,375 sqm of leisure development and 31 retreat lodges was submitted to the Council for consideration in December 2022 and this remains under consideration.

Natural Resources

- 2.26** The most recent South Wales Regional Aggregates Working Party (SWRAWP) Annual Report 2021 (published February 2024) suggests that the Council has a land bank of 35 years of primary land won aggregates which exceeds the monitoring target of 10 years. During the current monitoring period the Council did not monitor indicators 10.2 relating to applications approved which would permanently sterilise a Minerals Safeguarding Areas and indicator 10.3 relating to applications approved within a minerals buffer zone as invariably any implications of the proposed developments on these designations would have been fully considered through the planning application process and found to be acceptable.
- 2.27** 2.852 hectares of greenfield land was granted planning permission during the AMR monitoring period. However, this was deemed to be in accordance with local and national policies. 66.8% of all new housing developments were on brownfield sites which is well above the 38% monitoring target. 0.61 hectares of best and most versatile agricultural land was lost to windfall development during the monitoring period. A total of 6 planning applications were approved with net densities lower than the minimum thresholds set out in Policy MD6 (Housing Densities 30dph) however, the policy does allow for residential densities below the specified targets where it can be demonstrated that there are significant constraints associated with a site that prevent development at the specified levels or where development at the density required would have an adverse impact on the character or appearance of the locality or result in the loss of an important site feature.
- 2.28** Overall, the sixth AMR illustrates that good progress has again been made in implementing most of the Plan's policies and that the LDP strategy remains sound. Where issues have been identified, these can largely be attributed to the current economic climate and are outside of the control of the LDP e.g. housing delivery, retail vacancies, employment, and these matters will be more fully considered through the development of the RLDP. Most of the SA monitoring targets have also been met which demonstrates the positive impact the LDP

policies are having on environmental resources. The AMR acknowledges that the Council has commenced work on a RLDP in accordance with LDP Regulation 41. In addition, it recommends that the AMR is submitted to the Welsh Government by 31st October 2024 and published in accordance with the statutory requirements.

3. How do proposals evidence the Five Ways of Working and contribute to our Well-being Objectives?

- 3.1 Long Term** – The sixth AMR will act as a baseline for future monitoring of the LDP as required by the Welsh Government. In the long term, the monitoring of the Plan will enable the identification of trends and any issues arising where policies are underperforming enabling further investigation and research to take place.
- 3.2 Prevention** – The AMR relates directly to the effectiveness of the LDP strategy and policies. The policies seek to ensure that new development has a positive impact on the economy, built and natural environment as well as the social and cultural well-being of the Vale of Glamorgan.
- 3.3 Integration** – The AMR relates directly to the performance of the LDP policies, which contribute to the Council's Well Being objectives. The successful monitoring of the LDP through the AMR process will ensure that the strategy /policies remain relevant and that the social, economic and environmental objectives of the Plan are delivered.
- 3.4 Collaboration** – The LDP was subject to extensive statutory consultation as well as an independent examination in accordance with the development plan guidance and regulations issued by the Welsh Government. In order to meet the objectives and targets set out in the Plan, the Council will work in collaboration with external partners to ensure their successful delivery.
- 3.5 Involvement** – The AMR has been prepared by officers within the Planning Division and is based on data collected from a variety of internal and external sources. This data has demonstrated good progress to date in meeting the LDP / SA objectives.

4. Climate Change and Nature Implications

- 4.1** The LDP provides the current planning policy framework for delivering sustainable development in the Authority up to 2026. It has a key role to play in making new development resilient to climate change, decarbonising society, and protecting and enhancing the natural environment. Specifically, objective 2 of the LDP is: *'To ensure that development within the Vale of Glamorgan makes a positive contribution towards reducing the impact of and mitigating the adverse effects of climate change.'*
- 4.2** The purpose of the AMR is to monitor the performance of the LDP against its policies, which have been created to implement the intent of the LDP's objectives, including objective 2.

5. Resources and Legal Considerations

Financial

- 5.1 The preparation of the AMR has been undertaken by officers within the Place Directorate within existing budgets.

Employment

- 5.2 There are no employment implications arising from this report.

Legal (Including Equalities)

- 5.3 The Council has considered the requirements of the Well Being of Future Generations (Wales) Act 2015 and the 7 well-being goals in the preparation of the AMR. The preparation of the AMR has been undertaken with regard to the Council's equal opportunities and Welsh language policies. The AMR will be available in Welsh and in other formats (e.g., larger font) on request. There are no human right implications arising from this report.

8.2 SA Monitoring Conclusions	177
8.3 Recommendations	177
APPENDIX 1: SUMMARY OF AMR LDP MONITORING RESULTS 2018 – 2023	178

1. EXECUTIVE SUMMARY

1.1. INTRODUCTION

- 1.1.1 The Vale of Glamorgan Local Development Plan 2011 - 2026 (LDP) was adopted on the 28th June 2017. Section 76 of the Planning and Compulsory Purchase Act 2004 (as amended) requires local planning authorities to monitor the implementation of their adopted LDPs by preparing an Annual Monitoring Report (AMR).
- 1.1.2 The AMR is prepared in accordance with the Monitoring Framework contained in the adopted LDP at page 129 (section 9). The monitoring framework of the LDP includes a set of indicators and targets which are set against trigger points to indicate if one part of the Plan is not achieving the desired outcomes. Trigger points have been included to assess the level to which a policy has diverged from the monitoring target to such an extent that it could identify that the policy is failing to be implemented or needs to be amended. Many of the indicators include biannual targets or refer to appropriate target dates for specific developments / facilities to assess the performance of the Plan.
- 1.1.3 The AMR is the primary mechanism for reviewing the relevance and success of the LDP and for establishing whether any changes or revisions to the Plan are required. The primary function of the AMR is to demonstrate the extent to which the LDP strategy and objectives are being achieved and whether the Plan's policies are functioning effectively. The production of an AMR also enables the Council to assess the impact that the LDP is having on the social, economic, and environmental well-being of the authority and helps identify any significant contextual changes that may influence Plan implementation or review.
- 1.1.4 The Town and Country Planning (LDP) (Wales) Regulations 2005 and the Development Plans Manual Edition 3 (March 2020) (DPM) provide guidance on the content of the AMR and when it should be submitted to the Welsh Government. In accordance with the LDP Regulations and Welsh Government guidance the Council's first AMR was submitted to the Welsh Government by the 31st October 2019 deadline and covered the period 1st April 2018 to 31st March 2019. This is the sixth AMR to be prepared since the adoption of the Vale of Glamorgan LDP and it is based on data collected for the period 1st April 2023 to the 31st March 2024.
- 1.1.5 It should be noted that the AMR includes some additional monitoring indicators that were not included in the adopted LDP monitoring framework. The new indicators have resulted from the actions of previous AMRs and changes to Welsh Government guidance. In addition, some of the original LDP monitoring indicators are no longer applicable as the monitoring targets have been met and / or projects have been completed. In such instances, a reference is included in the AMR to this effect.

- 1.1.6 While the immediate social and economic impacts of the Covid-19 pandemic were clear, the longer-term impacts are still uncertain. The impact of the pandemic on many of the AMR indicators e.g. retail, housing, were significant and many areas of society have yet to fully recover, and this is reflected in the AMR indicators. Inevitably, the longer-term impacts of the pandemic will become more apparent in subsequent AMRs.
- 1.1.7 On the 19th of October 2020, Cabinet endorsed a recommendation to commence a full review of the adopted LDP before the 28th of June 2021 (minute C344A refers). The recommendation is in line with LDP Regulation 41 to ensure that the LDP remains up to date and responds to the new challenges and opportunities facing the authority over the next 15 years. However, AMRs will continue to be submitted to the Welsh Government on an annual basis until the new Replacement Local Development Plan (RLDP) is adopted.
- 1.1.8 The Preferred Strategy for the Replacement Local Development Plan (RLDP) was subject to a 10-week public consultation between the 6th December 2023 and the 14th February 2024.

1.2. KEY FINDINGS OF THE SIXTH ANNUAL MONITORING PROCESS (1ST APRIL 2023 TO 31ST MARCH 2024)

CONTEXTUAL INFLUENCES

- 1.2.1 Section 3 of the AMR provides information on the various contextual changes that have occurred since the adoption of the plan which could have impacted upon the aims and objectives of the LDP. This includes new / amended national legislation and/or relevant plans, policies and strategies at the national, regional, or local level which could have a bearing on the delivery of the LDP strategy. In addition, the section also provides an overview of the prevailing economic situation over the monitoring period together with information on progress on key Supplementary Planning Guidance (SPG). Where appropriate, any potential implications for the LDP have been summarised.
- 1.2.2 Some of the external factors that have been identified may have implications for the LDP over the longer term. The impact of the factors identified and any future changes on the aims and objectives of the LDP will therefore be considered in future AMRs and the emerging RLDP. Contextual information which is specific to a LDP policy area is provided in the relevant policy analysis section for ease of reference and is therefore not repeated here.

LOCAL DEVELOPMENT PLAN MONITORING – POLICY ANALYSIS

- 1.2.3 Section 5 of the AMR examines how the LDP's strategic policies and associated managing growth and managing development policies are performing against the Plan's monitoring targets. It also looks at whether the LDP strategy and

objectives are being delivered. A 'traffic light' rating system has been employed as a visual aid in monitoring the effectiveness of the Plan's policies and to provide a quick reference overview of policy performance as follows:

Continue Monitoring (Green)
Where indicators are suggesting the LDP Policies are being implemented effectively and there is no cause for review.
Training Required (Blue)
Where indicators are suggesting that LDP Policies are not being implemented as intended and further officer or member training is required.
Supplementary Planning Guidance Required and Development Briefs (Purple)
Indicators may suggest the need for further guidance to be provided in addition to those already identified in the Plan. Additionally, should sites not be coming forward as envisaged; the Council will actively engage with developers / landowners to bring forward Development Briefs on key sites to help commence the development process
Policy Research (Yellow)
Where indicators are suggesting the LDP Policies are not being effective as they should further research and investigation is required. This may also include the use of contextual indicators and comparisons with other local authorities and national statistics where appropriate may be required.
Policy Review (Amber)
Where indicators are suggesting the LDP Policies are failing to implement the strategy a formal review of the Policy is required. Further investigation and research may be required before a decision to formally review is confirmed.
Plan Review (Red)
Where indicators are suggesting the LDP strategy is failing and a formal review of the Plan is required. This option to fully review the Plan will need to be fully investigated and undertaken following serious consideration.

KEY FINDINGS

- 1.2.4 Generally, the key findings of the sixth AMR remain positive. However as in the previous AMR, several of the 'CORE' and 'Local' indicators have recorded 'red' or 'amber' performance ratings. These however, all relate to either housing or retail indicators, and are considered to reflect the current difficulties being experienced in the UK economy. While these performance ratings are of some concern, given the prevailing economic climate and the fact that a full plan review has already commenced, it is considered that the performance of the core indicators does not warrant any further action. Notwithstanding the above, several 'Local' indicators that recorded 'amber' performance rating within the last

AMR have reverted to 'green' ratings for the current monitoring period. Once again, the majority of the 'LOCAL' indicators remain positive (green) indicating that the relevant LDP policies continue to achieve their objectives and are being implemented effectively. Notwithstanding this, as detailed above the Council has now commenced the preparation of a new RLDP and the initial RLDP Delivery Agreement (DA) containing the plan timetable and Community Involvement Scheme (CIS) was formally agreed by the Welsh Government on the 4th May 2022 and subsequently an amended DA was approved on the 21st November 2023.

- 1.2.5 This AMR contains LDP indicators which are used to monitor the effectiveness of the Plan and its policies. The indicators are categorised by Plan objectives and include the following: Sustainable Communities, Climate Change, Transport, Built and Natural Environment, Community Facilities, Retail, Housing, Economy, and Natural Resources. A summary of the results from previous AMRs is provided in the table below. It should be noted that the total number of indicators varies between AMRs. This is due to the identification of new indicators in the AMRs e.g., need for new SPG and deletion of some superseded monitoring indicators such as 7.1.

TABLE 1: KEY FINDINGS - CORE AND LOCAL INDICATORS

Assessment	Action	AMR 1: 2018 - 2019	AMR 2: 2019 - 2020	AMR 3: 2020 - 2021	AMR 4: 2021 - 2022	AMR 5 2022-2023	AMR 6 2023-2024
		No. of indicators within the Category	No. of indicators within the Category	No. of indicators within the category	No. of indicators within the category	No. of indicators within the category	No. of indicators within the category
Where indicators suggest that LDP policies are being successfully implemented,	No further Action required. Continue monitoring in future AMRs.	60	59	59	59	47	50
Where indicators suggest that LDP policies are not being implemented as intended.	Officer and/or Member training is required.	1	0	0	0	0	0
Where indicators suggest the need for further guidance in addition to that already identified in the Plan.	Supplementary Planning Guidance and/or Development Briefs may be required.	3	0	0	0	0	0

Where indicators suggest that the LDP policies are not as effective as they should be.	Further research and investigation and comparison with adjacent LPA may be required.	2	2	1	2	5	3
Where indicators suggest that LDP policies are failing.	Further investigation and research may require a policy review.	0	0	0	0	2	1
Where indicators suggest that the LDP strategy is not being implemented.	Following confirmation, the LDP will be subject to a full review process.	0	0	0	0	7	7

HOUSING (INCLUDING AFFORDABLE HOUSING)

- 1.2.6 The Vale of Glamorgan continues to be an attractive place to live and demand for properties throughout the authority remains high. Between 1st April 2011 and 1st April 2024, a total of **6,516 dwellings were completed** within the Vale of Glamorgan of which **4,381** units were general market dwellings against the 2024 AMR target of **6,242** that should have been developed at this point in the plan period, in accordance with the target. **The number of additional general market dwellings delivered is 30% below the monitoring target and therefore greater than the monitoring trigger threshold** (10% less than the monitoring target over 2 consecutive years). **The trigger has been reached as this is the 3rd year this has occurred.**
- 1.2.7 In terms of affordable housing, a further **170 additional affordable homes** have been provided within the period, bringing the total number to **2,138 affordable dwellings** having been provided since 2011, which is slightly below the LDP target of **2,555 by 2024.**
- 1.2.8 Of the total dwellings completed, **4,734** dwellings were on LDP Policy MG2 allocated housing sites which below the 2024 AMR target of **7,172** dwellings to be completed on LDP allocated housing sites identified in the indicator, and the third consecutive year that the target has not been achieved. Notwithstanding this, developer interest remains strong within the authority, with a number of housing developments presently under construction and sites granted permission yet to commence.
- 1.2.9 Following the revocation of TAN 1 Joint Housing Land Availability Studies and the publication of the new Development Plan Manual (DPM) in March 2020, the Council updated the LDP monitoring framework with new housing indicators

(7.1.1 and 7.1.2 refer). The DPM states that Local Planning Authorities with an LDP that was adopted before the publication of the latest DPM should monitor housing delivery against the annual average requirement. The monitoring data shows that the Council has delivered **6,516 dwellings** to date which is less than the 2024 trajectory target of **8,060 dwellings**.

- 1.2.10 The total number of dwellings completed equates to an **annual average of 501.23** dwellings against the annual average requirement of 630.66 to deliver the LDP housing requirement of 9,460 dwellings by 2026. This lower annual build rate can be primarily attributed to the impact which the current economic climate has had on the house building industry nationally within the early years of the plan.

EMPLOYMENT

- 1.2.11 During the 2023/24 monitoring period, the Council approved one planning application for employment uses on LDP employment allocations which resulted in an additional 0.014ha of approved employment uses bringing the total approved employment uses approved since adoption to 96.62ha (AMR Indicator 1.3 refers). This is below the 2024 monitoring target of 251ha. Notwithstanding the above, it is likely that the current shortfall is indicative of the current economic climate across the UK. This is the second year that the percentage of employment land securing planning permission has been over 10% below the monitoring target. The situation will continue to be monitored and reviewed as a part of the emerging RLDP. An employment land assessment undertaken by BE Group has recently been completed which provides recommendations on how to encourage, protect and deliver employment growth through the planning system. The report will inform the emerging RLDP and policy development to 2036. Further, the 2020-21 AMR stated that 44.75ha of employment land was approved in July 2021, at Model Farm (Policy MG9(2) refers). However, it should be noted that this planning permission was quashed in October 2021. A new planning application was submitted following this, and this remains subject to an appeal for non-determination under Section 78 (2) of the Town and Country Planning Act 1990, which has been called-in by the Welsh Ministers.
- 1.2.12 Only one small scale application on local employment sites in the Vale of Glamorgan has been approved during the monitoring period (0.014ha) and the total amount of employment land approved on MG9 allocated sites since the plan was adopted in 2017 has therefore increased to 11.34ha.
- 1.2.13 The Council will closely monitor the take up of allocated strategic and local employment sites over the next AMR period. However, it should be noted that the RLDP evidence base includes a review of the employment land requirement within the authority as well as a review of the effectiveness of the current LDP employment policies. A new SPG on employment land and premises was adopted in February 2023.

- 1.2.14 No new jobs have been created on strategic employment sites during the monitoring period and the total number of jobs approved by reserved matters applications since the LDP was adopted remains at 2,555.

RETAIL

- 1.2.15 The retail monitoring indicators illustrate that since the LDP was adopted in 2017 there has been a reduction (6.8%) of retail floorspace in the town and district centres and increases in office floorspace (<1.0%) and leisure floorspace (21.7%). This reflects the changing role of town centres, which is also apparent elsewhere in the UK and reflects the changes made to national planning policy which now promote retail and commercial centres as hubs for social and economic activity and the focal point for a diverse range of services which support the needs of local communities. The Council will continue to closely monitor this trend in future AMRs and consider the implications of the changes through the emerging RLDP.
- 1.2.16 Overall, the Vale of Glamorgan town, district retail centres appear to be showing some resilience to the prevailing economic climate and the level of vacancy rates and A1 uses within the centres remain largely within indicator targets. In respect of local and neighbourhood centres, while a small number of centres have experienced increases in vacancy rates since the last AMR, it is considered that the increases are not representative of major issues and merely reflect natural variations in vacancy rates within the centre(s) and do not indicate a major trend or warrant immediate concern..
- 1.2.17 As a part of the evidence base for the Replacement Local Development Plan, in 2023, the Council engaged Nexus consultants to undertake a Retail and Commercial Leisure Study to provide the Council with an up-to-date, objective assessment of retail and leisure development needs within the Council area and to consider possible strategic policy responses to any prevalent or prevailing issues. The final report was produced in June 2023 and provides key information on the Vale's main retail centres that will direct emerging policy development in the RLDP. In addition, in February 2023 the Council adopted a new Retail SPG to provide greater clarity on the application of existing LDP policies for both applicants and development management officers.

GYSIES AND TRAVELLERS

- 1.2.18 While a permanent gypsy and traveller site has yet to be identified, investigations continue to try to find a suitable site to meet the identified long-term gypsy and traveller need through a variety of mechanisms. Following the unsuccessful general call for candidate sites undertaken during 2019, and again during February to April 2024, investigations have sought to identify the availability of land on the open market, but these have proved unproductive. The Strategic Housing board is currently considering the matter further and the options available to the Council are being assessed. A new Gypsy and Traveller Accommodation Assessment (GTAA) was approved by Cabinet in January 2023 and formally approved by the Welsh Government on the 19th June 2024. The GTAA identifies a need for 9 pitches within the 5 years of the GTAA study period

to 2026 and a further 2 pitches in the period up to 2036, equating to a total need for 11 pitches. Notwithstanding this, recent approvals for sites at Brocastle (3 pitches) and Twyn Yr Odyn (1 pitch) have reduced the identified need to 7 pitches. The establishment of a permanent site for gypsy and travellers remains unresolved and work continues to identify a suitable site(s) that can be developed to meet the need identified in the 2022 GTAA. The findings of the GTAA will form part of the evidence base for the RLDP, and the identification of suitable sites will be addressed through the RLDP process and considered at inquiry.

TRANSPORT

- 1.2.19 The LDP monitoring framework required the completion of 6 local transport schemes identified in Policies SP7 and MG16 of the adopted LDP by 2020. This monitoring target was met early in the Plan period and subsequent targets including completion of the Barry Docks Station interchange (completed in June/July 2023) and progress on other schemes again illustrate that good progress is being made on the monitoring targets. The latest AMR indicates that while work on some future schemes has halted pending the availability of funding for initial phase I investigative works, work on other schemes has progressed well with several schemes including the Barry Waterfront to Dinas Powys walking and cycling route, where detailed design and public consultation has been completed and route construction is anticipated mid-2025. Although work on the Bus priority measures at Merrie Harrier, Cardiff Road, Barry to Cardiff via Barry Road has slowed, detailed design works have been completed and feasibility/modelling work will take place during 2024/25. Ecological surveys and detailed design works have been completed and a planning application has been submitted for the NCN88 and associated connections although construction works will be tied in with the wider site development. Any schemes which have not commenced or made significant progress will be reviewed and considered as a part of the RLDP review. With regard to improvements to the Valley Lines, this work is out of the direct control of the Vale of Glamorgan Council and while overall improvements continue, it is regrettable that proposed increases to frequency on the VoG line have been deferred however a commitment from TfW remains and on a positive note, new Class 321 trains will be running on nearly all services to Barry and Barry Island.
- 1.2.20 Once again, in accordance with the Council's Travel Plan Supplementary Planning Guidance and TAN 18, all relevant planning applications have been supported by an appropriate Travel Plan. The Replacement Local Development Plan will consider the requirements for new sustainable transport schemes and projects that support development allocations and promote Active Travel.

SUSTAINABILITY APPRAISAL (SA) MONITORING

- 1.2.21 The LDP and the AMR must comply with relevant European Directives and Regulations. In this regard, monitoring of the LDP should accord with the requirements for monitoring the sustainability performance of the LDP through

the Strategic Environmental Assessment / Sustainability Appraisal (SEA/SA) process.

- 1.2.22 SA helps to demonstrate that the LDP is sound by ensuring that it reflects sustainable development objectives and contributes to the reasoned justification of policies. The SA identifies a set of objectives and significant effect indicators which are intended to measure the social, economic, and environmental impact of the LDP.
- 1.2.23 Section 6 of the AMR examines the performance of the LDP against the SA monitoring objectives. This provides a short-term position statement on the performance of the Plan against several sustainability indicators and provides a baseline for future comparative analysis.

CONCLUSIONS

- 1.2.24 The sixth AMR provides a comparison with the baseline data provided by previous monitoring reports. The key conclusions in the sixth year of reporting are that most of the Plan's policies continue to perform well in terms of delivering the Plan's strategy and meeting the targets set out in the adopted LDP Monitoring Framework.
- 1.2.25 Welsh Government procedural guidance contained within the Development Plans Manual (Edition 3, March 2020) (table 31 refers) sets out five questions which the AMR should consider. The issues contained in these questions have been considered throughout the AMR as part of the analysis of data. However, for completeness, they are addressed below:
- *What new issues have occurred in the plan area, or changes to local/national policy?*
- 1.2.26 Section 3 of the AMR contains information on the contextual changes that have occurred since the adoption of the LDP. These include any new / amended national legislation and relevant plans, policies, and strategies at the national, regional, or local level which could have a bearing on the delivery of the LDP strategy and/or key infrastructure or projects which could impact upon the delivery of the LDP objectives.
- 1.2.27 While the implications of some of these contextual changes could have future implications for the LDP they will be incorporated and fully considered in future AMRs and the RLDP. As recommended in the first AMR, new SPG has been prepared for specific policy areas where targets are not being met or where and when there is considered to be a need for additional SPG.
- *How relevant, appropriate, and up to date is the LDP strategy and its key policies and targets?*
- 1.2.28 The evidence collected as part of the AMR process shows that good progress is being made regarding the implementation of the LDP strategy and objectives. Section 5 provides a detailed assessment of how the Plan's key policies are performing against the identified monitoring targets. In a few instances,

monitoring targets have not been met however, it is considered that no further action is required at this time and that the indicator should be monitored and reviewed in the next AMR and if deemed appropriate, necessary policy interventions made through the development of the RLDP. This has enabled the Council to make an informed judgement of the Plan's performance during this period. Table 1 (page 4) provides a useful overview of the effectiveness of the Plan's policies during this monitoring period using the 'traffic light' rating system used in the assessment and only shows 2 indicators that require further research and investigation. This is currently underway and will inform the emerging RLDP.

- *What sites have been developed or delayed in relation to the plan's expectations at both places and in the phasing programme (as set out in the trajectory).*

1.2.29 LDP monitoring indicator 1.2 in section 5 examines the total number of housing units completed on the allocated housing sites identified in policy MG2. As of 1st April 2024, 4,734 dwellings had been completed on the allocated sites which is below the 7,172 dwelling target for the current monitoring period. Although this represents a 34% shortfall below the monitoring target and has activated the monitoring trigger which is based on a -10% shortfall against the dwelling target over 2 consecutive years.

1.2.30 In terms of the delivery of the Policy MG2 housing allocations, as at the 1st April 2024, 39 of the 48 sites (81%) had been granted planning permission and of these sites 34 were either complete or under construction. In addition, the Council is engaged in pre-application discussions with interested parties on several of the remaining sites as well as other potential windfall sites, indicating that developer interest in the Vale of Glamorgan remains strong.

- *What is the degree of variance from the anticipated annual and cumulative build rate? Is there a two-year trend of under delivery (annual completions not number of AMRs submitted)?*

1.2.31 The LDP identifies a housing requirement of 9,460 dwellings over the plan period 2011-2026, equating to an average housing requirement of 630.66 dwellings per annum. Section 5 examines the annual level of housing completions in relation to the annual average requirement. The analysis also includes a comparison between housing delivery and the housing trajectory prepared as evidence at the LDP Examination.

1.2.32 The monitoring data indicates that between 1st April 2011 and 1st April 2024, the LDP has delivered 6,516 dwellings which equates to an annual average delivery of 503.5 dwellings per annum as opposed to 630.66. This is 26% below the 2024 cumulative dwelling target of 8,198 dwellings at 1st April 2024.

1.2.33 This lower annual build rate is primarily reflecting the impact which the global economic recession has had on the housing industry nationally which resulted in a lower rate of housing completions within the Vale of Glamorgan compared to that experienced prior to the recession. In addition, in the early years of the plan

period, the LDP had not been adopted and as such the availability of housing land within the Vale of Glamorgan had not been fully established.

1.2.34 The graph below illustrates the growth in housing delivery within the Vale of Glamorgan since 2011, highlighting a steady annual increase in housing completions reflecting the national economic recovery along with the availability of deliverable housing land. For the years 2016-17, 2017-18, 2019-20 and 2020-21 the table illustrates that housing dwelling completions have exceeded the annual average requirement. However, the number of annual completions has been below the annual average requirement for the last three years. The graph provides comparisons between the rate of housing delivery over the Plan period (Green Line) against the annual average requirement (Yellow Line) and the dwelling completions within the LDP housing trajectory (Red Line). The bar graph provides a breakdown of housing delivery by source, namely adopted LDP housing allocations and small and large windfall developments.

FIGURE 1: HOUSING TRAJECTORY GRAPH

1.2.35 The above graph indicates that over remaining 2 years of the adopted LDP completions are anticipated to fluctuate as existing sites under construction continue to be built out prior to additional sites coming on stream. It is envisaged that beyond the plan period build rates will steadily increase. The Council is currently progressing with its RLDP and a new housing trajectory shall be prepared for the RLDP.

- *What has been the effectiveness of delivering policies and preventing inappropriate development?*

1.2.36 The policies have been very effective to date in delivering policies and discouraging inappropriate development as set out in section 5. The most significant achievements include the following:

- *6,648 dwellings have been approved on allocated housing sites which is 9.7% above the April 2024 target of 6,058 dwellings target.*
- *66.8% of all new housing approved during this AMR period has been on brownfield sites (Indicator 10.5).*
- *No windfall development permitted on BMV land contrary to the policies in the LDP (Indicator 10.6).*
- *While the next renewable indicator target is outside the current reporting period, a further 1.3MW of renewable energy developments were approved by the Local Planning Authority during the monitoring period, bringing the total consented renewable energy for electricity production to 84.72GWh since the adoption of the plan (Indicator 2.3).*
- *No major retail/ leisure development permitted outside established town and district centre boundaries in this AMR period (Indicator 6.1(ii)).*
- *Vacancy rates in the Vale's town and district centres remained static or decreased during the monitoring period.*
- *All relevant planning applications were accompanied by a Travel Plan in this AMR period (Indicator 3.2).*
- *Net increase in public open space (0.61ha) gained through development in this AMR period (Indicator 4.7).*
- *Significant progress on delivery of new education facilities. All monitoring targets for the current monitoring period have been met and good progress is being made on subsequent targets for 2026. (Indicator 5.1).*
- *No development approved in this AMR period which resulted in the unacceptable loss of community facilities (Indicator 5.4). While the monitoring target for the current monitoring period was not fully met, works are well advanced and will be completed soon and progress on the subsequent 2026 monitoring target is well advanced.*
- *No development approved in C1 and C2 floodplains that did not meet the TAN 15 tests in this AMR period (Indicators 2.1 & 2.2).*
- *No development approved contrary to the advice of Cadw or NRW in this AMR period (Indicator 4.1).*
- *The latest SWRAWP Annual Report (2019) confirms that the authority has a 39-year land bank of permitted aggregate reserves which is significantly higher than the 10 year target (Indicator 10.1).*

1.2.37 Although there are a couple of areas where further work and / or investigations are required, overall, the AMR demonstrates that the LDP continues to be largely successful in achieving its objectives. Nevertheless, the Council has commenced work on a RLDP in accordance with LDP Regulation 41 of the

TCPA (LDP)(Wales) Regulations 2005 (as amended) and these matters will be included as part of this process.

- 1.2.38 The Council will continue to monitor the adopted LDP through the preparation of successive AMRs and the findings will be used to inform the preparation of the RLDP. While the full impact of the COVID 19 pandemic remains uncertain, it has undoubtedly had impacts across society and changed the way we live and work. Some of the impacts are likely to require policy intervention at both national and local level and such matters will need to be fully considered in future policy formulation, plan preparation and monitoring.

2. INTRODUCTION

2.1 INTRODUCTION

- 2.1.1. The Vale of Glamorgan LDP 2011- 2026 was formally adopted by the Council on the 28th June 2017 and is the principal land use planning document for determining planning applications in the Vale of Glamorgan. The LDP sets out the Council's objectives and priorities for the development, use and management of land until 2026. The LDP contains a Monitoring Framework which includes targets and indicators against which the performance of the Plan's strategy, policies and allocations can be measured.
- 2.1.2. Section 61 of the Planning and Compulsory Purchase Act (2004) (PCPA) and the associated Regulations requires Local Planning Authorities (LPAs) to keep under review all matters which may be expected to affect the development of their area or the planning of its development. Section 76 of the Act requires the Council to present this information in the form of an Annual Monitoring Report (AMR).
- 2.1.3. The AMR is the key mechanism to assess the delivery and implementation of an LDP strategy and provides transparency in the planning process by keeping stakeholders, business groups and the community informed of its effectiveness and identifies any issues.
- 2.1.4. Regulations and guidance on the form and content of the AMR is set out in the Town and Country Planning (Local Development Plan) (Wales) Regulations 2005 (as amended) and the Development Plans Manual (Edition 3 March 2020) (DPM).
- 2.1.5. The AMR has two primary roles:
- To consider whether the policies identified in the LDP Monitoring Framework are being achieved and implemented successfully; and
 - To consider the Plan against all of the information gathered to determine whether a complete or partial review of the Plan is necessary.
- 2.1.6. The AMR is also an opportunity for the Council to assess the impact that the LDP is having on the social, economic, and environmental well-being of its administrative area. It can assist the Council to:
- Identify areas of success.
 - Identify where certain policies are not being successful in delivering their intended objectives.
 - Identify gaps in the evidence base, perhaps through a change in the economy, which needs to be addressed and reflected in the LDP; and
 - Identify what actions will be taken to address the issues identified to ensure the implementation of the LDP, including any revisions that need to be made to the LDP.
- 2.1.7. The Council is required to commence a full review of the LDP every 4 years from the date of its initial adoption, in accordance with Regulation 41 Town and

Country Planning (Local Development Plan) (Wales) Regulations 2005 (as amended 2015). This provides an opportunity for the Council to review progress in implementing the policies and make modifications where required. The review also enables the Council to ensure that the LDP is kept up to date in respect of changes in national planning policy and other relevant national and regional documents or legislation.

- 2.1.8. On the 19th of October 2020, Cabinet endorsed a recommendation to commence a full review of the adopted LDP before the 28th of June 2021 (minute C344A refers) in line with LDP Regulation 41 to ensure that the LDP remains up to date and responds to the new challenges and opportunities facing the authority over the next 15 years. The Delivery Agreement (DA) for the Replacement Local Development Plan (RLDP) was initially approved by the Welsh Government on the 4th May 2022 and a revised DA was approved by the Welsh Government on the 21st November 2023. Since the DA was formally adopted, significant progress has been made on the RLDP, inter alia, preparation of issues, vision, objectives background paper, consideration of spatial and growth options, sustainable settlements review, call for candidate sites and publication of candidate site register, as well as various background studies including employment, retail and renewable energy. A 10-week public consultation on the RLDP Preferred Strategy was held from 6th December 2023 to 14th February 2024 and work on the Deposit Plan is underway in accordance with the approved DA timetable for a scheduled Deposit Plan public consultation during February and March 2025. In accordance with the LDP Regulations, AMRs for the existing LDP will be required to be submitted to the Welsh Government until a new RLDP is adopted.
- 2.1.9. In tandem with these primary objectives, the AMR must also consider conformity with the Sustainability Appraisal (SA) and Habitats Regulations Assessment (HRA). The AMR has been prepared in accordance with the requirements of the Town and Country Planning (Local Development Plan) (Wales) Regulations 2005 (as amended); Strategic Environmental Assessment Regulations (2004); and the Habitats Regulations Assessment (2004).
- 2.1.10. This is the sixth AMR prepared by Council and is based predominantly on data collected for the period 1st April 2023 to the 31st March 2024. It has been prepared in accordance with the LDP Regulations and the revised guidance contained in the Development Plan Manual (Edition 3, March 2020) (DPM) and will be submitted to the Welsh Government by the 31st October 2024. It should be noted that the content reflects the amended guidelines and requirements set out in the revised DPM, particularly in relation to housing completions and the housing trajectory.

2.2 THE REQUIREMENT FOR LDP MONITORING

2.2.1 Section 61 of the Planning and Compulsory Purchase Act 2004 requires local authorities to keep under review matters that may affect the planning and development of their areas or the planning of its development.

2.2.2 These matters include:

- The principal physical, economic, social, and environmental characteristics of the area of the authority (including the extent to which the Welsh language is used in the area).
- The principal purposes for which land is used in the area.
- The size, composition, and distribution of the population of the area.
- The communications, transport system and traffic of the area.
- Any other considerations which may be expected to affect those matters.
- Such other matters as may be prescribed or as the Assembly in a particular case may direct.

2.2.3 Regulation 37 of the Town and Country Planning (Local Development Plan) (Wales) Regulations requires that an LPA must publish its AMR on its website and submit it to the National Assembly on or before the date specified in guidance issued by the Assembly.

2.2.4 Regulation 37 requires that the AMR should identify policies that are not being implemented and for each policy:

- Identify the reasons why the policy is not being implemented.
- Identify the steps (if any) that will be taken to enable the policy to be implemented.
- Explore whether a revision to the plan to replace or amend the policy is required.

2.2.5 In addition, the Development Plan Manual requires that all monitoring frameworks include a range of indicators as follows (Table 29 in the DPM refers). In accordance with the latest guidance these indicators have been incorporated into all subsequent AMRs.

Indicators Required by Legislation	
Number of net additional affordable and market dwellings built in the LPA area.	LDP Regulation 37. All AMRs must include the annual affordable and market housing completions in the plan area.
Key Indicators Applicable to all Plans	
Spatial distribution of housing development	To monitor housing completions each year in line with the growth strategy and the settlement hierarchy.
The <u>annual</u> level of housing completions monitored against the Anticipated Annual Build Rate (AABR).	Annual housing completions must be monitored against the Anticipated Annual Build Rate (AABR) as specified in the adopted housing trajectory (see Table 21 and Diagram 16). This must be presented clearly in the AMR both in numerical and percentage terms (plus/minus x%). For those plans published prior to the publication of the DPM, completions will be measured against the Average Annual Requirement (AAR) set out in the plan. This must be presented clearly in the AMR both

	<p>in numerical and percentage terms (plus/minus x%).</p> <p>The components of housing supply, including site allocations, large and small windfalls should also be monitored separately.</p> <p>See section on updating housing trajectory through the AMR.</p>
Total <u>cumulative</u> completions monitored against the anticipated cumulative completion rate.	<p>Cumulative housing completions must be monitored against the cumulative completion rate as specified in the adopted housing trajectory (see Table 21 and Diagram 16). This must be presented clearly in the AMR both in numerical and percentage terms (plus/minus x %).</p> <p>For those plans published prior to the publication of the DPM, completions will be measured against the cumulative average annual housing requirement set out in the plan. This must be presented clearly in the AMR both in numerical and percentage terms (plus/minus x%).</p> <p>See section on updating the housing trajectory through the AMR.</p>
<p>The level of affordable housing completions monitored against the plan's overarching target.</p> <p>The tenure of affordable housing completions.</p>	<p>To monitor affordable housing completions delivered through the planning system each year against the target set in the plan. A separate indicator should monitor the tenure split (social rented and intermediate) in line with need identified in the LHMA.</p>
<p>Employment land take-up against allocations.</p> <p>Job growth.</p>	<p>To monitor the take-up of employment land in the plan.</p> <p>Indicators monitoring Class B job growth in line with the strategy.</p>
Delivery of affordable housing policy - thresholds and percentage targets for each sub-market area.	To monitor the delivery of affordable housing in line with policy targets and thresholds in each sub-market area (where relevant) including any deviation above or below the target.
Viability.	LPA should monitor trends (positive and negative) in key determinants of market conditions and viability such as, house prices, land values, build costs.

The rate of development on key allocations (completions linked to phasing trajectories and infrastructure schemes, where appropriate).	To monitor the development of land uses and associated infrastructure on key development sites in the plan. The rate of development will need to be considered against the anticipated trajectory, Placemaking principles and delivery appendix.
The delivery of key infrastructure that underpins the plan strategy.	This will monitor the development of new infrastructure, such as road and rail improvements and utility enhancements on which the plan strategy is dependent.
The completion of Gypsy and Traveller sites to meet identified need.	This will monitor the development of allocated gypsy and traveller sites to meet identified need over the full plan period. A separate indicator will also be required to monitor and make provision for any newly arising need outside of the GTAA.
The scale/type of highly vulnerable development permitted within C2 flood risk areas.	To demonstrate the effectiveness of avoiding highly vulnerable development in the areas at most risk.
Locally Specific and Contextual Indicators	
Local Indicators	Policy/topic specific indicators should be defined by each LPA specific to their area and considered against the importance of monitoring the effectiveness of the plan's strategy.
Contextual Indicators.	These should be defined by each LPA and involve the consideration of influences at a strategic level to describe the economic, social, and environmental conditions within which the development plan operates.
Linkages to SA/SEA Monitoring	
SA /SEA.	The plan will need to consider the linkages between the SEA/SA monitoring process and the LDP monitoring process to avoid duplication. Opportunities for joint reporting should be maximised. See also AMR section.

- 2.2.6 While largely the same as in the previous DPM, the latest version includes additional monitoring indicators which reflect the Welsh Government's new housing delivery monitoring system.

2.3 THE VALE OF GLAMORGAN LDP MONITORING FRAMEWORK

- 2.3.1 Section 9 of the LDP entitled 'Measuring Success' sets out the Monitoring Framework that forms the basis of the AMR.

2.3.2 The Monitoring Framework includes a set of targets and indicators against which the performance of the policies and development proposals contained within the LDP can be measured. The Monitoring Framework was developed in accordance with the relevant Welsh Government Regulations / guidance on monitoring and was considered at the LDP Examination and in the Inspector's Report. The monitoring framework is reviewed annually to ensure that the framework is consistent with any changes to national policy and guidance relating to the monitoring of development plans.

THE ENVIRONMENTAL ASSESSMENT OF PLANS AND PROGRAMMES (WALES) REGULATIONS 2004 AND THE CONSERVATION OF HABITATS AND SPECIES REGULATIONS 2010 (AS AMENDED)

2.3.3 The LDP and the AMR must comply with relevant European Directives and Regulations. In this regard, monitoring of the LDP should accord with the requirements for monitoring the sustainability performance of the LDP through the Strategic Environmental Assessment / Sustainability Appraisal (SEA/SA) process.

2.3.4 SA helps to demonstrate that the LDP is sound by ensuring that it reflects sustainable development objectives and contributes to the reasoned justification of policies. The SA of the LDP identifies a set of objectives and significant effect indicators which are intended to measure the social, economic, and environmental impact of the LDP.

2.3.5 The LDP Sustainability Objectives are:

- 1 To provide the opportunity for people to meet their housing needs.
- 2 To maintain, promote and enhance the range of local facilities.
- 3 To maintain and improve access for all.
- 4 Reduce the causes of deprivation.
- 5 To maintain, protect and enhance community spirit.
- 6 To minimise the causes and manage the effects of climate change.
- 7 To minimise waste.
- 8 To use land effectively and efficiently.
- 9 To protect and enhance the built and natural environment.
- 10 To provide a high-quality environment within all new developments
- 11 To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.
- 12 To reduce the need to travel and enable the use of more sustainable modes of transport.
- 13 To provide for a diverse range of local job opportunities.

- 14 To maintain and enhance the vitality and viability of the Vale's town, district, and local centres.
- 15 To promote appropriate tourism.
- 2.3.6 The preparation of the AMR therefore accords with the requirements for monitoring the sustainability performance of the Plan through the Environmental Assessment of Plans and Programmes (Wales) Regulations 2004 and the Conservation of Habitats and Species Regulations 2010 (as amended).

ANNUAL MONITORING REPORT FORMAT AND CONTENT

- 2.3.7 The AMR is the main mechanism for reviewing the relevance and success of the LDP and helps to identify any changes that may be necessary from established trends, as follows:
- **Section 1 Executive Summary** - identifies key findings and conclusions in relation to the delivery of the strategy and whether a plan review is required.
 - **Section 2 Introduction** - outlines the requirement, purpose, and structure of the AMR.
 - **Section 3 Contextual Changes** - provides an overview of the relevant contextual information which, although outside the remit of the Plan, could affect the performance of the LDP policy framework. Policy specific contextual information is provided in the relevant policy analysis section, including changes to policy framework at a national or local level.
 - **Section 4 LDP and SA Monitoring Process** - explains the monitoring processes undertaken.
 - **Section 5 LDP Monitoring Framework** - Indicator analysis - Reports on the performance of the LDP monitoring indicators as set out in the LDP Monitoring Framework and agreed during the LDP examination process.
 - **Section 6 Sustainability Appraisal Monitoring** - provides an assessment of the performance of the LDP performance against the 15 SA objectives.
 - **Section 7 Conclusions and Recommendations** - sets out an overview of all indicators and Plan performance in the monitoring period 1st April 2022 to 31st March 2023.

FUTURE MONITORING

- 2.3.8 The DPM advises that the broad structure of the AMR should remain the same from year to year in order to enable comparisons between successive reports and build on preceding results (paragraph 8.12 of the DPM refers). In addition, given that the monitoring process is dependent upon a wide range of statistical information that is sourced from the Council and external sources e.g., StatsWales, any changes to the way in which the external information sources are presented could make certain indicators ineffective or out-dated. Therefore, while every attempt will be made by the Council to maintain a consistent format for the AMR, external influences may require reporting or presentational changes to be incorporated in future AMRs. Notwithstanding the above, this is now the sixth AMR to be prepared by the Council and while the layout remains largely the same as previous documents, the way in which the monitoring indicators have been presented in section 5 has been

amended. Only the previous AMR performance is included in the table but Appendix 1 contains an overview of the performance of all AMRs for ease of reference.

2.4 CONTEXTUAL CHANGES

- 2.4.1 It is important to understand how the implementation of the LDP strategy and objectives have been affected or influenced by external influences and / or local, regional, national, and international factors.
- 2.4.2 This section therefore provides information on contextual changes that have occurred since the adoption of the LDP that could have influenced the LDP strategy and/or policy performance. These include new and/or amended national legislation and relevant plans, policies, and strategies at the national, regional or local level.
- 2.4.3 In addition, the section also provides an overview of the prevailing economic situation over the monitoring period together with information on progress on key Supplementary Planning Guidance (SPG). Where appropriate, any potential implications for the LDP have been identified. Contextual information which is specific to a particular LDP policy area is provided in the relevant policy analysis section for ease of reference and is therefore not repeated here.

2.5 LEGISLATIVE CHANGES

PLANNING (WALES) ACT 2015

- 2.5.1 The Planning (Wales) Act received Royal Assent in July 2015 and came into force in stages between October 2015 and January 2016. As well as a series of legislative changes to deliver reform of the planning system in Wales, the Act introduced a legal basis for the preparation of a National Development Framework (NDF) and Strategic Development Plans (SDP). The NDF known as 'Future Wales' is a national land use plan that sets out Welsh Government's policies in relation to the development and use of land in Wales and SDPs are intended to address cross boundary issues at a regional level on issues such as housing, employment, transport, and waste (see Section 2.6).

IMPLEMENTATION OF SCHEDULE 3 OF THE FLOOD AND WATER MANAGEMENT ACT 2010: THE MANDATORY USE OF SUSTAINABLE DRAINAGE SYSTEMS (SUDS)

- 2.5.2 From the 7th January 2019, all new developments of more than 1 dwelling house or where the construction area is 100 square metres or more, require a sustainable drainage system (SuDS) for surface water. The SuDS must be designed and built in accordance with Statutory SuDS Standards as published by the Welsh ministers and SuDS schemes must be approved by the local authority acting as the SuDS Approving Body (SAB), before construction work commences.
- 2.5.3 Implementing SuDS compliant with the statutory standards for all new development will contribute directly to delivering:

- Well-being Goals for cohesive, resilient, and healthier communities, consistent with the duties on public bodies under the Well-being of Future Generations (Wales) Act 2015;
- Sustainable development, consistent with duties on planning authorities under the Planning (Wales) Act 2015; and
- Biodiversity enhancement, consistent with duties on public bodies under the Environment (Wales) Act 2016.

THE LOCAL GOVERNMENT AND ELECTIONS (WALES) ACT (2021)

2.5.4 The Local Government and Elections (Wales) Bill [the Bill] was passed by the Senedd on 18th November 2020 and received Royal Assent on 21st January 2021. The Bill covers a range of topics from electoral reform, public participation, governance, and performance through to regional working.

2.5.5 In respect of land use planning, the Act makes provision for the establishment of Corporate Joint Committees (CJCs) to exercise certain local authority functions on a collaborative basis through Strategic Development Plans (SDPs) as well as regional transport planning and economic development strategies.

THE TOWN AND COUNTRY PLANNING (STRATEGIC DEVELOPMENT PLAN) (WALES) REGULATIONS 2021

2.5.6 The Town and Country Planning (Strategic Development Plan) (Wales) Regulations 2021 establish the procedural requirements for the preparation, monitoring, and review of SDPs.

2.5.7 The SDP Regulations reflect the main stages of plan preparation and review requirements outlined in the LDP Regulations and provide details about the key stages, procedures and consultation arrangements that must be followed by CJCs when preparing an SDP. They set out the requirements for the preparation, examination, monitoring and revision of SDPs and associated matters. The regulations also set out the provisions for the content, availability, and publication of documents. The Regulations were laid before the Senedd in March 2021 and came into force on 28th February 2022.

A MORE EQUAL WALES – THE SOCIO-ECONOMIC DUTY (2021)

2.5.8 The Socio-economic Duty is a legal requirement under the Equality Act 2010 that came into force in Wales on the 31st March 2021. The Duty requires specified public bodies to consider how their decisions might help to reduce the inequalities associated with socio-economic disadvantage when making strategic decisions.

2.5.9 This includes considering how policies, programmes and services can reduce inequalities and promote social inclusion. As the Duty applies to strategic policy development, it is relevant to the RLDP.

THE CLIMATE CHANGE (WALES) REGULATIONS 2021

- 2.5.10 In December 2020, the Climate Change Committee published its progress report “Reducing Carbon Emissions in Wales”. This is the first report on Wales’ progress towards meeting its emission reduction targets, as required under Article 45 of the Environment (Wales) Act 2016.
- 2.5.11 The progress report and advice recognise the actions taken in Wales to reduce greenhouse gas emissions– including achieving some of the highest national recycling rates in the world, taking a proactive role in supporting the large-scale deployment of renewable energy generation, and integrating a response to the climate and nature emergency throughout its priorities for the reconstruction of the economy following the Covid-19 pandemic.
- 2.5.12 In February 2021, the Welsh Government announced its commitment to reaching net zero emissions by 2050 through the publication of The Climate Change (Wales) Regulations 2021 which came into force on the 19th March 2021. The Regulations establish the legal commitment to net zero carbon emissions by 2050.
- 2.5.13 The new Regulations form part of the wider statutory framework for the reduction of emissions in Wales, set out in Part 2 of the Environment (Wales) Act 2016, amending the previous set targets for 2030 and 2040 targets from 45% and 67% to 63% and 89% respectively.

2.6 NATIONAL PLANNING POLICY

FUTURE WALES- THE NATIONAL PLAN (2040)

- 2.6.1 On the 24th February 2021, the Welsh Government published *Future Wales: The National Plan 2040*, the Welsh Government’s national development framework. On publication, Future Wales came into force with immediate effect and now forms part of the development plan system in Wales and must be considered alongside Local Development Plans or extant Unitary Development Plans when determining planning applications, and in decision making.
- 2.6.2 A key objective of Future Wales is to ensure that the planning system supports the delivery of the Welsh Government’s strategic aims and policies such as those contained within the Welsh National Marine Plan, Llwybr Newydd The Wales Transport Strategy 2021, the Natural Resources Policy and Prosperity for All A Low Carbon Wales.
- 2.6.3 Future Wales builds on national planning policy set out in Planning Policy Wales and outlines the Welsh Government’s strategies for addressing key national priorities through the planning system. These include sustaining and developing a vibrant economy, providing quality development in the right places for the right reasons, achieving decarbonisation and climate-resilience, developing strong ecosystems, and improving the health and well-being of communities.
- 2.6.4 It sets out the development policies for Wales as a whole and for three national growth areas: Wrexham and Deeside (North Wales), Swansea Bay and Llanelli (Mid

and South West Wales) and Cardiff, Newport, and the Valleys (South East Wales). The Vale of Glamorgan falls within the South East Wales growth area, which is consistent with the Cardiff Capital Region and aligns with proposed Strategic Development Plan (SDP) areas for the regions identified.

- 2.6.5 Other key areas considered within Future Wales include priorities for the delivery of new affordable housing, a requirement to identify new Green Belts in the South East Wales and North Wales regions (to be identified through SDPs), national policy objectives for renewable and low carbon energy generation, and a commitment to strengthening town centres through a town centre first approach for retail and other town centre uses.
- 2.6.6 In line with Welsh Government guidance, the RLDP shall have regard to Future Wales and any implications for future AMRs shall also be reported.

PLANNING POLICY WALES 12TH EDITION (FEBRUARY 2024)

- 2.6.7 The latest iteration of Planning Policy Wales (Edition 12) was released by the Welsh Government on the 7th February 2024 with immediate effect. The release followed the earlier consultation, on revisions to Chapter 6 of PPW Distinctive and Natural Places. The main changes relate to:
- **Green Infrastructure:** stronger emphasis on taking a proactive approach to green infrastructure covering cross boundary considerations, identifying key outputs of green infrastructure assessments, the submission of proportionate green infrastructure statements with planning applications and signposting Building with Nature standards.
 - **Net Benefit for Biodiversity and the Step-wise Approach:** further clarity is provided on securing net benefit for biodiversity through the application of the step-wise approach, including the acknowledgement of off-site compensation measures as a last resort, and, the need to consider enhancement and long-term management at each step. The use of the green infrastructure statement as a means of demonstrating the stepwise approach is made explicit. A simplified diagram of the policy approach has been developed (which will be further refined in the consolidated version of PPW12). The importance of strategic collaboration to identify and capture larger scale opportunities for securing a net benefit for biodiversity is recognised.
 - **Protection for Sites of Special Scientific Interest:** strengthened approach to the protection of SSSIs, with increased clarity on the position for site management and exemptions for minor development necessary to maintain a 'living landscape'. Other development is considered unacceptable as a matter of principle. Exceptionally, a planned approach may be appropriate where necessary safeguards can be secured through a development plan.
 - **Trees and Woodlands:** closer alignment with the stepwise approach, along with promoting new planting as part of development based on securing the right tree in the right place.
- 2.6.8 The revision to PPW will require an update to the Biodiversity and Development Supplementary Planning Guidance originally adopted by the Council in 2018.
- 2.6.9 In line with national guidance future LDPs must have regard to the revised PPW and Future Wales, alongside any implications these may have on AMRs.

LLWYBR NEWYDD THE WALES TRANSPORT STRATEGY 2021

- 2.6.10 ‘Llwybr Newydd: The Wales Transport Strategy 2021’ was published in March 2021 and sets out the Welsh Government’s strategic priorities for transport investment in Wales. The central aim of the strategy is to reduce the impact that transport has on climate change, setting a target for 45% of all journeys within Wales to be undertaken sustainably by 2040.
- 2.6.11 The overriding vision is for “*an accessible, sustainable and efficient transport system*” and the priority is to “*actively aim to achieve a shift away from private car use to more sustainable transport modes for the majority of journeys.*”
- 2.6.12 The three main priorities in the Strategy are to:
- Bring services to people in order to reduce the need to travel – which will mean an increase of local services;
 - Allow people and goods to move easily from door to door by accessible, sustainable, and efficient transport services and infrastructure and
 - Encourage people to make the change to a more sustainable transport option by making public transport more affordable and reliable.
- 2.6.13 The strategy will be supported by a 5-year investment programme to be set out in a National Transport Delivery Plan (NTDP) that shall set out the specific transport interventions to be financed by the Welsh Government, based on the priorities in Llwybr Newydd, the Wales Transport Strategy 2021, including the delivery of projects that are already underway.
- 2.6.14 Additionally, the Strategy also requires the establishment of Regional CJsCs that will oversee the preparation of Regional Transport Plans to be aligned with Future Wales – The National Plan 2040 and the emerging Strategic Development Plans (SDPs).

WELSH NATIONAL MARINE PLAN (WNMP)

- 2.6.15 The first WNMP was adopted by the Welsh Government on 12th November 2019 and sets out the Welsh Government’s policies for, and in connection with, the sustainable development of 32,000km² of sea and 2,120 km of coastline around Wales identified as the marine plan area. The WNMP takes a 20-year view and covers the inshore plan area from high water spring tides out to 12 nautical miles and the offshore plan area beyond 12 nautical miles.
- 2.6.16 The overarching objective of the WNMP is to support the sustainable development of the Welsh marine area by contributing across Wales’ well-being goals, supporting the sustainable management of natural resources through decision making and by taking account of the cumulative effects of all uses of the marine environment.
- 2.6.17 The plan contains policies on a wide range of sectors including aggregates, aquaculture, defence, dredging and disposal, energy (low carbon and oil and gas), fisheries, ports and shipping, subsea cabling, surface water, waste treatment and disposal and tourism and recreation.

- 2.6.18 The statutory requirement to consider marine policy documents comes from the Marine and Coastal Access Act (MCAA) 2009 which amends the Planning Act. Under Section 58 (1) of the MCAA, Local Planning Authorities must take any authorisation or enforcement decision in accordance with the appropriate marine policy documents, unless relevant considerations indicate otherwise. If a public authority takes an authorisation or enforcement decision other than in accordance with the appropriate marine policy documents, the public authority must state its reasons.
- 2.6.19 Additionally, the scope of the WNMP and the MCAA is wider than the planning division. The Council must therefore have regard to the WNMP when making relevant decisions (Section 58 (3) of MCAA).

THE NATIONAL STRATEGY FOR FLOOD AND COASTAL EROSION RISK MANAGEMENT IN WALES

- 2.6.20 In line with the Flood and Water Management Act (2010), Welsh Government has produced its second national strategy on flood and coastal erosion risk management (FCERM) (October 2020). The strategy sets out how the Government intends to manage the risk and sets objectives and measures for all partners for the next ten years. Future LDPs will need to recognise the risk and provide a policy framework which looks to prevent exposure to risk which will be informed by the Wales Flood Map.

PROSPERITY FOR ALL: A LOW CARBON WALES (MARCH 2019)

- 2.6.21 This Plan sets out the Welsh Government's approach to cutting emissions and increasing efficiency in a way that maximises wider benefits for Wales, ensuring a fairer and healthier society. It sets out policies and proposals that seek to directly reduce emissions and support the growth of the low carbon economy. Of relevance to planning are targets and policies introduced in relation to:

- Energy;
- Transport;
- Buildings;
- Industry;
- Land Use, Land Use Change and Forestry;
- Agriculture; and
- Waste Management

BUILDING BETTER PLACES: THE PLANNING SYSTEM DELIVERING RESILIENT AND BRIGHTER FUTURES (JULY 2020)

- 2.6.22 This document sets out the Welsh Government's planning policy priorities to assist in taking action in the recovery period after the COVID 19 pandemic crisis. It emphasises that the planning system should be centre stage in the consideration of the built and natural environmental issues that have arisen from this situation.

SMARTER WORKING: A REMOTE WORKING STRATEGY FOR WALES (MARCH 2022)

- 2.6.23 The COVID-19 pandemic accelerated the move to remote working and made employees and businesses think about how and where they work. The strategy outlines the Welsh Government's approach to achieving 30% of the Welsh workforce working at or near home and sets out the economic, social, environmental, and cultural benefits of remote working, and explains how the Welsh Government plans to embed remote working for the long-term in the Welsh workplace.

2.7 TECHNICAL ADVICE NOTES (TANS)

TAN 1: JOINT HOUSING LAND AVAILABILITY STUDIES (JANUARY 2015)

- 2.7.1 This TAN was revoked in its entirety as a consequence of the policy change to PPW on the 26th March 2020 which removed the five-year housing land supply policy and replaced it with a policy statement making it explicit that the housing trajectory, as set out in adopted LDPs, would be the basis for monitoring the delivery of development plan housing requirements.

TAN 11: NOISE

- 2.7.2 The Welsh Government has issued a call for evidence to support a review of TAN11: Noise, to incorporate Air Quality and Soundscape. The revised TAN will be expanded to include guidance on air quality and soundscape. Responses to the consultation were due by 4th May 2020.

TAN 15: FLOODING

- 2.7.3 In October 2019, the Welsh Government issued a revised draft TAN 15 in relation to flooding and coastal erosion. The new TAN was accompanied by the Flood Map for Planning, which built on the Flood Risk Assessment Wales map and included allowances for climate change.
- 2.7.4 However, on 23rd November 2021, the Minister for Climate Change stated that the new TAN 15 was to be paused until 1st June 2023. The pause provides an opportunity to build resilience, to develop detailed plans, to prioritise local authority activities to meet the challenges posed by the climate emergency and to build the necessary capability to do so. During the pause period, the existing policy framework of PPW, TAN 15 and the Development Advice Map along with TAN 14 remains in place. However, the Minister also advised that all local authorities need to review their Strategic Flood Consequence Assessment by 30th November 2022, and this is currently being prepared regionally by consultants. The results of the SFCA will inform the emerging RLDP and local flood risk policies. For development plans under review, the Minister has also confirmed that site allocations must be in accordance with the new TAN 15 and the Flood Map for Planning. A further consultation on the draft TAN which sought to introduce an increased element of flexibility in the guidance to allow for appropriate regeneration and redevelopment took place

between January and April 2023. Following the consideration of responses, it is currently anticipated that the final TAN 15 will be published later in 2024.

2.8 PLANNING GUIDANCE

DEVELOPMENT PLAN MANUAL (EDITION 3) (MARCH 2020) (DPM)

- 2.8.1 The DPM is a reference document for practitioners who are responsible for, or contribute to, the preparation and implementation of development plans. It contains practical guidance on how to prepare, monitor and revise a development plan, underpinned by robust evidence to ensure that plans are effective and deliverable and contribute to placemaking, as defined in national policy set out in PPW.
- 2.8.2 The revised DPM has been written in the context of current national policy and legislation, the Planning and Compulsory Purchase Act 2004, the Planning (Wales) Act 2015 and associated Regulations (The Town and Country Planning (Local Development Plan) (Wales) Regulations 2005 (as amended 2015)). It will be updated to ensure best practice and policy changes are embedded in a timely manner. This will be particularly important to respond effectively to updates to national planning policy set out in PPW and Future Wales, SDPs, and related Local Development Plan Lites (LDPLs) as they come forward.
- 2.8.3 The main changes in the DPM affecting the AMR stem from the removal of the five-year housing land supply policy and its replacement with a policy statement making it explicit that the housing trajectory, as set out in adopted LDPs, will be the basis for monitoring the delivery of development plan housing requirements.

PLACEMAKING CHARTER (SEPTEMBER 2020)

- 2.8.4 The aim of the Placemaking Charter is to strengthen the focus on Placemaking in policy and practice in Wales. The Charter outlines six placemaking principles that cover the range of considerations that contribute to establishing and maintaining good places. These include:
- People and Community
 - Movement
 - Public Realm
 - Location
 - Mix of uses
- 2.8.5 The Charter has been developed in collaboration with the Placemaking Wales Partnership which is made up of stakeholders representing a wide range of interests within the built and natural environment.
- 2.8.6 The Vale of Glamorgan has recently become a signatory to the Placemaking Charter.

3. NATIONAL, REGIONAL & LOCAL CONTEXT

3.1 NATIONAL INFLUENCES

BREXIT

- 3.1.1 The UK formally left the European Union (EU) on the 31st January 2020 and entered an 11-month transition or implementation period which ended on the 31st December 2020. Since the 1st January 2021, the UK has no longer been part of the EU single market or the EU customs union.
- 3.1.2 Following the end of the transition period, the Trade and Cooperation Agreement negotiated by the EU and the United Kingdom entered into force provisionally on the 1st January 2021 after all 27 member states approved the Agreement and its provisional application. On 27 April 2021, the European Parliament also voiced its approval meaning the Agreement was able to enter into force fully on 1 May 2021.
- 3.1.3 While the longer-term implications of the UK departure from the EU and the COVID 19 pandemic still remain largely unknown, most economists are in general agreement that in the short term at least, the UK economy will slow or possibly go into decline. As the Welsh economy largely tracks that of the wider UK, it is most unlikely that Wales will escape the economic fallout from the 2016 Brexit decision. New trading arrangements between the UK and the EU have already seen disruption and difficulties for many businesses across the UK, particularly those in sectors that depend on fast, seamless border processes such as agriculture and fisheries, automotive and aerospace manufacturing.
- 3.1.4 Additionally, the policy, legal and financial framework for the natural resources in Wales is intrinsically linked to the EU operating framework and are some of the areas likely to be most impacted by the UK withdrawal from the EU.

COVID-19 PANDEMIC

- 3.1.4. While the significant social and health impacts of the Covid-19 pandemic are now largely behind us, it is evident that the pandemic has influenced the way people work, travel, shop, socialise and use open green spaces and the urban environment and that the impacts of the pandemic have been extensive.
- 3.1.5. In September 2020, the Council published its Coronavirus Recovery Strategy¹, highlighting the social, economic and well-being impacts that the pandemic has had on communities and setting out its key priorities and objectives, to be implemented through the Council's Annual Delivery Plans. Of note to the current LDP review is the focus on green economic growth, employment, and infrastructure; addressing housing need including reducing homelessness; promoting active travel, embracing homeworking and improving public spaces and the public realm. These themes are likely to be reflected in the RLDP as well as the wider role that planning can have in assisting in the recovery.

¹ <https://www.valeofglamorgan.gov.uk/Documents/Committee%20Reports/Cabinet/2020/20-09-21/Coronavirus-Recovery-Strategy.pdf>

- 3.1.6. Furthermore, the Welsh Government has published planning guidance to aid in the recovery from the impacts of Covid-19 entitled Building Better Places – The Planning System Delivering Resilient and Brighter Futures: Placemaking and the Covid-19 Recovery (2020). This guidance starts to identify actions to achieve Covid-19 recovery and areas which must be built upon, and developed in future reviews of Planning Policy Wales, such as the role of development management and its role in “creating healthy, thriving active places with a focus on a positive, sustainable future for our communities” (p.9, 2020 refers).
- 3.1.7. Whilst the monitoring data collected during the period 2022-23 may provide an insight into the immediate impacts that lockdown restrictions during the pandemic have had on economic activity, such as employment and retail, further examination of the long-term impacts will be required as part of the RLDP process.

RUSSIAN INVASION OF UKRAINE

- 3.1.8. The Russian invasion of Ukraine in February 2022 and the subsequent sanctions placed on Russia continue to have an impact on the world economy. While the UK has few direct links to Russia, the global impact of the invasion to the energy, commodities and financial markets has meant that the UK and European economies have not escaped the impacts of the conflict and increases in energy and fuel costs have impacted on businesses throughout the UK and contributed to rising inflation which has had a major impact on the UK economy particularly affecting consumers and businesses.

2021 CENSUS

- 3.1.9. The UK census takes place every ten years and provides the most accurate estimate of all people and households in England and Wales. The census contains questions about individuals and households and helps build a detailed picture of UK society and information from the census helps central government and local authorities across the UK to plan and fund local services and service provision. The census provides key data for development plans, including the release of population and household estimates.
- 3.1.10. The census is conducted by the office of National Statistics (ONS) and the release of results commenced on June 28th, 2022, and included rounded population and household estimates for local authorities in Wales by sex and five-year age groups.
- 3.1.11. Subsequent releases from October 2022 have included data and analyses covering the range of topics including new questions on sexual orientation, gender identity and previous service in the UK Armed Forces and information about the population’s Welsh language ability. Information from the 2021 census continues to be released by the ONS. In addition, the rebased mid-year population estimates were published in November 2023, which seek to align the population estimates between 2012 and 2021 with the 2021 Census.

3.2 REGIONAL CONTEXT

STRATEGIC DEVELOPMENT PLAN AND CORPORATE JOINT COMMITTEES

- 3.2.1. Part 3 of the Planning (Wales) Act 2015 provides the legislative framework to bring forward an SDP to deal more effectively with cross boundary planning issues. The Regulations make reference to three potential strategic planning areas including South East Wales, the Cardiff Capital Region which comprises the 10 Local Authorities in the South East Wales region namely: Blaenau Gwent, Bridgend, Caerphilly, Cardiff, Merthyr Tydfil, Monmouthshire, Newport, Rhondda Cynon Taff, Torfaen, and the Vale of Glamorgan.
- 3.2.2. An SDP for the south-east Wales region will complement the City Region approach and will provide an opportunity to incorporate the City Region work into the planning system. SDPs must be in general conformity with Future Wales and local planning authorities in an area covered by an SDP must have regard to it when developing their LDPs. Where an SDP covers an LDP administrative area, Local Planning Authorities s will only be required to produce a 'light' LDP for the part of their area already covered by the SDP.
- 3.2.3. The Local Government and Elections (Wales) Act 2021 ("the LGE Act") created the framework for a consistent mechanism for regional collaboration between local government, namely Corporate Joint Committees (CJCs). The Act provides for the establishment of CJCs through Regulations. Regulations creating four CJCs in Wales ("the Establishment Regulations") were made on 17 March 2021 and the following CJCs were established on 1 April 2021:
- The North Wales Corporate Joint Committee
 - The Mid Wales Corporate Joint Committee
 - The South East Wales Corporate Joint Committee
 - The South West Wales Corporate Joint Committee
- 3.2.4. The four CJCs have functions relating to strategic development planning and regional transport planning. They are also able to undertake actions to promote the economic well-being of their areas. Legislation enabling the formation of CJCs in Wales was published in July 2022.
- 3.2.5. A draft SDP Manual was prepared by WG and circulated to all LPAs for comment in Autumn 2022. A formal consultation on a revised SDP Manual is scheduled for later in 2024. Work is due to progress on the preparation of a Delivery Agreement for the SDP, which must be submitted to WG by the end of December 2024. The DA marks the formal start of SDP preparation. It is not anticipated that the SDP will be adopted until 2030 at the earliest.

CARDIFF CAPITAL REGION CITY DEAL

- 3.2.6. The Cardiff Capital Region City Deal is a unique programme of collaborative working committed to being the catalyst for regional growth and sustainable success. The deal represents the joint commitments made by the ten local authorities of the Cardiff Capital Region (CCR), the UK Government and the Welsh Government to unlock £1.2bn of collective investment. It is designed to build on the region's sectoral strengths, its high skill base and three successful

universities and accelerate economic growth and productivity through a series of considered targeted investments in skills, infrastructure, innovation-led scalable projects and priority industry sectors and businesses.

- 3.2.7. Over its lifetime of 20 years the desired outcomes from its programmes of intervention (£734m of which is ring-fenced for Metro developments with the remaining £495m available through a wider investment fund) are to have delivered 25,000 new jobs, generated an additional £4bn of private sector investment into the region and increased GVA by 5%.
- 3.2.8. The £1.3 billion CCRC was formally ratified on the 1st March 2017 by the ten local authorities. Since the formal ratification, CCRC has developed work programmes and supported a number of investment projects across the region. In May 2021, the UK Government announced its approval of the next five years of funding for the Cardiff Capital Region City Deal, following a gateway review that highlighted "a number of significant successes across the deal to date".
- 3.2.9. The CCRC and any implications for the RLDP will be given due consideration in subsequent AMRs where appropriate.

CCR REGIONAL ECONOMIC INDUSTRIAL PLAN 2023-2028

- 3.2.10 Cardiff Capital Region seeks to foster a regional economy that is bigger, fairer and greener, generating good growth and creating conditions for shared prosperity across the ten local authorities in the region and the regional Economic and Industrial Plan has been prepared to support these objectives. The Plan identifies several challenges but seeks to achieve the ambition of being "a proud Cardiff Capital region where everyone is connected locally and globally, enjoying work, business and life opportunities that make us the place to fulfil potential."
- 3.2.11 The Plan identifies three areas of focus – Becoming More Competitive More Connected and Becoming More Resilient. As part of the Becoming More Competitive themes, specific reference is given to growing the green economy through innovation initiatives centred on green technologies and future skills, with specific reference to the development of a Green Energy Park at Aberthaw. The RLDP will have a role in facilitating land and developing appropriate policies that would support the objectives and projects within the Plan.

SOUTH WALES METRO

- 3.2.12. One of the objectives of the Cardiff Capital Region (CCR) is to connect communities, business, jobs, facilities, and services in the area. The CCR Transport Authority has been established as a sub-committee by the CCR Cabinet, to work closely with the Welsh Government, Transport for Wales, and others, to facilitate the City Deal by coordinating transport planning and investment across the region.
- 3.2.13. One of the main priorities with regards to improved transportation is the delivery of the South Wales Metro. £734 million of the City Deal fund has been pre-

allocated for the project, which will be split between the Valley Lines Electrification programme and the wider South Wales Metro scheme.

- 3.2.14. The South Wales Metro is a major infrastructure project and signals an ambitious 'modal shift' in connecting people and places and enhancing the functional economic geography of the region. It represents forward thinking on the future of mobility and its mission is to provide contemporary public transport that will promote behavioural change.
- 3.2.15. The Barry Town Centre Gateway Regeneration project identified the need to comprehensively regenerate land in the vicinity of Barry Docks Railway Station, which is an important gateway to the town centre and Waterfront. As part of the Metro Plus programme, a £50 million programme of schemes, developed with the Regional Transport Authority (RTA) to support the implementation of the South Wales Metro, the Barry Transport Hub was completed in June/July 2023 and provides a planned bus interchange, additional park and ride capacity, improve connectivity with the town centre and has created a modern well-designed arrival point.
- 3.2.16. The future implications of the metro proposals will therefore be monitored and be given due consideration in future AMRs where appropriate.

REGIONAL TECHNICAL STATEMENT FOR AGGREGATES (2020)

- 3.2.17. The Regional Technical Statement (RTS) has been produced by the South Wales Regional Aggregates Working Party (SWRAWP). Minerals TAN 1 (paragraph 1.45 refers) sets an overarching objective, which seeks to ensure a sustainably managed supply of aggregates essential for construction by striking the balance between environmental, economic and social costs. The RTS has been formulated to help guide individual Local Authorities in South Wales on how to implement these mineral planning policies in the formulation of their individual LDP policies and allocations.

3.3 LOCAL CONTEXT

THE VALE OF GLAMORGAN CORPORATE PLAN 2020-2025

- 3.3.1 The Vale of Glamorgan Corporate Plan is the Council's key strategic document and sets out the framework for the various activities the Council undertakes. It seeks to deliver a wide range of outcomes measured against the plan's 4 well-being objectives:
- To work with and for our communities
 - To support learning, employment, and sustainable economic growth
 - To support people at home and in their community
 - To respect, enhance and enjoy our environment

3.3.2 For each objective, the plan sets out the actions that will be taken over the 5 years and includes aspects relevant to land use planning which will influence and direct the focus of the Replacement LDP and includes:

- Improving well-being, promoting active and sustainable transport;
- Supporting economic growth through working as part of the Capitol City Region, regeneration, improving infrastructure and supporting town centres, tourism, and industry;
- increasing the supply of good quality affordable housing;
- reducing carbon emissions and minimising the impact on the environment;
- ensuring that developments are sustainable, mitigate their impact and integrate with local communities and provide the necessary infrastructure;
- protect and enhance the natural built environment and cultural heritage;
- minimise pollution, provide effective waste management and reduce the impact of flooding.

THE VALE OF GLAMORGAN HOUSING STRATEGY 2021- 26

3.3.3 The Housing Strategy sets out the intentions of the Council and its partners to meet a wide range of housing objectives. The strategy includes a long-term vision for housing in the Vale where ‘All residents in the Vale of Glamorgan have access to good quality, suitable housing and can live happily and independently in vibrant, sustainable communities’. The vision is underpinned by four key aim which form the framework within which action will be taken.

- Aim 1: More Homes, More Choice
- Aim 2: Improved homes and communities
- Aim 3: Better housing advice and support
- Aim 4: Equality of access to housing and housing services

The Strategy is accompanied by a delivery plan, which is set over the same period as the strategy. The delivery plan outlines a range of actions developed by the Council and its partners, under each of the 4 aims.

THE VALE OF GLAMORGAN OLDER PERSONS STRATEGY

3.3.4 The Council’s Older Persons Housing Strategy ‘Creating Homes and Neighbourhoods for Later Life 2022-36’ sets out a vision in the Vale of Glamorgan Council which is: ‘to secure the best quality of life for older people to live as independently as possible in later life. This means delivering a range of accommodation that enables older people to live fulfilling lives and enjoy good health in attractive homes that meet their needs and allow them to retain their independence as they age’.

3.3.5 The strategy projects that by 2037 there will be a need for some 1,357-specialist age designated housing, retirement housing (for social rent and for sale) and housing with care (extra care housing for social rent and for sale). Highlighting the importance for the Council and its partners to address future housing needs associated with an aging population through the provision of appropriate housing solutions arising from a growing older population. The strategy identifies a range of mechanisms for delivery including the LDP which is seen to have a key

role in encouraging private and social housing providers to develop a range of mainstream housing that is suited and attractive to older people.

LOCAL HOUSING MARKET ASSESSMENT (2023)

- 3.3.6 All local authorities in Wales are required to carry out a Local Housing Market Assessment (LHMA) every two years. The LHMA provides an assessment of the current housing market in the authority. The latest 2023 LHMA was considered by Cabinet on the 23rd May 2024 (Minute C9 refers). The 2023 replaces the previous LHMA (2021) and has been prepared utilising a new LHMA tool which seeks to ensure LHMA's are prepared in a consistent way across local authorities. The tool allows users to run a number of scenarios to determine need, including forecasting future need based on the level of household formation set out on the latest WG principal household projections (2018-based) as well as the projections that inform the RLDP.
- 3.3.7 The principal projection scenario provides annual need figures for the first 5 years, where it is assumed that the existing backlog of existing need will be met, as well as the remaining 10 years, which relates to newly arising need. Based on these figures, there is a need for:
- 1,075 new affordable homes per annum for the first 5 years (687 social rented and 388 intermediate)
 - 154 new affordable homes per annum for the following 10 years.
- 3.3.8 The LHMA informs the LDP and provides evidence for the need for affordable housing in the Vale of Glamorgan. Operationally, it also provides a tool to negotiate affordable housing provision on planning applications, allocate Social Housing Grant and inform strategic housing priorities at the local level. The LHMA is prepared in accordance with Welsh Government guidelines and will form a key consideration in the LDP review and future AMRs.

GYPSEY AND TRAVELLER ACCOMMODATION ASSESSMENT

- 3.3.9 The Council's latest Gypsy and Traveller Accommodation Assessment (GTAA) was completed in June 2022 having been delayed due to the Covid-19 pandemic. In accordance with section 102 of the Housing (Wales) Act 2014, the GTAA was submitted to the Welsh Government for approval on the 21st April 2023 and formally approved by the Welsh Government on the 19th June 2024. The GTAA identifies a shortfall of 9 pitches to 2026 with a further 2 pitches being required by 2036 equating to a total need of 11 pitches over the RLDP period.
- 3.3.10 Notwithstanding this, recent approvals for sites at Brocastle (3 pitches) and Twyn Yr Odyn (1 pitch) have reduced the identified need to 7 pitches. The new GTAA will form part of the evidence base for the RLDP. A regional working group comprising representatives of the South East Wales local authorities has also been established to investigate the need for a regional gypsy and traveller transit site or sites. This work remains ongoing, and the findings will inform the emerging RLDP in due course.

VALE OF GLAMORGAN WELL-BEING PLAN 2023-28

3.3.11 As part of the requirements of the Well-being of Future Generations Act the Council, together with public sector partners as the Vale of Glamorgan Public Services Board (PSB), has prepared its 2nd Well-being Plan for the Vale, informed by a Well-being Assessment. The Well-being Plan encompasses the 7 well-being goals and provides a framework for all public sector bodies to deliver the Sustainable Development Principle through adopting the 5-ways of working.

3.3.12 The new Well-being Plan sets out three new Well-being Objectives and the priority areas that the PSB will be focusing on, and Objectives reflect the key issues and key challenges identified by the Vale of Glamorgan Well Being Assessment:

- A more resilient and greener Vale
- A more active and healthier Vale
- A more equitable and connected Vale

3.3.12 To deliver these objectives, the Well-being Plan has identified 3 priority workstreams within which collaboration will be focussed:

- Responding to the climate and nature emergencies
- Working with the people who live in our communities that experience the highest levels of deprivation
- Becoming an Age Friendly

PROJECT ZERO- VALE OF GLAMORGAN COUNCIL CLIMATE CHANGE CHALLENGE PLAN 2021-2030

3.3.13 In February 2020, the Council signed a Climate Emergency Charter with the Vale Public Services Board (PSB) and this sets out the PSB's shared commitment to lead by example, take positive action and to reduce our impact on climate change.

3.3.14 Project Zero is the Vale of Glamorgan Council's response to the climate change emergency. Project Zero brings together the wide range of work and opportunities available to tackle the climate emergency, reduce the Council's carbon emissions to net zero by 2030 and encourage others to make positive changes. The strategy highlights the role the LDP and SPG plays in contributing to the climate change commitment through for example securing planning contributions towards sustainable transport schemes and through implementation of policies that encourage renewable energy.

CARDIFF AIRPORT AND BRO TATHAN ENTERPRISE ZONE

3.3.15 The Cardiff Airport and Bro Tathan Enterprise Zone was designated by the Welsh Government in 2013. It comprises of three distinct zones: Cardiff Airport, Bro Tathan aerospace business park and the Gateway Development Zone. The enterprise zone seeks to build upon and extend the aerospace and maintenance sector that has developed in and around the airport and the MOD base at St Athan and provides an unprecedented opportunity for Wales to both contribute to and take advantage of the competitiveness of the UK in a growing business sector.

- 3.3.16 The Cardiff Airport and St Athan Enterprise Zone is referred to in policies SP2, MG9 and MG10 of the LDP and is a key element in the Plan's strategy. It will assist in the delivery of significant aviation related economic growth not only in the Vale of Glamorgan but also in the wider Cardiff Capital Region.
- 3.3.17 Brief summaries of the ongoing success and status of the Cardiff Airport and St Athan Enterprise Zone are provided below and all elements of the Enterprise Zone will continue to be monitored and assessed in future AMRs to inform the emerging RLDP.

BRO TATHAN AEROSPACE BUSINESS PARK

- 3.3.18 The Bro Tathan Aerospace Business Park is already home to state-of-the-art workshops, hangars, and other buildings alongside development land with airside access which is ideal for a range of civilian or military uses including Maintenance Repair and Overhaul (MRO), manufacture, engine overhaul, Non-Destructive Testing (NDT) and Research and Development.
- 3.3.19 In February 2016, the Bro Tathan Aerospace Business Park fought off competition from more than 20 worldwide locations to secure Aston Martin Lagonda (AML) as its next occupant. The new manufacturing facility was officially opened by the Welsh First Minister on the 6th December 2019 and Bro Tathan is the company's sole production facility for of Aston Martin's first SUV, the DBX. Full production capability was scheduled to commence in the 2nd quarter of 2020. However, the COVID 19 pandemic has had a significant impact on production and sales. Originally the manufacturing facility was anticipated to create up to 750 jobs at peak production. However, it is understood that around 200 redundancies were made during the pandemic due to falling sales. Notwithstanding this, the first Aston Martin DBX707 customer car rolled off the production line in early 2022 and the company announced that it had hired 100 new technicians to work on the first Welsh built production car in almost 50 years.
- 3.3.20 The business park is an essential element of the Welsh Government's aspirations for the enterprise zone. The business park continues to attract investment and create jobs with firms such as Caerdav and eCube expanding within the specialised aviation sector. The Northern Access Road (NAR) has been completed and provides a high-quality direct access for new and existing businesses at the site. In addition, to support the continuing development at the Aerospace Business Park, the Welsh Government is currently working in conjunction with the Council to adopt a development brief to guide development proposals at the Y Porth site. This 6.7-hectare site is located on the north and south sides of the eastern end of the new NAR and marks a crucial point of arrival at the business park. The Bro Tathan site has been the subject of several planning applications for development over its 1,200 acres, ranging from hotels, showrooms retail facilities, offices, and conferencing, to major mixed use large factories, aircraft hangars and training facilities. Planning permission for a new data centre was approved in June 2024.

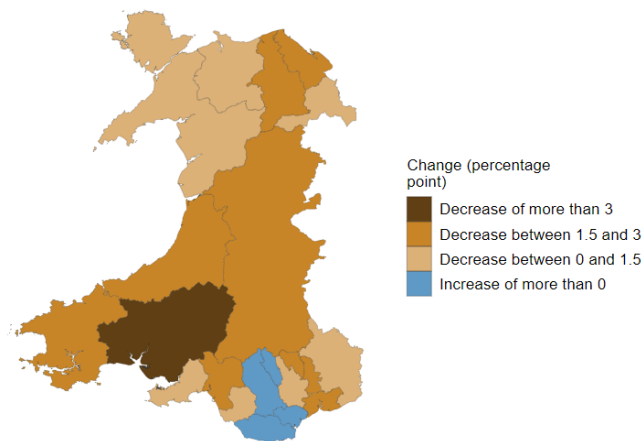

CARDIFF AIRPORT

- 3.3.21 The LDP Strategy recognises the importance of Cardiff Airport to the future prosperity of the Vale of Glamorgan, as does its designation (along with St Athan) as part of the Cardiff Airport and Bro Tathan Enterprise Zone.
- 3.3.22 The airport plays an important role both as an international gateway and as a major driver within the Welsh economy. Since its acquisition by the Welsh Government in 2013 the airport has increased its passenger numbers by over 65%. However, the Covid 19 pandemic and associated travel restrictions had a significant impact on passenger numbers. Passenger numbers in 2020 were just under 220 000, and in 2021 were 123,000 a decrease of 44% compared to 2020. In 2022 passenger numbers recovered well to 857,397 (arrivals and departures) but remained well below pre-pandemic levels of circa 1.4 million (2019).
- 3.3.23 The Council adopted the Cardiff Airport & Gateway Development Zone Supplementary Planning Guidance (SPG) on 16th December 2019 which will guide future development on the site. An outline planning application (2019/00871/OUT refers) in relation to the allocated employment land south of Port Road comprising 44.75 hectares of B1, B2 and B8 business park, associated car parking, drainage infrastructure, biodiversity provision and ancillary works together with a country park extension was approved on 14th July 2021. However, this planning permission was quashed on the 6th October 2021 when the Court Order by HHJ Jarman QC, confirmed the application for permission for judicial review was granted. The planning application has been returned to the Council for re-consideration but is currently subject to a holding direction from Welsh Government.

WELSH LANGUAGE

- 3.3.24 The latest 2021 Census indicates that all local authorities in Wales except for Cardiff, the Vale of Glamorgan, Rhondda Cynon Taf and Merthyr Tydfil saw a decrease in the percentage of people aged three or older able to speak Welsh. The census indicates that for the Vale of Glamorgan for people aged 3 or over, 13.3% can either speak, read or write Welsh, 3.5% can understand spoken Welsh and 83.25 have no Welsh language skills whatsoever.

FIGURE 2: CHANGE IN THE PERCENTAGE OF PEOPLE AGED THREE YEARS OR OLDER ABLE TO SPEAK WELSH BY LOCAL AUTHORITY, 2011 TO 2021.

Source: Welsh Government: Welsh language in Wales (Census 2021) 6th December 2022.

3.3.25 The RLDP will enable the Council to assess the potential cumulative effects of the Plan on the Welsh language in the area through the use of a Welsh Language Impact Assessment (WLIA) in accordance with Technical Advice Note 20 Planning and the Welsh Language (October 2017). The WLIA will be considered as part of the Integrated Sustainability Appraisal work.

SUPPLEMENTARY PLANNING GUIDANCE

3.3.26 A number of new / updated SPG documents that support key policy areas of the LDP have been approved by the Council since the adoption of the LDP. These are as follows:

- Affordable Housing
- Biodiversity and Development
- Cardiff Airport and Gateway Development Zone
- Conversion and Renovation of Rural Buildings
- Economic Development, Employment Land and Premises
- Minerals Safeguarding
- Parking Standards
- Planning Obligations
- Public Art in New Development
- Renewable Energy
- Residential and Householder Development
- Retail and Town Centre Development
- Tourism and Development
- Trees, Woodland, Hedgerows and Development
- Economic Development, Employment Land and Premises
- Retail and Town Centre Development

3.4 GENERAL ECONOMIC TRENDS

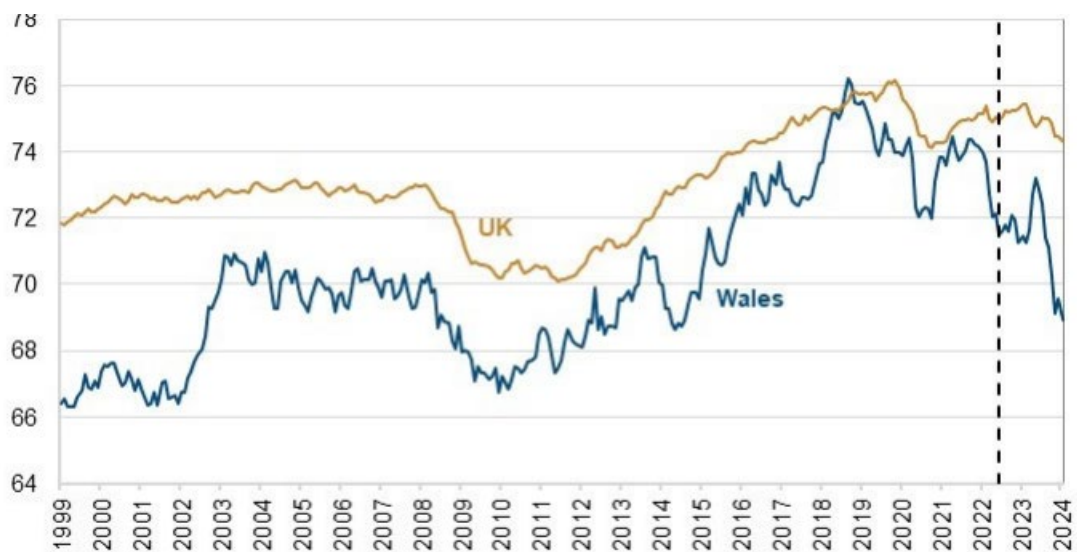

ECONOMIC ACTIVITY

- 3.4.1 The Welsh Government produces monthly Statistical Bulletins which bring together the latest key statistics relating to the Welsh economy and labour market. The Statistics Bulletin June 2024 (SB 21/2024) bulletin includes data for the three months February to April 2024 and brings together the latest key statistics relating to the Welsh labour market as well as the general economic activity data, the bulletin includes information on four national indicators as defined in the Well-being of Future Generations Act 2015.
- 3.4.2 The headline Labour Force Survey (LFS) estimates in the bulletin are published by the Office for National Statistics (ONS) in their Labour Market Statistical Bulletin which include headline figures for Wales as a whole. The bulletin provides a more detailed breakdown of the Wales data than the ONS bulletin and presents those estimates alongside other headline estimates for the economy and labour market for Wales. The LFS is a sample survey and, as such, estimates obtained from it are subject to sampling variability.
- 3.4.3 The information provided in the statistical bulletin includes data up to May 2024.

EMPLOYMENT:

- 3.4.4 The latest LFS indicates that there were 1.41 million people in employment in Wales in February to April 2024, down 16,900 (1.2%) from the same period a year earlier. This is a rate of 68.9% of those aged 16-64, which is down 1.3 percentage points on the previous quarter and down 2.5 percentage points on the previous year. This compares to a UK employment rate of 74.3% of those aged 16-64 which is 5.4 percentage points higher than the employment rate for Wales. The trend in employment rates have differed between Wales and the UK in recent periods, however the changes for Wales are not statistically significant and should be considered alongside the longer-term trend.

FIGURE 3: EMPLOYMENT RATE (PERCENTAGE OF POPULATION AGE 16-64) APRIL 1999 TO APRIL 2024

Source: WG Statistical Bulletin SB21/2024 (13 June 2024)

- 3.4.5 While the disaggregated ONS economic data prepared by 'nomis' is not directly comparable with the LFS data in the statistical bulletins, the most recent nomis data for the Vale of Glamorgan (January 2023 – December 2023) shows that 63,200 people were in employment in the Vale of Glamorgan (78.1%) which is 1.1% above the all Wales figure of 77.0%.²
- 3.4.6 In May 2024 15 of the 22 Welsh local authority areas saw an increase in the number of paid employees when compared with the same month in the previous year. Cardiff and Newport had the largest increases with both growing by 0.9%. The largest decrease over the same period was seen in Merthyr Tydfil (0.8%) (Pay As You Earn Real Time Information, HMRC).

FIGURE 4: PERCENTAGE CHANGE OF PAID EMPLOYEES PER LOCAL AUTHORITY, WALES, MAY 2023 TO MAY 2024

Source: WG Statistical Bulletin SB21/2024 (13 June 2024)

UNEMPLOYMENT

3.4.7 During February and April 2024, there were 50,400 unemployed people in Wales, a decrease of 21,300 compared to the same period a year earlier. This is a rate of 3.5% of the economically active population, down 0.6% from the previous quarter and down 1.3% compared to a year earlier. In comparison, there were 1.51 million unemployed people in the UK in February to April 2024, up 157,300 (11.6%) from the previous year. This is a rate of 4.4%, an increase of 0.5% compared to the previous year.

FIGURE 5: UNEMPLOYMENT RATE (PERCENTAGE OF ECONOMICALLY ACTIVE POPULATION)

Source: WG Statistical Bulletin SB28/2023 (13 July 2023)

3.4.8 The unemployment rate in Mid and South West Wales was 3.9%, a decrease of 0.4 percentage points over the year, in South East Wales the rate was 3.2%, a decrease of 0.6 percentage points and in North Wales the rate was 2.8%, a decrease of 0.4 percentage points (unrounded figures).

FIGURE 6: UNEMPLOYMENT RATE, ECONOMIC REGIONS, YEAR ENDING MARCH 2007 TO MARCH 2023

3.4.9 As with employment rates, the percentage of the economically inactive people within the Vale of Glamorgan mirrors the national picture and the nomis data indicates that between January and December 2023, 2,200 people (3.6 %) in the Vale of Glamorgan were unemployed, compared to the Welsh average of 3.7% and the U.K average of 3.7%.

HOUSING MARKET:

3.4.10 The full year Welsh Government housing statistics from StatsWales indicate a significant reduction of housing delivery during the period which is likely to be attributable to the impacts of the Covid 19 pandemic.

TABLE 2: NEW DWELLINGS STARTED

Year	Wales Housing Starts	Vale of Glamorgan Starts
2012/13	5,291	108
2013/14	5,786	330
2014/15	6,955	445
2015/16	6,708	843
2016/17	6,871	740
2017/18	6,037	688
2018/19	5,974	814

2019/20	6,224	747

Note: * This data is updated quarterly. Partial yearly figures referenced.

3.4.11 The latest HM Land Registry data (National Statistics UK House Price Index Wales: April 2024 (Published 19th June 2024) indicates that house prices in Wales increased by 0.4% in the 12 months to April 2024 with the average house price in Wales now being £208,000.

3.4.12 In Wales, 11 of the 22 local authority areas showed an increase in average house prices in the 12 months to April 2024. Gwynedd showed the highest annual percentage change, rising by 6.4% to £209,000 in the 12 months to April 2024. In contrast, Merthyr Tydfil showed the lowest annual percentage change, decreasing by 11.6% to £137,000 in the 12 months to April 2024. In the Vale of Glamorgan, for the year April 2023 to April 2024 the average price increase was 5.5% from £286,234 to £301,876.

RETAIL:

- 3.4.13 Although the UK economy staged a strong recovery from the global pandemic and subsequent energy crisis the national retail sector continues to face significant challenges. While high inflation rates of recent months have eased and inflation is now at the Bank of England target, household finances remain stretched by high interest and rates and mortgage costs and UK cost of living standards are likely to fall by 3.5% in 2024/25 (measured by real household disposable income) compared to pre-pandemic levels. Notwithstanding this, consumer confidence continues to improve, and the latest Deloitte Consumer Confidence Index³ shows a significant rise in consumer confidence since the last quarter of 2023 however, despite this increase, the index remains well below its long-term average indicating that consumers remain at the sharp end of the recent economic downturn.
- 3.4.14 In terms of the retail centres in the Vale of Glamorgan, this confidence would seem to be reflected in the most recent retail surveys of the Vales town and district retail centres within the LDP Retail Hierarchy (Policy MG12 refers) where vacancy rates have either decreased or remained static since the previous monitoring period. Similarly, the town and district centres have seen a decrease in the level of non-A1 uses within both the primary and secondary shopping frontages. The monitoring data also indicates that the Vale's local and neighbourhood retail centres would appear to be performing well given the current retail situation across Wales and the UK.
- 3.4.15 To reflect the need for flexibility in retail centres, the Welsh Government made temporary amendments to The Town and Country Planning (General Permitted Development) to provide greater flexibility for changes of use within town centres. This change in legislation allowed for the temporary change of use from A1 to A2, A3, B1, D1 and D2 within retail centres for a 6-month period up to 29th April 2022 without the need to receive planning consent from the Local Planning Authority. While this grace period has now expired, the exercise nonetheless illustrated that innovative changes could help town centres adapt in a changing retail environment. However, monitoring of the retail sector within the Vale of Glamorgan should continue to ensure that the health of the retail centres is maintained and is not further affected by wider economic factors.
- 3.4.16 In relation to local planning policy, LDP Policy MG14 (Non-A1 Retail Uses within Town and District Retail Centres) seeks to minimise the loss of A1 retail uses within centres. However, the retail sector in Wales is seeing a shift away from class A1 shops towards leisure (food, beverage, and entertainment) and services – reflecting the wider trend seen in England and Scotland as town centres evolve. Notwithstanding this, while the current picture within the Vale of Glamorgan shows variance particularly within the secondary frontages of the main town and district centres, the general picture remains similar to the previous AMR with class A1 provision within the retail centres remaining largely static. LDP Policy MG14 therefore does not reflect this new policy direction and the Council has prepared guidance in the form of a new draft retail SPG to help solve persistent vacancy issues and ensure local planning policy keeps afloat of the changing retail environment to maintain the

³ <https://www2.deloitte.com/uk/en/pages/consumer-business/articles/deloitte-consumer-tracker.html>
[The Deloitte Consumer Tracker Q1 2023 | Deloitte UK](#)

vitality, viability, and attractiveness of its retail centres. The emerging RLDP will consider the current retail picture within the Vale's retail centres and present a modified policy stance that will seek to further enhance the vitality and viability of the town and district retail centres.

3.4 CONTEXTUAL SUMMARY

- 3.4.17 The contextual information provided above has identified a range of new legislation and national, regional, and local plans, policies, strategies, and economic factors which have emerged since the adoption of the LDP and during subsequent LDP monitoring periods.
- 3.4.18 While many of the factors identified may have future implications for the delivery of the LDP, the contextual changes identified will be considered along with other background evidence as a part of the RLDP. Subsequent AMRs will also continue to provide updates on relevant contextual information which could affect the Plan's future implementation as well as the continuing impacts of the current COVID 19 pandemic.

4. LOCAL DEVELOPMENT PLAN AND SUSTAINABILITY APPRAISAL MONITORING FRAMEWORK

4.1 MONITORING FRAMEWORK

4.1.1 The monitoring framework comprises two key elements. Namely:

- The LDP strategy, policies, and proposals; and
- The SA which includes the requirements of the SEA Directive.

4.1.2 Section 5 provides a detailed analysis of the effectiveness of the LDP policy framework in delivering the identified policy aims / outcomes and targets, together with appropriate recommendations for further action. Consideration is also given to any significant policy specific contextual issues that have arisen over the monitoring period which could affect policy implementation. Aligned with the LDP monitoring framework, the analysis is grouped according to the Plan's monitoring framework and is structured in order of the relevant Plan objectives.

4.1.3 In order to enable the effective delivery of the LDP, the Council developed a set of targets and indicators against which the performance of the policies and development proposals can be measured. Many of the indicators include biannual targets or refer to appropriate target dates for specific developments / facilities to assess the performance of the Plan. The overall target for the Plan is to achieve the implementation of the LDP strategy.

4.1.4 The revised Development Plan Manual (March 2020) sets out the updated position regarding the core indicators and the monitoring framework has been amended to incorporate these. The monitoring framework also includes a range of local indicators which supplement the core indicators. The local indicators relate to the Vale of Glamorgan context and refer to the specific requirements of individual policies and proposals contained within the LDP. They are also based on the availability and quality of local data. Both the core and local indicators are linked to the LDP objectives and are important in monitoring the effectiveness of the LDP strategy and policies.

4.1.5 The monitoring framework of the LDP includes a set of indicators and targets which are set against trigger points to indicate if one part of the Plan is not achieving the desired outcomes. Trigger points have been included to assess the level to which a policy has diverged from the monitoring target to such an extent that it could identify that the policy is failing to be implemented or needs to be amended.

4.1.6 To assist comparison and identify any developing trends, the format of the AMR tables has been amended to include the performance of the monitoring indicators from the previous AMR.

4.2 POLICY PERFORMANCE TRAFFIC LIGHT RATING

4.2.1 To aid the interpretation and understanding of the policy assessment and to provide a quick reference overview of policy performance a 'traffic light' rating is included for relevant indicators as follows:

Continue Monitoring (Green)
Where indicators are suggesting the LDP Policies are being implemented effectively and there is no cause for review.
Training Required (Blue)
Where indicators are suggesting that LDP Policies are not being implemented as intended and further officer or Member training is required.
Supplementary Planning Guidance Required and Development Briefs (Purple)
Indicators may suggest the need for further guidance to be provided in addition to those already identified in the Plan. Additionally, should sites not be coming forward as envisaged; the Council will actively engage with developers / landowners to bring forward Development Briefs on key sites to help commence the development process
Policy Research (Yellow)
Where indicators are suggesting the LDP Policies are not being effective as they should further research and investigation is required. This may also include the use of contextual indicators and comparisons with other local authorities and national statistics where appropriate may be required.
Policy Review (Amber)
Where indicators are suggesting the LDP Policies are failing to implement the strategy a formal review of the Policy is required. Further investigation and research may be required before a decision to formally review is confirmed.
Plan Review (Red)
Where indicators are suggesting the LDP strategy is failing and a formal review of the Plan is required. This option to fully review the Plan will need to be fully investigated and undertaken following serious consideration.

4.3 SUSTAINABILITY APPRAISAL / STRATEGIC ENVIRONMENTAL ASSESSMENT MONITORING

- 4.3.1 An integral part of the LDP process is the requirement to undertake a SA of the Plan. The SA process which incorporated the requirements of the SEA Directive assisted the Council to assess the likely economic, environmental, and social effects of the LDP and to plan for mitigation measures to minimise any negative effects and maximise positive benefits.
- 4.3.2 The SA Monitoring expands the assessment of the performance of the LDP against the SA monitoring objectives. The initial SA identified a set of 15 objectives and related indicators, and targets were developed to measure the environmental, economic, and social impacts of the LDP. This is set out in Section 6.

5. LOCAL DEVELOPMENT PLAN MONITORING FRAMEWORK – POLICY ANALYSIS

- 5.1. This section provides a detailed assessment of whether the Plan’s strategic policies, and associated supporting managing growth / development policies, are being implemented as intended and whether the LDP strategy and objectives are being achieved. Appropriate recommendations are subsequently provided, together with necessary actions to address any policy implementation issues identified through the monitoring process. Aligned with the LDP, the analysis is set out in objective order.

1. SUSTAINABLE COMMUNITIES

Contextual Changes: Please refer to section 3 of this AMR

OBJECTIVE 1: To sustain and further the development of sustainable communities within the Vale of Glamorgan, providing opportunities for living, learning, working, and socialising for all.

Ref No. 1.1		
Annual Monitoring Indicator	Monitoring Target	Monitoring Trigger
CORE: Total number of housing units permitted on allocated sites as a percentage of overall housing provision.	82% of housing units permitted on allocated sites as a percentage of overall housing provision.	10% less than the monitoring target over 2 consecutive years.
Performance		
AMR 5: 2022 - 2023		AMR 6: 2023 - 2024
At 1st April 2023, the total number of dwellings approved was 7,745. Of these dwellings 6,072 were on allocated sites which is 78% of the overall housing provision approved to date and is within the monitoring target.		On 1st April 2024, the total number of dwellings approved was 8,058. Of these dwellings 6,648 were on allocated sites which is 82 % of the overall housing provision approved to date and is within the monitoring target.
Relevant LDP Policies		
Strategic Policies: SP1, SP2, SP3, SP4.		
Managing Growth / Development Policies: MG1, MG2, MG3, MG4, MD2, MD4, MD5, MD6.		
SA Objectives: 1, 3, 4, 8, 10, 12.		
Analysis		
Policy SP3 identifies a housing requirement of 9,460 dwellings for the Plan period. The LDP sets out the policy framework for the delivery of the identified requirement, alongside the inclusion of a 10% margin for flexibility to ensure the availability of a range and choice of housing land throughout the Plan period.		
Policy MG1 sets out the components for the delivery of the identified housing requirement, including the 10% flexibility as follows:		
Development of Sites with extant planning permissions (10 or more dwellings) at April 2011		182
Allocations within the Plan		8,525

Development of unallocated windfall sites (10 or more dwellings)	840
Development of small sites (less than 10 dwellings)	861
TOTAL DWELLING SUPPLY 2011-2026	10,408

To enable the delivery of the housing requirement, Policy MG2 allocates 48 development sites throughout the Vale of Glamorgan, which together will provide 8,525 dwellings. This equates to 82% of the provision set out under Policy MG1.

Core indicator 1.1 seeks to monitor the approval of allocated sites within the Plan as a percentage of overall housing provision. To meet the 2026 target of 82%, 466 dwellings need to be permitted on allocated sites annually (i.e. 8,525 dwellings ÷ 15 years of the Plan x 82%). At 1st April 2024, 13 years into the plan period, 6,058 dwellings need to be approved on allocated sites to meet this target. The monitoring data set out in the table below indicates that 6,648 dwellings have been approved on allocated sites, which is above the monitoring target.

Number of Dwellings Approved on MG2 Sites at April 1st 2024

Relevant LDP Policies

Strategic Policies: SP1, SP2, SP3, SP4.

Managing Growth Policies: MG1, MG2, MG3 MG4, MD2, MD4, MD6.

SA objectives: 1, 3, 4, 8, 10, 12.

Analysis

The Council's LDP Housing Land Supply Trajectory Background Paper (September 2016) sets out the anticipated delivery of new housing for each year of the Plan period (2011-2026) and was prepared by the Council to demonstrate how the LDP shall deliver the requirement of 9,460 dwellings over the plan period, plus 10% to provide flexibility. The trajectory provides annual projected rates of housing delivery from the residential housing allocations within the LDP, along with large and small site windfall developments.

The monitoring target for the completion of 7,172 dwellings on allocated housing sites is derived from the total number of anticipated completions within the housing trajectory at 1st April 2024. Housing monitoring data collected by the Council indicates that 4,734 dwellings have been completed on MG2 allocated sites. This is 34% below the expected target and represents the 2nd year that the target has been greater than the 10% variance. Notwithstanding this, the Council has now commenced its Replacement LDP which will include a review of housing delivery, land supply and the dwelling requirement for the new plan period 2021-2036.

The following table provides details of the number of dwellings completed on each LDP housing allocation at April 1st 2024.

MG 2 Housing Allocations Progress Completions April 1 st 2024

Action

The Council has now commenced its Replacement Local Development Plan which will include a review of housing delivery, land supply and dwelling requirement for the new plan period 2021 – 2036.

Ref No. 1.3		
Annual Monitoring Indicator	Monitoring Target	Monitoring Trigger
CORE: Employment land permitted (ha) on allocated sites as percentage of all employment allocations.	To secure planning permissions on 68% (251 Ha) of employment land by 2024.	10% less than the monitoring target over 2 consecutive years.
Performance		
AMR 5: 2022 - 2023		AMR 6: 2023 - 2024
During the 2022-23 AMR period the Council approved 3 planning permissions for employment uses on employment allocations. This resulted in an additional 1.347ha of approved employment uses on allocated employment land. Overall, 97.61ha has been approved, equating to 26.45% of allocated employment land.		During the 2023-24 AMR period the Council approved 1 planning permission for employment uses on allocated employment land. This resulted in an additional 0.014ha of approved employment uses on allocated employment land. Overall, 97.62ha has been approved, equating to 26.46% of allocated employment land.
Relevant LDP Policies		
Strategic Policies: SP1, SP2, SP5.		
Managing Growth / Development Policies: MG3, MG9, MG10, MG11, MD14, MD15, MD16.		
SA Objectives: 4, 10, 13.		
Analysis		
<p>The LDP monitoring framework seeks to secure planning permissions on 68% of allocated employment land by 2024, which equates to 251ha. The contribution of 0.014ha to this in the monitoring period through the approval of 1 small scale planning applications is negligible.</p> <p>The approval in the 23-24 monitoring period takes the percentage of employment land with approvals up to 26.46% and this is evidently some way below the monitoring target. The take up of employment sites in the Vale of Glamorgan has slowed significantly in recent years, which is considered to be linked to the wider economic climate that has been impacted by factors such as Brexit, the Covid-19 Pandemic and the War in Ukraine.</p> <p>Notwithstanding this, the significant failure to achieve targets suggests that a change in policy approach is required. Indeed, this level of divergence from the monitoring target likely triggers a policy or plan review, as set out in the LDP Monitoring Framework. However, as set out, the Council are currently producing a Replacement Local Development Plan, and this is informed by the Review Report and an updated evidence base. As a part of this, in 2022, the Council engaged consultants BE Group to undertake an employment land assessment of the Vale of Glamorgan and to provide recommendations on how to encourage, protect and deliver employment growth through the planning system.</p> <p>The findings of the BE Group's research informed the Replacement LDP's Preferred Strategy, which was published in December 2023. This identified a varied policy approach to the existing LDP, whereby an oversupply of land (168ha) was identified for allocation to meet the identified need (67.8ha). This results in a significantly reduced, and more achievable, target when compared to the 369ha set out in the adopted LDP. The 'need' would be the target to assess delivery against and the purpose of the oversupply is to safeguard employment land for delivery beyond the plan period. A policy and research review has resulted in significantly reduced targets to be taken forward into the Replacement LDP. This is considered to be a rational approach to addressing underperformance against this monitoring target.</p> <p>The 2020-21 AMR stated that 44.75ha of employment land was approved in July 2021, at Model Farm (Policy MG9(2) refers). However, it should be noted that this planning permission was quashed in October 2021. A new planning application was submitted following this, and it is currently subject to an appeal for non-determination under Section 78 (2) of the Town and Country Planning Act 1990.</p>		

Action	Continue Monitoring: The Council has identified new policy in the Preferred Strategy of the RLDP that sets more achievable targets for the delivery of employment land, and this is considered to be a rational approach to addressing underperformance. As this is a core indicator the Council will continue to monitor performance against the monitoring target.
--------	--

2. CLIMATE CHANGE
Contextual Changes: Please refer to section 3 of this AMR. Updates will be provided in future AMRs.
OBJECTIVE 2: To ensure that development within the Vale of Glamorgan makes a positive contribution towards reducing the impact of and mitigating the adverse effects of climate change.

Ref No. 2.1		
Annual Monitoring Indicator	Monitoring Target	Monitoring Trigger
LOCAL: Amount of Development (by TAN15 category) permitted in C1 floodplain areas not meeting all TAN 15 tests.	No planning permissions granted within C1 floodplain areas unless all TAN15 tests are met.	1 or more developments permitted within C1 floodplain areas that do not meet all TAN15 tests.
Performance		
AMR 5: 2022 - 2023		AMR 6: 2023 - 2024
No planning permissions were approved during the AMR monitoring period in C1 floodplains, which did not meet the TAN 15 tests.	No planning permissions were approved during the AMR monitoring period in C1 floodplains, which did not meet the TAN 15 tests.	
Relevant LDP Policies		
Managing Development Policies: MD1, MD4, and MD7. SA Objectives: 6.		
Analysis		
The target has been met; no planning permissions have been granted within a C1 floodplain that did not meet all TAN15 tests within the monitoring period. In view of the monitoring data, the Council considers that the implementation of Policies MD1, MD4 and MD7 in combination with other policies within the LDP have enabled the Council to meet the monitoring target. Accordingly, it is the Council's view that the policies for delivering this target are being implemented effectively.		
Action	Continue Monitoring: Relevant development plan policies are being implemented effectively.

Annual Monitoring Indicator	Monitoring Target	Monitoring Trigger
LOCAL: Total energy output capacity granted planning permission (MW) on standalone renewable energy developments greater than 1MW.	To grant planning permissions sufficient to meet 21.19% (113.36 GWh) of projected electricity demand through renewable energy sources by 2026. To grant planning permissions sufficient to meet 1.48% (22.56 GWh) of projected heat demand through renewable energy sources by 2026.	Failure to grant planning permissions to deliver sufficient renewable energy to meet the specified targets by 20% or more.
Performance		
AMR 5: 2022 - 2023	AMR 6: 2023 - 2024	
The monitoring target is outside the timeframe of the current AMR. No planning permissions were granted by the Council during the monitoring period for renewable energy development. However, a Development of National Significance was approved by the Welsh Government (2021/00001/DNS) for 25Mw of solar energy. This adds an additional 21.9 GWh of electricity through renewable energy sources.	The monitoring targets are outside the timeframe of the current AMR. In the current monitoring period 1.3MW has been approved on 1 solar farm. This adds an additional 1.13GWh of electricity through renewable energy sources. No planning permissions were approved that provide renewable energy to meet heat demand.	
Relevant LDP Policies		

Managing Growth/ Development Policies: MG27, MD2, MD19.

SA Objectives: 6.

Analysis

Planning application ref. 2023/00360/FUL approved the addition of 1.13GWh of renewable energy. This brings the total consented renewable energy for electricity production to 84.72GWh during the plan period. This equates to 15.8% of the Vale of Glamorgan's projected electricity demand up to 2026. This is an increase of 0.2 percentage points on the previous monitoring period and is therefore a limited addition toward meeting 21.19% (113.26GWh) of the project electricity demand (based on the projected electricity demand of 535 GWh by 2026). Notwithstanding the limited progress toward meeting the target, it is notable that a further 210GWh of solar energy is being considered through the DNS process across five sites in the Vale of Glamorgan, and decisions are expected on at least 2 of these sites (amounting to 100.7GWh) in the forthcoming monitoring period. The approval of any of these sites would make significant progress toward achieving the monitoring target, and approval of all five would greatly exceed the target.

It is also positive to note that 5.2GWh of solar energy was approved by application ref. 2023/00617/FUL in the monitoring period. However, this has not been reported as it is roof mounted on an industrial building and is thus not a standalone renewable energy development.

Regarding the monitoring target for heat energy, no new renewable energy developments for heat generation have been consented during the monitoring period. In previous monitoring periods the Council has approved 17.06GWh of heat energy from renewable sources, which equates to 1.12% of the projected heat demand by 2026. This is below the 2026 target of 22.56GWh (1.48% of projected demand). However, there are two further monitoring period for this target to be achieved in.

The Council previously approved a biomass proposal in 2015 under application 2015/00031/OUT which would generate 9 MW of installed heat capacity. Whilst this was under construction it was noted that it did not comply with its planning permission. Subsequently, it was also decided that an EIA would be required for the biomass plant, as it was found to be Schedule 1 development.

To regularise the breach of planning control planning application reference 2023/00032/FUL was submitted in January 2023, together with an Environmental Statement. However, this was refused in March 2024 and this decision is currently subject to appeal. Therefore, as it stands this biomass plant is not operational.

Depending on the outcome of this appeal, the biomass building could either be required to be removed through planning enforcement action or planning permission will be granted for its retention. If the appeal is allowed and planning permission is granted for the retention of the development, it would represent 2.59% of heat capacity from renewable sources ($9 \text{ MWt} \times 0.5 \times 365 \times 24 = 39.42 \text{ GW} / 1524 \times 100 = 2.59\%$). Consequently, the LDP would have met its 2026 target for the whole of the LDP period. It is considered that the reasons for the uncertainty surrounding this proposal are outside of the scope of the adopted LDP and therefore it is considered the LDP policies are working effectively.

Action	Continue Monitoring: The current monitoring triggers for renewable energy development for electric and heat production have not been met as both come into effect in 2026. The Replacement Local Development Plan will include a Renewable Energy Assessment, which will further identify the best locations for renewable energy development.

	Ownership of the land to the north of the railway line is now with the Vale of Glamorgan and is planned for future Park and Ride expansion and potential commercial/residential opportunities.	Ownership of the land to the north of the railway line is now with the Vale of Glamorgan and is planned for future Park and Ride expansion and potential commercial/residential opportunities.
Modernisation of the Valley Lines.	Ongoing, work being undertaken by Transport for Wales.	Ongoing, work being undertaken by Transport for Wales.
NCN Route 88 & associated local urban & rural connections.	Consultation held on Sully to Cosmeston Active Travel route that forms part of NCN88 and would continue from Railway Path, Penarth. WG Active Travel Core Allocation Grant received FY23/24 to conduct ecological surveys and land ownership enquiries and start pre-app planning process.	Ecology surveys completed and route finalised. Detailed design completed. Planning application to be submitted summer 2024. Sustrans have prepared a study into 'Quiet Lanes' on rural areas of NCN88 and are undertaking a feasibility study for the Penmark, Llancarfan, Llanmaes areas.
A4050 Culverhouse Cross to Cardiff Airport walking and cycling route.	WG Active Travel Core Allocation Grant provided to complete detailed design of Weycock Cross to Dragon Tail roundabout FY23/24. Preliminary land valuation report produced FY22/23 but unable to start negotiations until detailed design is complete.	Unable to progress during FY23/24 due to insufficient WG funding. This is being progressed in FY24/25 with a view to submitting a bid for construction in January 2025.
A48 Culverhouse Cross to Bridgend via Cowbridge walking and cycle route.	Concept design of scheme completed. Funding required for detailed design and construction. Proposed development at Cottrell Park may deliver part of this scheme from Cottrell Park to Sycamore Cross.	This scheme is not progressing at this time.
Barry Waterfront to Dinas Powys walking and cycling route.	WG Active Travel Core Allocation Grant provided to complete surveys, flood modelling and detailed design of scheme for Biglis to Dinas Powys section only, during FY23/24.	Detailed design of route complete. Public consultation planned May 2024 with a planning application being submitted autumn 2024. Construction bid to be submitted to WG in January 2025.
Eglwys Brewis Road walking and cycling route in conjunction with the new Northern Access Road.	Not applicable, scheme completed May 2020.	Not applicable, scheme completed May 2020.

Bus Park and ride at Cosmeston.	Scheme not being progressed at the current time.	Scheme not being progressed at the current time.
Bus priority measures at A48 Culverhouse Cross to Bridgend via Cowbridge.	Scheme not being progressed at the current time.	Scheme not being progressed at the current time.
Bus priority measures at Merrie Harrier, Cardiff Road, Barry to Cardiff via Barry Road.	Scheme not being progressed at the current time.	Scheme not being progressed at the current time. Bus Priority measures at Barons Court – design complete and feasibility/modelling to be undertaken in FY24/25 if regional Local Transport Fund allocation is agreed.
Bus priority measures at Leckwith Road, Llandough to Cardiff.	Scheme not being progressed at the current time.	Scheme not being progressed at the current time.
Bus priority measures at Lavernock Road to Cardiff via the Barrage	Scheme not being progressed at the current time.	Scheme not being progressed at the current time.
Relevant LDP Policies		
Strategic Policies: SP1, SP2, SP7. Managing Growth / Development Policies: MG2, MG3, MG10, MG16, MD1, MD2, MD4. SA Objectives: 6, 10, 12, 13, 15		
Analysis		
This indicator remains within the identified monitoring target. While work on some future schemes has halted pending the availability of funding for initial phase I investigative works, work on other schemes has progressed well with several schemes including the Barry Waterfront to Dinas Powys walking and cycling route, where detailed design and public consultation has been completed and route construction is anticipated mid-2025. Although work on the Bus priority measures at Merrie Harrier, Cardiff Road, Barry to Cardiff via Barry Road has slowed, detailed design works have been completed and feasibility/modelling work will take place during 2024/25. Ecological surveys and detailed design works have been completed and a planning application has been submitted for the NCN88 and associated connections although construction works will be tied in with the wider site development. Progress on other monitoring schemes is less evident however, funding bids and initial investigative works remain ongoing. Therefore, while the 2026 monitoring target is still 2 years away, progress on the schemes detailed is significant. Any schemes which have not commenced or made significant progress will be reviewed and considered as a part of the RLDP review.		
Action	No further action is required at this time; continue to monitor in future AMRs.	

Ref No. 3.2		
Annual Monitoring Indicator	Monitoring Target	Monitoring Trigger

LOCAL: Number of major planning applications to be accompanied by a travel plan, above the relevant Transport Assessment thresholds identified in TAN18 (Annex D refers).	All relevant planning applications to be accompanied by a travel plan.	1 or more relevant planning applications not accompanied by a Travel Plan or secured by a condition.

Performance

AMR 5: 2022 - 2023	AMR 6: 2023 - 2024
Between April 1 st 2022 and 31 st March 2023 all relevant planning applications were accompanied by a Travel Plan.	Between April 1 st 2023 and 31 st March 2024 all relevant planning applications were accompanied by a Travel Plan.

Relevant LDP Policies

Strategic Policies: SP1, SP2, SP3, SP5, SP7, SP11.

Managing Growth /Development Policies: MG2, MG3, MG6, MG7, MG8, MG9, MG10, MG11, MG16, MG29, MD1, MD2, MD4, MD13.

SA Objectives: 6, 10, 12, 13, 15.

Analysis

The Council's Adopted Travel Plan SPG (see Indicator 3.3 below) indicates that a Travel Plan may be required for the following types of development depending on the level of existing public transport provision and accessibility to services and provision to accompany planning proposals where they are either:

- Residential Development of 50 dwellings or more
- Retail and Leisure Developments of 1000 sqm or greater
- Business Developments of 2,500 sqm or greater
- Industrial Developments of 5,000 sqm or greater
- Distribution and Warehousing Developments of 10,000 sqm or greater
- Hospital developments of 2500 sqm or greater
- Higher and Further Education Developments of 2500 sqm or greater
- All Schools
- Sport and Stadia Developments with 1,500 seats or greater.

Between April 1st 2023, and March 31st 2024 planning permission was granted for two major applications that required a Travel Plan. The requirement for Travel plans are conditions of both applications.

Details of the application are shown below:

Application reference	Address	Development Description	Travel Plan
2022/00294/HYB	Land adjacent to Oak Court, Myrtle Close, Penarth	Hybrid planning application comprising of a full application for extra-care accommodation and associated highways, landscaping and drainage works and outline	Required by condition

		application for residential development and associated works with all matters reserved except for access	
2020/00775/OUT	Former Railway Sidings, Ffordd y Mileniwm, Barry	Residential development at the former sidings, Ffordd y Mileniwm along with associated infrastructure and open space	Required by condition

The monitoring target has been met during the monitoring period as set out above. In view of this, the Council considers that the relevant LDP policies and Travel Plan SPG are functioning effectively.

Action	No action is required at this time; continue to monitor in future AMRs

The Council adopted a new Residential and Householder Development Supplementary Planning Guidance in April 2018.

Ref No. 4.9	
LOCAL: Preparation of Supplementary Planning Guidance relating to Biodiversity and Development.	
In accordance with the initial AMR monitoring target, the Council adopted a new Biodiversity and Development Supplementary Planning Guidance in April 2018.	
Notwithstanding the above, it has been the Councils intention to update the adopted SPG to reflect various changes to national policy. The recent publication of a revised version of Planning Policy Wales (Edition 12) (PPW) in February 2024 by the Welsh Government has further necessitated such a review with significant changes in national policy relating to the areas of Green Infrastructure, Net Benefit for Biodiversity and the Stepwise Approach, Protection for Sites of Special Scientific Interest and Trees and Woodland. The Council therefore intends to update its Supplementary Planning Guidance on Biodiversity and Development when resources permit however, the approved timetable for the Replacement Local Development Plan (RLDP) currently programmes plan adoption during September 2026. Given the importance of the RLDP to the Council and the limited resources available, a revision to the Biodiversity and Development SPG is only likely to commence after plan adoption.	
Action	Revise Biodiversity and Development Supplementary Planning Guidance following the adoption of the Replacement Local Development Plan which is currently programmed for September 2026.

Deliver Policy MG6 (4) and Policy MG6 (5) education facilities by 2026.	<p>On 4 November 2019, the Council's Cabinet approved a phased approach to expanding primary provision in Cowbridge with an expansion of English medium provision being delivered at Cowbridge Comprehensive School as part of Phase One, and Welsh Medium primary provision being expanded at the MG6 (4) site, as part of Phase Two.</p> <p>The Section 106 Agreement requires the land for the school site to be transferred prior to 150 dwellings. The developer is</p>	MG6 (4) The Section 106 Agreement requires the land for the school site to be transferred prior to 150 dwellings. This transfer has now been completed and a planning application is anticipated in early 2025 with completion of the school anticipated in Q3 of 2026.

	currently undertaking the required works to the site to transfer the land to the Council later in 2023.	
	The Council has received an outline planning application for this allocated mixed-use site, including for a primary school (planning application ref: 2020/01170/OUT – residential development, new primary school, community space and POS). Application has not yet been determined. Planning application 2022/01113/RG3 for the new specialist school element and associated works at lower Cosmeston farm, Lavernock has now been approved by the Council.	For site MG6 (5) the outline planning application for this allocated mixed-use site, including for a primary school (planning application ref: 2020/01170/OUT) was approved by Planning Committee in March 2024 subject to the applicant entering into a Section 106 agreement. This application was subject to a call-in direction from the Welsh Minister, until the week commencing 30 September 2024, when the Welsh Minister advised that the Local Planning Authority could now determine the application.
Relevant LDP Policies		
Strategic Policies: SP1, SP2.		
Managing Growth / Development Policies: MG2, MG3, MG6, MD1, MD2, MD4, MD5.		
SA Objectives: 2, 4, 5.		
Analysis		
The MG6 (3) and MG6 (6) monitoring targets for 2024 have been met as both schools opened ahead of the target dates. The target date of 2026 for the new primary school on land to the north and west of Darren Close, Cowbridge is on track to be met. In view of the above monitoring data, the Council considers that Policy MG 6 and other relevant LDP policies are working effectively.

Annual Monitoring Indicator	Monitoring Target	Monitoring Trigger
LOCAL: Number of community facilities lost through development.	No unacceptable loss of community facilities in areas of identified need in accordance with Policy MD5 (Development within Settlement Boundaries).	The loss of 1 community facility in an area of identified need not in accordance with Policy MD5.
Performance		
AMR 5: 2022 - 2023		AMR 6: 2023 - 2024
No developments were approved which resulted in the unacceptable loss of community facilities in an area of identified need contrary to Policy MD5 (Development within Settlement Boundaries).		No developments were approved which resulted in the unacceptable loss of community facilities in an area of identified need contrary to Policy MD5 (Development within Settlement Boundaries).
Relevant LDP Policies		
Strategic Policies: SP1, SP11. Managing Growth / Development: MG2, MG7, MG8, MG29, MD1, MD2, MD3, MD4, MD5, MD13. SA Objectives: 2, 4, 5.		
Analysis		

Between 1st April 2023 and 31st March 2024, 2 applications were approved by the Council which resulted in the loss of a community facility. Where proposals involve the loss of community facilities the Council requires robust evidence that demonstrates the facilities are no longer required or that such a loss would not have a detrimental impact upon local service provision. However, both applications approved were not considered to be contrary to the requirements of Policy MD5 for the reasons stated in the table below:

Application No.	Type	Description of Development	Reasons why the proposal is acceptable loss of community use (taken from Officer Reports)
2023/00282/FUL	Householder Developments	<p>Ewenny Village Hall, Corntown.</p> <p>Conversion of the existing community hall to a single dwelling, single storey rear extension, conversion and extension of rear outbuildings to an annex and erection of a garden room</p>	<ul style="list-style-type: none"> • 1147 sqm of community facility space would remain following the conversion of the village hall which would exceed the ward requirement and as such it is not considered that the proposals would have a detrimental impact on community facility provision in the ward. • The proposed annex would be ancillary to the main dwelling. Whilst capable of independent occupation, the shared access and amenity space ensures a functional link between the two buildings.
2021/01710/FUL	Minor – Dwellings (C3)	<p>Former Eastbrook Methodist Chapel, Chapel Row, Eastbrook, Dinas Powys</p> <p>'Demolition of chapel building and the erection of a dormer bungalow, on-site car parking and amenity provision and associated development thereto.'</p>	<ul style="list-style-type: none"> • The Community Facilities Background Paper to the LDP concluded that the Dinas Powys Ward, there as a deficiency of community facilities of 330 sqm. Therefore, even if the Church Hall was included within the assessment, the Ward would still have a deficiency of some 215 sqm. • Applicants' assessment identifies several community facilities within the settlement. • Given the age of the Community Facilities Background Paper, officers reassessed the community facilities provision within Dinas Powys using residential address points multiplied by average household size, minus average vacancy rates across the Vale.

			Accounting for the loss of the application site as a provision for community space, this assessment identified that there is an excess of 104 sqm within the Dinas Powys settlement. Given the excess of community space provision, it is evident that there would be suitable alternative provision within the settlement, which could satisfy local needs.
Action	No action is required at this time; continue to monitor in future AMRs.

	Maintain or increase the level of leisure floorspace within town and district centres.	10% reduction in the level of existing leisure floorspace within town and district centres.
Performance		
	AMR 5: 2022 - 2023	AMR 6: 2023 - 2024

Decrease of 4,299 sqm retail floorspace. Total retail floorspace at start of monitoring period in 2017 was 82,019 sqm. The decrease in retail floorspace accounts for a 5.2% reduction since 2017. This is a slight improvement on the decrease of retail floorspace recorded in the previous monitoring period of 110sqm.	Decrease of 5,561sqm retail floorspace. Total retail floorspace at start of monitoring period in 2017 was 82,019 sqm. The decrease in retail floorspace accounts for a 6.8% reduction since 2017. This is a decrease in the amount of available retail floorspace of 1,262sqm over that recorded in the previous monitoring period however this remains within the monitoring target.
Increase of 580 sqm in office space. Total B1 office space at start of monitoring period in 2017 was 2,380 sqm. The increase accounts for 24.4% rise in B1 office space since 2017 however the figure has decreased slightly (317sqm) since the previous monitoring period.	Ground floor: Increase of 2 sqm in office space. Total B1 office space at start of monitoring period in 2017 was 2,380 sqm. The increase accounts for a rise of less than 1% in B1 office space since 2017 and has decreased since the previous monitoring period.
Increase of 769 sqm in leisure floorspace. Total D1 / D2 leisure space at start of monitoring period in 2017 was 4,948 sqm. The increase accounts for 15.5% rise in D1 / D2 leisure space since 2017 however the figure has decreased slightly (108sqm) since the previous monitoring period.	Increase of 1,076 sqm in leisure floorspace. Total D1/D2 leisure space at the start of the monitoring period in 2017 was 4,948 sqm. The increase accounts for a rise of 21.7% in D1/D2 leisure floorspace since 2017 and the is figure has increased (307 sqm) since the previous monitoring period.
Relevant LDP Policies	
Strategic Policies: SP1, SP2, SP5, SP6, SP11. Managing Growth / Development Policies: MG2, MG3, MG7, MG9, MG10, MG11, MG12, MG13, MG14, MG15, MG29, MD1, MD4, MD13, MD14. SA Objectives: 2, 4, 5, 13, 14, 15.	
Analysis	
<p>All monitoring targets have been met. While the level of available retail floorspace within the town and district centres has again decreased, this is largely reflected in the increase in office and leisure uses and is considered to reflect the change in attitude towards a more flexible approach to acceptable uses within town and district centres and in general, and as reflected in the suite of monitoring indicators, remains attractive.</p> <p>In terms of new office and leisure uses, the data shows a slight increase in both indicators over the monitoring period however, this is considered to reflect changes to policy and legislation in recent years which has sought to introduce a degree of flexibility into planning decisions within town and district centres. In view of the monitoring data, the Council will continue to monitor this indicator to determine the effectiveness of the policy framework relating to this issue.</p> <p>In 2023 the Council appointed NEXUS planning consultancy to undertake an assessment of and make recommendations for the Vale of Glamorgan Town and District retail centres. This report will inform the Replacement Local Development Plan and form the basis for policy development and future monitoring.</p>

Source: Vale of Glamorgan Planning data (2024)

The monitoring data indicates that most of the town and district centres have seen a decrease in the level of non-A1 uses within both the primary and secondary shopping frontages during the monitoring period. While no planning applications have been approved for non-A1 uses in the centres, 2 applications have been approved which saw the original A1 use extended to include an element of A3 however, the original A1 use has remained the primary element of the unit(s).

While no non-A1 uses have been approved in the primary/secondary frontages of the centres, four of the centres have seen approvals for applications seeking to revert previous non-A1 uses back to A1 uses or the splitting of larger A1 units into smaller A1 units. This has occurred in Holton Road, High Street/Broad Street, Cowbridge and Penarth and while this cannot be seen as a trend, it does indicate that confidence in the retail market is returning.

Notwithstanding the above, in accordance with national guidance, development management decisions now take a more flexible approach to change of use proposals where it is considered the proposal would benefit the town or district centre and contribute to its vitality, viability and attractiveness. This report will inform the Replacement Local Development Plan and form the basis for policy development and monitoring moving forward. In view of the monitoring data, the Council will continue to monitor this indicator to determine the effectiveness of the policy framework relating to this issue.

Action	No action is required at this time; continue to monitor in future AMRs

Source: Vale of Glamorgan Planning Data (2024)

*reduction in units since 2022 due to amalgamation.

Of the approved applications within the local and neighbourhood centres during the monitoring period, 1 application sought an amendment to the opening hours of an existing premises and the other application sought to replace the shopfront of a unit within an established local centre. Notwithstanding these minor changes, the monitoring data indicates that the local and neighbourhood retail centres continue to maintain a significant level of A1 uses. While some of the local centres have seen an increase in the level of non-A1 uses, these can be attributed to a small increase in the vacancy rates within those centres and should not be viewed as a cause for concern as small increases in vacancy rates within small centres, can have significant impacts on the percentage of A1 units within a centre. These increases will be monitored in future AMR to ascertain any continuing trends that might need to be addressed.

As a part of the evidence base for the Replacement Local Development Plan (RLDP), the Council commissioned work from Nexus planning to assess the Vale of Glamorgan retail centres and the recommendations of this work, will influence the relevant retail policy direction of the RLDP.

Action	No further action required, continue to monitor local and neighbourhood centres in accordance with AMR monitoring indicators.

Source: Vale of Glamorgan Planning Data 2024.

Vacancy rates within the primary frontages of all town and district retail centres have decreased or remained static since the last AMR period indicating that the centres remain attractive places to operate retail business and that the policies of

the LDP are effective. Given the prevailing economic climate and changing shopping habits, the situation across the retail centres will continue to be carefully monitored to establish longer term trends however, the Vale of Glamorgan's main retail centres remain resilient to change.

Action	No further action required. Council to continue to monitor indicator in future AMRs.

Source: Vale of Glamorgan Planning Data (2024) *reduction in units since 2022 due to amalgamation.

The monitoring data indicates that the Vale's local and neighbourhood retail centres would appear to be performing well given the prevailing retail situation across Wales and the UK. With a small number of exceptions, the local and neighbourhood centres have maintained a high level of occupancy with some local centres increasing occupancy rates since the 2023 AMR. While a small number of retail centres have experienced increases in vacancy rates since the last AMR, it is considered that the increases are not representative of major issues and merely reflect natural variations in vacancy rates within the centre(s) and do not warrant immediate concern. Overall, it is considered that the evidence illustrates that the local and neighbourhood centres remain attractive to local retail businesses which is reflected in the

level of 'retail churn' shown at the centres which indicates that the local and neighbourhood centres remain popular. The Council will continue to monitor this indicator closely in future AMRs and there is currently no cause for concern.

Action	No further action required. Council to continue to monitor indicator in future AMRs.

Contextual Changes: Please refer to section 3 of this AMR

Ref No. 7.1.1		
Annual Monitoring Indicator	Monitoring Target	Monitoring Trigger
The annual level of housing completions monitored against the Average Annual Requirement (AAR)	To deliver as a minimum the Annual Average Requirement of 630.66 dwellings. (At 2023 target would be 7,567).	No trigger set.
Performance		
AMR 5: 2022 - 2023		AMR 6: 2023 - 2024

At April 1st, 2023 the LDP had delivered 6,042 additional dwellings i.e. 22% below the cumulative target of 7,567 dwellings for the period. This equates to 503.5 per annum, set against a target of 630.66 per annum.	At April 1st, 2024 the LDP had delivered 6,516 additional dwellings i.e. 21.2% below the cumulative target of 8,198 dwellings for the period. This equates to 503.5 per annum, set against a target of 630.66 per annum.

Strategic Policies: SP1, SP2, SP3, SP4.

Managing Growth/ Development Policies: MG1, MG2, MG3, MG4, MD1, MD5, MD6, MD10, MD11.

SA Objectives: 1, 3, 4, 8, 10, 12.

Analysis

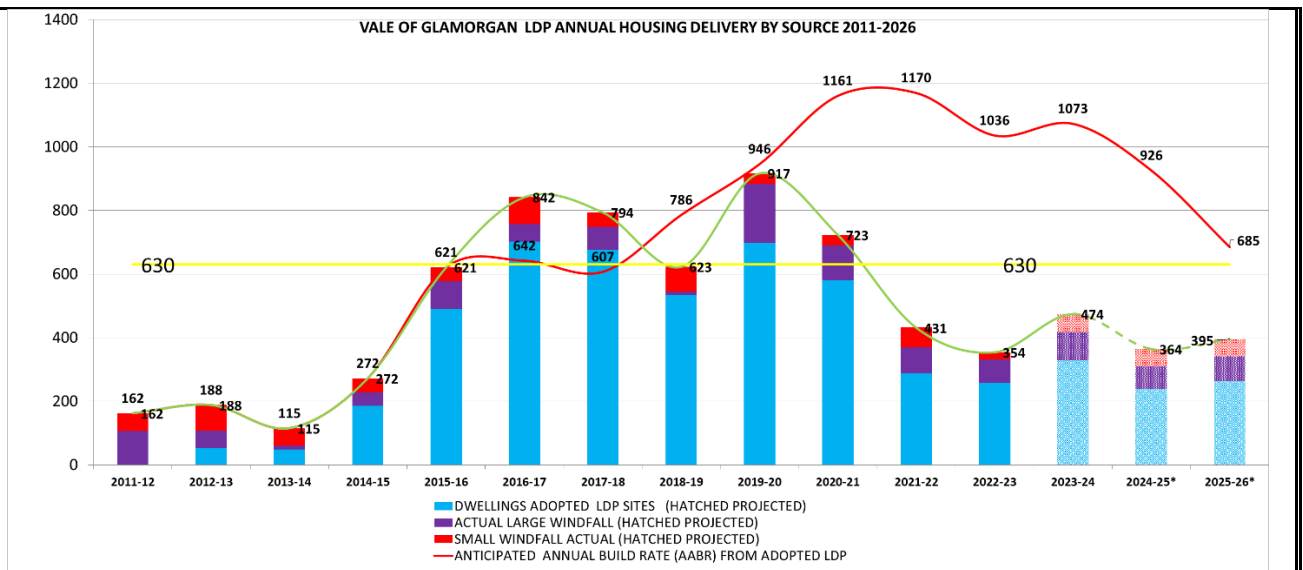

The LDP identifies a housing requirement of 9,460 dwellings over the plan period 2011-2026, equating to an Annual Average Requirement (AAR) of 630.66 dwellings per annum. At April 2024, the cumulative dwelling target based on the AAR would be 8,198 (630.66 x 13 years).

In accordance with new national policy for monitoring housing delivery, the Council has produced the following table which provides a comparison (+/-%) between the Annual Average Requirement (AAR) and actual annual dwelling completions. In addition, the table below provides an analysis of housing delivery against the housing trajectory set out in the Council's LDP Housing Land Supply Trajectory (2016), which the Council prepared as evidence at the LDP examination (Council Action Point Response to HS 2 and 3 AP4, AP6, AP9 and AP10 refers).

LDP YEAR	TRAJECTORY ADJUSTMENT MINUS 10% TRAJECTORY	ACTUAL COMPLETIONS (*forecast)	% ANNUAL COMPLETIONS AGAINST TRAJECTORY	ANNUAL AVERAGE REQUIREMENT (AAR)	% AGAINST AAR
2011-12	162	162	100.00%	630	25.71%
2012-13	188	188	100.00%	630	29.84%
2013-14	115	115	100.00%	630	18.25%
2014-15	272	272	100.00%	630	43.17%
2015-16	621	621	100.00%	630	98.57%
2016-17	600	842	140.33%	630	133.65%
2017-18	547	794	145.16%	630	126.03%
2018-19	708	623	87.99%	630	98.89%
2019-20	851	917	107.76%	630	145.56%
2020-21	1045	723	69.19%	630	114.76%
2021-22	1053	431	40.93%	630	68.41%
2022-23	932	354	37.98%	630	56.19%
2023-24	966	474	49.07%	630	75.24%
2024-25	833	364	43.70%	630	57.78%
2025-26	616	395	64.12%	630	62.70%
Totals	9,509	7,275		9,450	

The monitoring data indicates that between 1st April 2011 and 31st March 2024, the LDP has delivered 6,516 dwellings which equates to an annual average delivery of 501.23 dwellings per annum, against the target completion figure of 8,198 dwellings and the annual average dwelling target of 630.66, whilst the LDP trajectory projected 8,060 dwelling completions at April 1st 2024.

The following graph provides further comparison between the rate of housing delivery over the Plan period, (Green Line) against the annual average requirement (Yellow Line) and the dwelling completions within the LDP housing trajectory (Red Line). The bar chart provides a breakdown of housing delivery by source, namely adopted LDP housing allocations and small and large windfall developments:

The above graph indicates that over remaining 2 years of the adopted LDP completions are anticipated to fluctuate as existing sites under construction continue to be built out prior to additional sites coming on stream. It is envisaged that beyond the plan period build rates will steadily increase. The Council is currently progressing with its RLDP and a new housing trajectory shall be prepared for the RLDP.

Action	The Council has now commenced preparation of the RLDP which will include a review of housing delivery, land supply and dwelling requirement for the revised plan period 2021-2036.

Managing Growth/ Development Policies: MG1, MG2, MG3, MG4, MD1, MD5, MD6, MD10, MD11.

SA Objectives: 1, 3, 4, 8, 10, 12.

Analysis

The Council's LDP Housing Land Supply Trajectory Background Paper (September 2016) sets out the anticipated delivery of new housing for each year of the Plan period (2011-2026) and was prepared by the Council to demonstrate how the LDP shall deliver the requirement of 9,460 dwellings over the Plan period, plus 10% to provide plan flexibility.

The trajectory provides projected rates of housing delivery annually from residential housing allocations within the LDP, along with large and small site windfall developments. In preparing the trajectory, assistance was provided by the development industry and landowners on anticipated site commencement and annual rates of development.

The monitoring target of 8,054 dwellings for 2024 is derived from the total number of anticipated dwellings within the housing trajectory at 1st April 2024 less 10% flexibility which has been calculated to reflect housing delivery against the LDP requirement. Housing monitoring data collected by the Council indicates that 6,516 dwellings have been built (see table below).

Whilst demand and developer interest in the Vale remains strong with a number of housing developments presently under construction and sites granted permission yet to commence, there has been a decline in the rate of dwelling completions since 2021 in part reflecting the cyclical nature of house building as sites are built out and new sites come on stream, and also as a consequence of external factors affecting the wider development industry such as the impact the war in Ukraine has had on the availability and cost of building materials and workforce shortage. It is likely that current cost of living crisis and increases in mortgage interest rates will also likely impact on the annual rate of housing completions.

LDP YEAR	TRAJECTORY (*actual completions **trajectory minus 10% flexibility)	ACTUAL ANNUAL COMPLETIONS

Analysis																						
Strategic Policy SP4 Affordable Housing Provision sets a target for the provision of 3,252 affordable dwellings during the Plan period 2011-2026. The target figure set by the Council has been derived from an assessment of the potential affordable housing contributions from the anticipated level of windfall and small housing sites identified in Policy MG1 including the 10% flexibility allowance, and housing allocations identified in within the LDP under Policy MG2. The Council's mechanisms for the delivery of affordable housing sites is set out in Policy MG4 Affordable Housing and Policy MD4 Community Infrastructure and Planning Obligations, further analysis of performance of these policies is considered as part of this monitoring indicator. Indicator 7.2 sets a target for the provision of 2,555 additional affordable homes by 2024 and is derived from the anticipated affordable housing contributions from Policy MG2 housing allocations, secured through policy MD4, alongside projected windfall housing developments as set out in Policy MG1. The table below provides a summary of the number of additional new build affordable dwellings provided annually and indicates that between 2011 and 2023 an additional 2,138 affordable dwellings have been delivered within the Vale of Glamorgan.

Analysis		
<p>An updated 2022 Gypsy and Traveller Accommodation Assessment (GTAA) was approved by Cabinet in January 2023 and has been submitted to the Welsh Government for approval. The study was prepared in accordance with the Welsh Government guidance in 'Undertaking Gypsy and Traveller Accommodation Assessments' and will form part of the evidence base for the Replacement LDP 2021 to 2036. The 2022 GTAA was approved by the Welsh Cabinet Secretary for Culture and Social Justice on the 19th June 2024.</p> <p>The GTAA identifies a need for 9 pitches within the 5 years of the GTAA study period to 2026 and a further 2 pitches in the period up to 2036, equating to a total need for 11 pitches. This figure is derived from 4 pitches on 2 unauthorised developments (3 units at Brocastle Quarry and 1 unit at Twyn Yr Odyn), 1 household living in bricks and mortar accommodation that requires a pitch and additional future pitch provision associated with children becoming adults over the study period from the Brocastle Quarry site.</p> <p>There are 17 pitches at Hayes Road Sully, but this site is classified as 'tolerated.' As planning enforcement is not possible given the site has been occupied for 10 years or more, the pitches associated with this site are not required to be included within the calculation of unmet need.</p>		

In terms of making provision for unmet need, planning permission was granted in 2023/4 for the 3 unauthorised pitches at Brocastle, which has reduced the need from 11 pitches to 8 pitches by 2036. An application has been approved for the site at Twyn Yr Odyn reducing the need to 7, although this was approved after the base date of this AMR. There may also be scope to accommodate extra plots at Brocastle Quarry (to meet the additional pitch need as the occupants' children become adults). This would further offset the need.

In light of the above, it is considered appropriate to continue to monitor the situation and following the determination of the planning applications, make sure that any additional need is accommodated through appropriate allocations within the RLDP.

Action	Continue to monitor in future AMRs and consider 2022 GTAA in the development of the RLDP.

Annual Monitoring Indicator	Monitoring Target	Monitoring Trigger	Performance
LOCAL: Meeting the identified long-term needs for authorised Gypsy and Traveller Accommodation.	Establish a Gypsy and Traveller Accommodation Board.	Establish a Gypsy and Traveller Accommodation Board.	A Gypsy and Traveller Accommodation Board was established in 2016.
	Agree project management arrangements including reporting structure.	By end of June 2016.	Board composition and governance structure established. Responsibilities of Gypsy and Traveller Board transferred to the Strategic Housing Board (June 2019) operated and facilitated by Housing Services.
	Make initial contact and maintain contact with the Hayes Road occupiers.	July 2016 to May 2018.	Initial contact made with occupiers of the Hayes Road site on the 24 th November 2016 and an ongoing dialogue has been maintained since this time.
	Agree methodology for undertaking site search and assessment.	By end of December 2016.	Initial methodology agreed by Board and site search undertaken.

	Undertake a site search and assessment and secure approval of findings including identification of an appropriate site or sites and secure planning permission and, if appropriate, funding (including any grant funding from Welsh Government) for the identified site.	By end of May 2018.	The establishment of a permanent site for gypsy and travellers within the Vale of Glamorgan remains unresolved and work continues to identify a suitable site that can be developed to meet the need identified in the Council's GTAA.
Relevant LDP Policies			
Strategic Policies: SP1			
Managing Growth /Development Policies: MD18			
Analysis			
As stated above, the Council has recently approved a new 2022 GTAA to establish the current accommodation needs of gypsies and travellers in the Vale of Glamorgan, although this is awaiting Welsh Government sign off. This study will form part of the evidence base of the RLDP in due course. In addition, the Council is part of a regional working group which is seeking to establish the regional need for a gypsy and traveller transit site.			
Action	Continue to monitor in future AMRs and consider 2022 GTAA in the development of the RLDP.

The Council adopted new Affordable Housing Supplementary Planning Guidance in July 2017.

8. ECONOMY

Contextual Changes: Please refer to section 3 of this AMR. Updates will be provided in future AMRs.

OBJECTIVE 8: To foster the development of a diverse and sustainable local economy that meets the needs of the Vale of Glamorgan and that of the wider South East Wales Region.

Ref No. 8.1

Annual Monitoring Indicator	Monitoring Target	Monitoring Trigger
LOCAL: Total strategic employment development permitted on allocated sites under Policy MG9 (ha).	147 ha (net) of strategic employment land with secured planning permissions by 2022.	10% less than the strategic employment land target by the target date.
Performance		
AMR 5: 2022 - 2023		AMR 6: 2023 - 2024
At 2022-23 the Council has approved 93.21 ha of employment land on strategic sites as identified in LDP Policy MG9.		At 2023-24 the Council has approved 93.21 ha of employment land on strategic sites as identified in LDP Policy MG9. No planning permissions were granted for new employment land on strategic sites in the monitoring period.
Relevant LDP Policies		
Strategic Policies: SP1, SP2, SP5.		
Managing Growth/ Development Policies: MG9, MG10, MG11, MD14, MD15, MD16.		
SA Objectives: 2, 4, 8, 10, 12, 13.		
Analysis		
<p>There have been no new approvals for employment development on strategic sites in the monitoring period. Therefore, the total amount of land that has secured planning permission on strategic sites remains at 93.21ha. The monitoring target for 2024 is 230 ha, and therefore this has been missed by substantially more than 10%. Therefore, the monitoring trigger has been met. The take up of employment sites in the Vale of Glamorgan has slowed significantly in recent years, which is considered to be linked to the wider economic climate that has been impacted by factors such as Brexit, the Covid-19 Pandemic and the War in Ukraine.</p> <p>As set out, the LDP is currently being reviewed through the preparation of the RLDP. As a part of this, in 2022, the Council engaged consultants BE Group to undertake an employment land assessment of the Vale of Glamorgan and to provide recommendations on how to encourage, protect and deliver employment growth through the planning system. The findings of the BE Group's research informed the Replacement LDP's Preferred Strategy, which was published in December 2023. This identified a varied policy approach to the existing LDP, whereby an oversupply of land (168ha) was identified for allocation to meet the identified need (67.8ha). This results in a significantly reduced, and more achievable, target when compared to the 369ha set out in the adopted LDP. The 'need' would be the target to assess delivery against and the purpose of the oversupply is to safeguard employment land for delivery beyond the plan period. A policy and research review has resulted in significantly reduced targets to be taken forward into the Replacement LDP. This is considered to be a rational approach to addressing underperformance against this monitoring target.</p>		

The 2020-21 AMR stated that 44.75ha of employment land was approved in July 2021, at Model Farm (Policy MG9(2) refers). However, it should be noted that this planning permission was quashed in October 2021. A new planning application was submitted following this, and it is currently subject to an appeal for non-determination under Section 78 (2) of the Town and Country Planning Act 1990.

Action	The monitoring trigger has been met. The Council has identified new policy in the Preferred Strategy of the RLDP that sets more achievable targets for the delivery of employment land, and this is considered to be a rational approach to addressing underperformance. The ongoing monitoring of this target will assist in the justification for a reduction in the employment land provision in the RLDP.
---------------	--

Ref No. 8.2		
Annual Monitoring Indicator	Monitoring Target	Monitoring Trigger
LOCAL: Number of jobs anticipated on permitted Strategic employment sites.	Overall Strategic Employment Site Targets: 4,610 – 5,610 jobs anticipated on permitted strategic employment sites by 2026.	10% less than the number of jobs anticipated on strategic employment sites by the target date.
Performance		
AMR 5: 2022 - 2023	AMR 6: 2023 - 2024	
The monitoring target is outside of the timeframe of the current AMR. 0 total jobs were approved on strategic sites in the 2022/23 monitoring period. However, there are three monitoring periods remaining to progress toward the monitoring target.	The monitoring target is outside of the timeframe of the current AMR. 0 total jobs were approved on strategic sites in the 2022/23 monitoring period.	
Relevant LDP Policies		
Strategic Policies: SP1, SP2, SP5. Managing Growth/ Development Policies: MG9, MG10, MG11, MD14, MD15, MD16. SA Objectives: 2, 4, 8, 10, 12, 13.		
Analysis		
The monitoring indicator relates to the number of jobs anticipated at strategic employment sites. The evidence base for the LDP indicated strategic employment sites had the potential to deliver up to 5,610 jobs over the Plan period. This comprised of 1,500 – 2,500 jobs at the Cardiff Airport and St Athan Enterprise Zone and 3,110 jobs at Land to the South of Junction 34, M4, Hensol. 2,555 anticipated jobs have been approved on strategic sites by reserved matters, including 750 in the 2021-22 monitoring period, so it was previously considered that good progress was being made toward the 2026 target (4,610 – 5,610 jobs). However, no further jobs have been approved in the 2 monitoring periods since. Despite this, there are three further monitoring periods to work toward achieving the monitoring target.		

As set out in Indicator 8.1, grants of planning permission on strategic employment land are underperforming against the target. On these sites 29.7% (93.21/314.23) of the target has been achieved. However, this underperformance has not directly resulted in similar levels of reduced performance against the anticipated jobs targets. Instead, the 2,555 anticipated jobs figure is 55% of the lowest point in the jobs range (2,555/4,610), and 61% of the monitoring trigger (2,555/4,149). In this context of lower-than-expected delivery of employment land, the robust performance of anticipated jobs is considered positive, and this may be added to in the remaining monitoring periods of the LDP.

New anticipated employment has largely been met through approvals at the St Athan Aerospace Business Park and at Land to the South of Junction 34, M4, Hensol. The draft Bro Tathan Y Porth development brief referred to in the 2020-21 AMR, which was approved for consultation purposes in October 2020 (minute C345A refers), remains on hold as set out in the 2021-22 AMR.

The total number of jobs approved at outline remains at 3,069, as was the case in the previous monitoring period. 2,000 jobs may come forward at Model Farm ((Policy MG9 (2) refers), however, the planning application at this site is currently subject to an appeal for non-determination as set out at LDP Indicator 1.3.

Officers will continue to monitor the delivery of strategic employment sites and the employment position in future AMRs.

Action	Continue to monitor in future AMRs.
---------------	--

Ref No. 8.3		
Annual Monitoring Indicator	Monitoring Target	Monitoring Trigger
LOCAL: Total development permitted in accordance with Policy MD14 on allocated sites under Policy MG9 (ha).	2.65 ha of local employment land developed per annum for the remaining years of the Plan period.	10% less than the net local employment land target over 2 consecutive years.
Performance		
AMR 5: 2022 - 2023		AMR 6: 2023 - 2024
No new employment development has been permitted on Local Employment Allocations		One planning application for employment land was granted on a local employment allocation in the monitoring period, contributing 0.014ha of new employment land.
Relevant LDP Policies		
Strategic Policies: SP1, SP5.		
Managing Growth/Development Policies: MG9, MD14, MD15, MD16.		
SA Objectives: 2, 4, 8, 10, 12, 13.		
Analysis		
One small scale employment site was approved in the monitoring period. This increases the total amount of employment land approved on MG9 allocated sites since the plan was adopted to 11.47ha, and this is primarily underpinned by the delivery of 9.2ha in the previous monitoring period. The net local employment land target for the 2022-23 monitoring period is 18.55ha (7 years with a requirement to develop 2.65ha each year) and 11.47 ha is greater than 10% below this target.		

The total amount was also greater than 10% less than the monitoring target in the 2022-23 AMR, and the target was not met then. Therefore, the monitoring trigger has now been met.

The take up of local employment sites in the Vale of Glamorgan has slowed significantly in recent years which is considered to be linked to the current economic climate. Existing local employment sites in the Vale of Glamorgan have remained buoyant maintaining a good occupancy rate although it is noted there has been a turnover in occupiers. This suggests that the need for employment space is being met by the existing employment provision.

As set out, the LDP is currently being reviewed through the preparation of the RLDP. As a part of this, in 2022 the Council engaged consultants BE Group to undertake an employment land assessment of the Vale of Glamorgan and to provide recommendations on how to encourage, protect and deliver employment growth through the planning system. The findings of the BE Group’s research informed the Replacement LDP’s Preferred Strategy, which was published in December 2023. This identified a varied policy approach to the existing LDP, whereby an oversupply of land (168ha) was identified for allocation to meet the identified need (67.8ha). This results in a significantly reduced, and more achievable, target when compared to the 369ha set out in the adopted LDP. The ‘need’ would be the target to assess delivery against and the purpose of the oversupply is to safeguard employment land for delivery beyond the plan period. A policy and research review has resulted in significantly reduced targets to be taken forward into the Replacement LDP. This is considered to be a rational approach to addressing underperformance against this monitoring target.

Action	The monitoring trigger has been met. The Council has identified new policy in the Preferred Strategy of the RLDP that sets more achievable targets for the delivery of employment land, and this is considered to be a rational approach to addressing underperformance. The ongoing monitoring of this indicator will assist in the justification for a reduction in the employment land provision in the RLDP.

Ref No. 8.4		
Annual Monitoring Indicator	Monitoring target	Monitoring Trigger
LOCAL: Amount of existing Employment land or MG9 allocations lost to non-B class uses.	No existing or allocated employment sites lost to non-B class uses unless in accordance with Policy MD15 or MD16.	1 or more planning Permissions granted resulting in the loss of employment land to non-B class uses contrary to policies MD15 or MD16.
Performance		
AMR 5: 2022 - 2023		AMR 6: 2023 - 2024
No planning permissions were granted for non-B class uses on existing or allocated employment sites that were not in accordance with Policy MD15 or MD16.		No planning permissions were granted for non-B class uses on existing or allocated employment sites that were not in accordance with Policy MD15 or MD16.
Relevant LDP Policies		
Strategic Policies: SP1, SP2, SP5.		
Managing Growth/ Development Policies: MG3, MG9, MG10, MG11, MD1, MD14, MD15, MD16.		
SA Objectives: 2, 3, 4, 8, 10, 12, 13.		
Analysis		

In the 2023-24 monitoring period one planning application was approved for a non-B Class use on employment land. This was for a prep kitchen and takeaway service (2023/01154/FUL), which is designed to serve workers on site and is therefore ancillary to the employment uses at the site. Therefore, the monitoring trigger has not been activated and the relevant policies are being implemented correctly.

An action set out in the 2021-22 AMR was to adopt an SPG to provide further clarity in relation to the interpretation of Policy MD16, and this was adopted in the 2022-23 monitoring period.

Action	Continue to monitor indicator in future AMRs.

The latest SWRAWP Annual Report for 2020 states that a land bank of 39 years exists in the Vale of Glamorgan		The latest SWRAWP Annual Report for 2021 states that a land bank of 35 years exists in the Vale of Glamorgan
Relevant LDP Policies		
Strategic Policies: SP9. Managing Growth/ Development Policies: MG22, MG23, MG25, MG26. SA Objectives: 8, 9.		
Analysis		
The Regional Technical Statement for Minerals has been subject to its 2nd review and the methodology has been amended. The methodology used in the previous (First) Review, in 2014, had been based primarily on historical sales averages, combined with an assessment of the various 'drivers' of potential future change. For the 2nd Review, this has been combined with an attempt to reflect planned future requirements for housing construction activity, in order to avoid perpetuating historical supply patterns in areas where there is scope to encourage more sustainable patterns of supply. The 2nd Review was published in September 2020, but the figures were updated by a Policy Clarification letter in November 2021, which highlighted an error in the appointment calculations for two sub regions, which affects the Vale of Glamorgan apportionment. For the Vale of Glamorgan the change in methodology meant that the average historic sales were 0.660 million tonnes per annum (MTPA) which accounts for a 7.02% share of the regional total resulting in an annual apportionment for all land-won		

primary aggregates of 0.876 MTPA based on historic aggregate sales data. However, it is considered that relying solely upon historic sales data would not give a realistic apportionment therefore the housing completions within an authority are also considered (284.3 units pa over the baseline period between 2007-2016 for the Vale of Glamorgan). This resulted in an annualised apportionment of 0.487 MTPA. To account for both the historic sales and the planned residential development within an authority the average of both figures is calculated resulting in the recommended annual apportionment of 0.682 MTPA for the Vale of Glamorgan.

Based upon the methodology in the Second Review of the RTS the Vale of Glamorgan is required through its LDP process to meet the apportionment set out in the RTS. For the Vale of Glamorgan this requirement is set at 17.05 MT of crushed rock required over 25 years. The authority currently has 18.73 MT of existing land banks of permitted reserves for crushed rock meaning there is sufficient existing quantitative provision to meet the identified apportionment. In relation to sand and gravel reserves, the Vale of Glamorgan does not have any active sand and gravel workings or permitted reserves to put towards the sand and gravel requirement, therefore the total requirement is for 16.806MT of crushed rock. There is no requirement for sand and gravel in the Vale of Glamorgan.

The 2nd Review of RTS does allow individual Local Planning Authorities to depart from the apportionment in exceptional circumstances and where it is justified by new evidence when preparing their LDPs. If new evidence is considered to increase the apportionment the RTS requires the apportionment to be met through the allocation of Specific Sites or, failing that, Preferred Areas. If, as a last resort, it is only possible to identify broad Areas of Search, these should be sufficient to offer the potential of much greater quantities of reserves, in order to reflect the uncertainties involved. However, where an LPA deviates from the RTS apportionment they would need to demonstrate that the departure from the RTS would not undermine the overall strategy of the RTS. This can be demonstrated by working with other LPAs within the identified sub-regions to ensure the sub-regional and regional RTS totals are still achieved. This would need to be reflected in the Statement of Sub Regional Collaboration (SSRC).

A SSRC must be prepared by all LPAs within a sub region as part of the evidence base needed to support each LDP. The Vale of Glamorgan has been grouped with the following LPAs: Brecon Beacons National Park, Merthyr Tydfil, Bridgend, Rhondda Cynon Taf, Caerphilly and Cardiff which forms the Cardiff City sub-regional area as shown in the RTS 2nd Review Appendix B (South Wales) document under Figure B1. However, where all the LPAs within a sub-region meet the apportionments within the RTS each SSRC will simply confirm that all members of the sub-region accept the individual apportionments for aggregates for the individual Authority areas as set out in the RTS. A SSRC can also be agreed when another LPA starts their LDP review process. If an Authority is unable to meet their apportionment, they can seek to agree an exceptional SSRC where the shortfall in their mineral reserves is met within the sub-region where there may be a surplus of aggregate which could be accessed by the Authority in need, subject to the criteria set out in the RTS. These different approaches are summarised in the Figure below:

An SSRC position statement was prepared for the Cardiff Sub Region in July 2022. This concluded that the LPA's within the Cardiff City Region accept their apportionments as set out in the RTS2, except for RCT who wish to undertake further work in relation to available resources within the County alongside awaiting the outcome of the Appeal decisions.

The Vale of Glamorgan RLDP will also need to safeguard primary aggregate resources. This will mean that relevant resources of both crushed rock aggregates and land-based sand and gravel should be safeguarded within the RLDP, in accordance with detailed advice based on the use of British Geological Survey mapping.

The Vale of Glamorgan has historically played an important role in the delivery of marine based supplies being landed at the wharves in Barry. However, the majority of marine based supply for the Vale of Glamorgan is now landed in Cardiff. The LDP will still need to safeguard the wharves and railheads in Barry in order to provide a full range of sustainable transport options into the future whether or not they are currently utilised.

Current data suggests that the Vale of Glamorgan is not going to fall below the target of maintaining a 10-year land bank of permitted aggregate reserves during the plan period.

The monitoring data shows that the Council has met the monitoring target.

Action	No action is required at this time; continue to monitor in future AMRs.

Ref No. 10.4		
Annual Monitoring Indicator	Monitoring Target	Monitoring Trigger
LOCAL: Amount of greenfield land lost to development (ha) which is not allocated in the development Plan or does not meet the requirements of the relevant Local Development Plan Policies.	No greenfield land is lost to development unless it is in accordance with other policies within the Plan or national Policy.	1 or more planning permissions granted for development on greenfield land in any given year which is contrary to policies within the Plan or national Policy.
Performance		
AMR 5: 2022 - 2023		AMR 6: 2023 - 2024
9.052 ha of greenfield land granted planning permission AMR period. All permitted development complied with National and Local Planning Policies.		2.852 ha of greenfield land granted planning permission AMR period. All permitted development complied with National and Local Planning Policies. This compared to 10.325 ha of brownfield land granted permission over the same period.
Relevant LDP Policies		
Strategic Policies: SP1, SP2, SP3, SP4.		
Managing Growth/ Development Policies: MG1, MG2, MG3, MG4, MD1, MD5, MD6, MD10, MD11.		
SA Objectives: 1, 3, 4, 8, 10, 12.		
Analysis		
2.852 ha of greenfield land has been granted planning permission during the 6th AMR period. No greenfield land has been granted planning permission contrary to national or LDP planning policies. It should be noted that the amount of greenfield land granted planning permission has reduced since the last AMR period.		
In view of the above, the level of greenfield land lost to development during the monitoring period is considered to be acceptable having regard to all other considerations and the overall objectives of the Plan.		
Action	Continue Monitoring: Development plan policies are being implemented effectively.

Managing Growth/ Development Policies: MG1, MG2, MG3, MG4, MD1, MD5, MD6, MD10, MD11.

SA Objectives: 1, 3, 4, 8, 10, 12.

Analysis

Between 1st April 2023 and 31st March 2024, the Council approved 3 planning application for one stable block, barn construction and solar panels which resulted in the loss of 0.61 ha of Best and Most Versatile agricultural land as identified on the Welsh Government’s Predictive Agricultural Classification Map (Version 2). However, the proposal was approved in accordance with LDP policies, the planning approval of the barn is subject to reassessment of Land quality best and most versatile. Details of the approved application are provided below:

Application Number	Type of Development	Address
2023/01149/FUL	Stable Block	Field to the South East of Pencymr Farm, Mountain Road from Llansannor School to A4222, Aberthin
2023/00552/FUL	Solar Panels	Mill Farm, Llandow
2023/00416/FUL	Construction of Barn	Land off Chapel Terrace, Twyn y Odyn, Culverhouse Cross

In view of the monitoring data, the Council considers that the relevant policies are working effectively.

Action	Continue Monitoring: Development plan policies are being implemented effectively.

Annual Monitoring Indicator	Monitoring Target	Monitoring Trigger
LOCAL: Density of permitted housing developments.	Minimum net density of permitted housing developments of 30 dwellings per hectare (dph) in key, service centre and primary settlements.	1 or more planning permissions granted with a net housing density of less than 30dph, unless the development is in accordance with Policy MD6.
	Minimum net density of permitted housing developments of 25 dph in minor rural settlements.	1 or more planning permissions granted with a net housing density of less than 25dph, unless the development is in accordance with Policy MD6.
Performance		
AMR 5: 2022 - 2023		AMR 6: 2023 - 2024

<p>6 applications have been approved within key, service centre and primary settlements with a net density of less than 30dph. 1 of these approvals was contrary to LDP policy MD6.</p> <p>No applications have been approved within minor rural settlements with a net density of less than 25dph.</p>	<p>7 applications have been approved within key, service centre and primary settlements with a net density of less than 30dph. However, no application was approved contrary to LDP policy MD6.</p> <p>5 applications have been approved within minor rural settlements with a net density of less than 25dph. However, no application was approved contrary to LDP policy MD6.</p>
<p>Relevant LDP Policies</p>	
<p>Strategic Policies: SP1, SP2, SP3, SP4, SP10.</p> <p>Managing Growth/ Development Policies: MG1, MG2, MG3, MD1, MD2, MD5, MD6, MD10.</p> <p>SA Objectives: 1, 3, 4, 8, 9, 10</p>	
<p>Analysis</p>	
<p>Policy MD6 sets minimum housing densities in different types of settlements to ensure that land is used efficiently. While the minimum density levels set out in the policy have not been met in 12 planning approvals, the policy does allow residential densities below the specified targets where it can be demonstrated that there are significant constraints associated with a site that prevent development at the specified levels or where development at the density required would have an adverse impact on the character or appearance of the locality or result in the loss of an important site feature.</p> <p>Therefore, while the minimum density requirements have not been met on some planning applications as set out below, the Council accepts that where this has occurred during the AMR period, sufficient evidence has been provided that justifies the deviation from the policy requirements on all occasions.</p> <p>The Council has approved 41 planning applications for new residential development within settlements during the monitoring period. 12 of these (29%) had densities below the minimum density requirements set out in the LDP, this is an increase from the previous AMR period.</p> <p>Although monitoring the trigger has been met, given that none of the applications approved were contrary to LDP policy MD6, there is no cause for concern. The majority of developments are achieving the required densities as set out in the LDP and it is therefore considered that Policy MD6 is working effectively.</p>	
<p>Action</p>	<p>No action is required at this time. Continue to monitor in future AMRs.</p>

Strategic Policies: SP8. Managing Growth/ Development Policies: MG9, MD8, MD15, MD16, MD20. SA Objective: 7, 8, 9.		
Analysis		
TAN21 and its associated regional monitoring reports are used to monitor whether each region has enough capacity to manage its waste arisings and anticipate when additional regional capacity will be needed. The Vale of Glamorgan Council is part of the South East Wales Region. The latest regional monitoring report available is the 'Waste Planning Monitoring Report: South East Wales' published in April 2016. This concluded that there is no further need for landfill capacity within the South East Wales region and that any proposals for further residual waste treatment should be carefully assessed to ensure that the facility would not result in over-provision. Planning application 2020/01367/RG3 was approved in April 2021 for a new waste transfer facility at Atlantic Trading Estate, Barry. This is now under construction.		
Action	No action is required at this time; continue to monitor in future AMRs.	

6. SUSTAINABILITY APPRAISAL MONITORING FRAMEWORK – OBJECTIVE ANALYSIS

6.1 THE REQUIREMENT FOR SA MONITORING

- 6.1.1. In addition to the requirement to monitor the LDP as set out in the LDP Monitoring Framework, the AMR must comply with relevant European Directives and Regulations. In this regard, monitoring of the LDP should accord with the requirements for monitoring the sustainability performance of the LDP through the SA / SEA processes.
- 6.1.2. The SEA Directive requires that the significant environmental effects of implementing a plan or programme are monitored in order to identify unforeseen adverse effects and, if necessary, to identify the need for remedial action. The LDP Regulations and Welsh Government guidance requires local planning authorities to monitor the SA objectives within their AMRs to track the implementation and progress of the LDP.
- 6.1.3. SA helps to demonstrate that the LDP is sound by ensuring that it reflects sustainable development objectives and contributes to the reasoned justification of policies. The SA of the LDP identifies a set of objectives and significant effect indicators which are intended to measure the social, economic, and environmental impact of the LDP.
- 6.1.4. This section outlines the monitoring proposals that will be used in measuring the environmental, social, and economic effects of the LDP as required by SA/SEA regulations. The suggested targets and indicators for the sustainability objectives referred to are identified in the Final SA Report (2017)⁴.

6.2 SA MONITORING METHODOLOGY

- 6.2.1 The LDP monitoring framework assesses the performance and delivery of the Plan's strategy together with its policies and proposals. In addition, it refers to the relevant SA objectives which assist in monitoring the social, environmental, and economic effects of the Plan. Supplementary environmental, social, and economic information is also referred to where this is considered necessary and appropriate in assessing significant effects together with other available monitoring information.
- 6.2.2 As work is now well advanced on a Replacement Local Development Plan, and a new Integrated Sustainability Appraisal which fulfils the requirements and duties for Sustainability Appraisal (SA) and Strategic Environmental Assessment (SEA), Equalities Impact Assessment (EqIA), Health Impact Assessment (HIA), Welsh Language Impact Assessment (WLIA) and Well-being of Future Generations

⁴ Final Sustainability Appraisal Report:
<https://www.valeofglamorgan.gov.uk/Documents/Living/Planning/Policy/LDP/LDP-Adoption/Final-LDP-Sustainability-Appraisal-Report-June-2017.pdf>

(WBFG) is being prepared, the SA monitoring framework set out in the tables below, **has not fully been updated for the current monitoring period**. Where SA indicators repeat information already set out in Section 5 of the main AMR, a signpost to the full dataset is provided. In many cases, much of the information for the original SA indicators is either no longer available or if available, is in a different format that prevents direct comparison with previous data sets. In addition, much of the data included within the SA framework is only released periodically and is of limited value. Further, many of the original SA indicators within the SA framework did little to support and inform the plan-making process and their value to the plan-making and SA process is questionable. Only some of the SA tables below have therefore been amended, where appropriate, to accord with Section 5. Others reflect the position as per the previous monitoring year, as officer time has rightly been targeted at the increased workload associated with the preparation of the Deposit RLDP.

- 6.2.3 The traffic light rating system used for the LDP monitoring indicators has not been utilised within the SA monitoring framework. Many of the SA objectives are multi-faceted aspirational objectives which the LDP alone could not seek to address, and the application of a simple traffic light system would not reflect the complexities of such issues e.g. reduce the causes of deprivation. The SA monitoring therefore relies upon an assessment commentary which provides a summary of those elements which can be influenced by the LDP.

7. LDP SUSTAINABILITY MONITORING APPRAISAL

7.1 HOUSING

SA Objective	Indicator	Target	Analysis			
To provide the opportunity for people to meet their housing needs.	Annual affordable housing provision as a % of all house builds.	Increase the level of affordable housing to address the identified need.	Between 2011 and 2024, an additional 2,138 affordable dwellings have been provided which have contributed to meeting the SA target. This equates to 33 % of all new dwellings built within the Vale of Glamorgan during this period. Strategic Policy SP4 sets a target of 3,252 additional affordable dwellings over the 15-year plan period 2011-2026. For the period 2011-2024 an additional 2,138 new build affordable dwellings have been provided; this represents 65.7% of the LDP target.			
			Annual Additional affordable housing dwellings constructed (source Vale of Glamorgan Council Housing)			
			Period	Additional Affordable Dwellings Provided	New Build	Other
			2011-12	48	48	N/A
			2012-13	101	101	0
			2013-14	55	44	11
			2014-15	169	164	5
			2015-16	164	163	1
			2016-17	286	273	13
			2017-18	225	216	9
			2018-19	105	105	0
			2019-20	280	279	1
			2020-21	229	229	0
2021-22	189	189	0			
2022-23	157	157	0			
2023-24	170	170	0			
Total	2,178	2,138	40			

<p>Proportion of households unable to purchase a property.</p>	<p>Decrease the proportion of households in housing need.</p>	<p>Since 2008, the Council has undertaken a number of studies to identify the extent of housing need within the authority. These Local Housing Market Assessments (LHMAs) have identified a continued local need for affordable housing across the authority, as shown below: 2008 - 652 additional affordable dwellings required annually. 2010 - 915 additional affordable dwellings required annually. 2015 - 559 additional affordable dwellings required annually. 2017 - 576 additional affordable dwellings required annually. 2019 - 890 additional affordable dwellings required annually. 2021 – 1,205 additional affordable dwellings required annually. 2023 – 1,075 additional affordable dwellings required annually for first 5 years, 154 for the remaining 10 years.</p> <p>Although the number of households in need of affordable housing has fluctuated since 2008 and despite an increase in the delivery of new affordable homes, demand for affordable housing remains high within the Vale of Glamorgan.</p> <p>It should be noted that whilst the 2023 figure is lower than the previous LHMA assessment, there has been a change in methodology which means need is considered over 15 years (5 years to meet the backlog of need, then the remaining 10 to address newly arising need) so the figures are not directly comparable.</p>																								
<p>Dwelling type / tenure.</p>	<p>Increase the range and choice of dwelling types and tenures to meet identified needs.</p>	<p>The LDP sets a target for the provision of 3,252 affordable dwellings over the period 2011-2026. Between 2011 and 2024, the Council has provided an additional 2,138 affordable dwellings and 4,378 market dwellings through a range of mechanisms. The range and choice of tenure of these dwellings has been a mix of both social rented and low-cost housing and open market dwellings. When considering the provision of affordable housing on development sites, the Council's Housing Strategy and Supporting People Manager is consulted to determine the most appropriate housing mix and tenure to meet the identified need required in the area. It is therefore considered that the range and choice of dwellings delivered to date within the authority has contributed to the sustainability target.</p>																								
<p>% of new housing built on previously developed land.</p>	<p>Increase the % of new housing built on previously developed land.</p>	<table border="1"> <thead> <tr> <th colspan="6">Annual Dwelling Completions Brownfield/ Greenfield Land</th> </tr> <tr> <th>Year</th> <th>Dwelling Completions Brownfield Land</th> <th>%</th> <th>Dwelling Completions Greenfield Land</th> <th>%</th> <th>Total Dwellings Complete</th> </tr> </thead> <tbody> <tr> <td>2011-12</td> <td>161</td> <td>99%</td> <td>1</td> <td>1%</td> <td>162</td> </tr> <tr> <td>2012-13</td> <td>128</td> <td>68%</td> <td>60</td> <td>32%</td> <td>188</td> </tr> </tbody> </table>	Annual Dwelling Completions Brownfield/ Greenfield Land						Year	Dwelling Completions Brownfield Land	%	Dwelling Completions Greenfield Land	%	Total Dwellings Complete	2011-12	161	99%	1	1%	162	2012-13	128	68%	60	32%	188

			2015-16	581	93%	40	7%	621
			2016-17	651	77%	191	23%	842
			2017-18	581	73%	213	27%	794
			2018-19	457	73%	166	27%	623
			2019-20	662	72%	255	28%	917
			2020-21	599	82%	124	18%	723
			2021-22	237	55%	194	45%	431
			2022-23	178	50%	176	50%	354
			2023-24	269	57%	205	43%	474
			<p><i>Source: Vale of Glamorgan Council Planning Application Data.</i></p> <p>In line with Welsh Government objectives, the number of housing completions on previously developed land remains a significant proportion of the overall. However, it is likely that this proportion will gradually decrease in future monitoring periods as the availability of previously developed land diminishes.</p>					
	House build rates.	Match house build rates to identified needs.	<p>To achieve the identified housing requirement for the Plan period, the Council aims to deliver a minimum of 630.66 additional dwellings per year. Over the first 13 years of the LDP (2011 to 2024) the average annual build rate has been 501 dwellings. However, in the period since the adoption of the LDP annual average build rates have been generally higher than the rates at the start of the Plan period with the Councils housing trajectory illustrating that for the years 2016-17, 2017-18, 2019-20 and 2020-21 housing dwelling completions exceeded the annual average requirement. Over remaining 2 years of the plan, dwelling completions are projected to be lower than the average requirement. This reflects general fluctuation in build rates as sites are complete and new sites commence, and the time scales required to grant planning permission particularly on larger schemes. By 2026 it is forecast that the LDP will have delivered a minimum of 7,275 dwellings which is below the 9,460 dwellings provision in the plan, due primarily to low delivery rates within the formative years of the plan rather than a failure to deliver housing allocations in the plan. Accordingly, it is considered that despite low development rates within the early part of the plan, the LDP</p>					

			has made good progress towards its delivery of the identified housing provision.
Commentary			
Analysis of the evidence collected to support the SA objective illustrates that house building, including the provision of affordable homes, has been significant since the adoption of the LDP and that the Vale of Glamorgan continues to be an attractive location for developers and homeowners. Although the level of affordable housing provided to date has not met the level of demand identified within the LHMA's, a significant amount of affordable housing has been delivered to date within the plan period across the Vale of Glamorgan through a variety of mechanisms.			

7.2 LOCAL FACILITIES			
SA Objective	Indicator	Target	Analysis
To maintain, promote and enhance the range of local facilities.	Number of new facilities (e.g. shops, restaurants, pubs, community centres, libraries, medical centres, recreational facilities, places of worship etc.) as a ratio of new house builds and / or population.	Maintain or increase in the number of new local facilities as a proportion of new house builds and / or population.	<p>Between 2011 and 2024, 6,516 homes have been completed. During that same period, the following levels of off-site Section 106 contributions have spent on community infrastructure, services, and facilities:</p> <p>2011-12 = £10,263,858.68 2012-13 = £511,873.00 2013-14 = £5,431,630.24 2014-15 = £3,876,452.81 2015-16 = £8,029,190 2016-17 = £9,794,952.16 2017-18 = £8,109,968 2018-19 = £3,538,708 2019-20 = £3,713,242.73 2020-21 = £5,427,020.94 2021-22 = £5,576,157.37 2022-23 = £6,204,869.20 2023-24 = £1,497,085.56</p> <p>The 2023-24 Section 106 annual report, which includes the spend on community infrastructure, is currently being prepared and can be accessed on the Council's website once completed: https://www.valeofglamorgan.gov.uk/en/living/planning_and_building_control/Planning/Developer-Contributions-Section-106.aspx</p>

			<p>In the previous monitoring year, the Council has used the contributions to pay for schemes such as the following:</p> <p>Education – As well as the allocated schools which have been delivered (as detailed in objective 5, indicator 5.1 of the LDP monitoring framework), significant progress has been made and S106 has again contributed to 21st Century Band B Projects (renamed Sustainable Communities for Learning), including</p> <ul style="list-style-type: none"> • Whitmore High School – Redevelopment project. 7.3 ACCESS FOR ALL

SA Objective	Indicator	Target	Analysis
To maintain and improve access for all.	Number of alterations to public buildings and spaces to provide for disabled person's access.	Increase the number of alterations to public buildings and spaces to provide for disabled access.	The Equality Act 2010 requires that reasonable physical improvements are made to ensure that buildings and spaces are accessible to all members of society. Given that this is now a statutory requirement, it is considered that the monitoring indicator has been superseded by legislative requirements.
	Number of new developments with special provision for disabled persons.	Increase special provision for disabled persons within new developments.	Building Regulations 2010 Part M gives direction on enabling a public access building to conform to the Equality Act. This public access regulations document states that reasonable provision must be made for people to gain access to and use of the building's facilities. Accordingly, it is considered that the monitoring indicator has been superseded by legislative requirements.
	Number of lifetime homes as a proportion of all new homes.	Increase the number of lifetime homes as a proportion of all new homes.	Since 2011, the Council has secured an additional 2,138 affordable dwellings. These homes are required to be built to meet Welsh Government DQR Lifetime Home standards.

Commentary

All of the targets have been met either through direct provision or the introduction of statutory requirements.

7.4 DEPRIVATION

SA Objective	Indicator	Target	Analysis
Reduce the causes of deprivation.	Welsh Index of Multiple Deprivation (WIMD).	Reduce overall deprivation.	<p>Note: no updated WIMD available. The table illustrated below remain the most up-to-date data available.</p> <p>The Welsh Index of Multiple Deprivation determinants used by the Welsh Government are Income, Employment, Health, Education, Access to Services, Community Safety, Physical Environment and Housing. The tables below summarise the 2008, 2011, 2014 and 2019 WIMD headline data, which show variations in rankings for the Vale of Glamorgan. Three of the Vale's Lower Super Output Areas (LSOAs) are ranked within the top 10% most</p>

		deprived LSOAs in Wales (1-191). They are all located in the Barry area, and this has been the case since 2008.

Commentary

The Vale of Glamorgan is regarded as an affluent and attractive area to live and work. Benefiting from its proximity to Cardiff and the wider region, the area boasts a range of businesses and industry and possesses good road and rail links to the rest of Wales and the UK. There are however pockets of poverty and deprivation and the Vale hosts 3 of the most deprived areas in Wales as illustrated by the above tables taken from the latest 2019 Welsh Index of Multiple Deprivation. However, the most up-to-date WIMD 2019 report identifies that the Vale of Glamorgan is one of 12 local Authorities in Wales with no small areas of deep-rooted deprivation. It is important to note that an area itself is not deprived: it is the circumstances and lifestyles of the people living there that affect its deprivation ranking and it is important to remember that not everyone living in a deprived area is deprived—and that not all deprived people live in deprived areas. The full WIMD index is updated every 4 to 5 years. The 2019 index therefore remains the most up to date indicator of multiple deprivation within Wales. The implementation of the LDP strategy will help to address the causes of deprivation through the provision of new and enhanced employment, housing, community facilities and transport services.

7.5 COMMUNITY SPIRIT

SA Objective	Indicator	Target	Analysis					
To maintain, protect and enhance community spirit.	Public perception of crime rates and fear of crime.	Reduce actual and perceived crime levels in the Vale of Glamorgan.	<i>Note: no updated WIMD available. The table illustrated below remain the most up-to-date data available.</i>

Crime Plus ASB Breakdown for Vale of Glamorgan

Source: <https://www.UKCrimeStats.com> - Vale of Glamorgan

Source: <https://www.UKCrimeStats.com> - Vale of Glamorgan

			All Crime includes: Anti-Social Behaviour, Burglary, Robbery, Vehicle Crime, Violent Crime, Shoplifting, Criminal Damage & Arson, Other Theft, Drugs, Bike Theft, Theft from the Person, Weapons, Public Order, Other. Violent crime and anti-social behaviour continue to make up the majority of crimes.
	New developments with local distinctiveness e.g. finishing materials, public art, facilities etc.	Increase the number of new developments with local distinctiveness.	<p>Since the last AMR, the Council has continued to work with developers to secure and implement planning obligations for public art on new developments. Section 106 contributions have been used to commission community works of art projects at the following locations for installation during 2023/24:</p> <ul style="list-style-type: none"> • New murals in Lower and Upper Gladstone Gardens, Barry • New stained glass windows in the former St. Pauls Church, Penarth • Bee Friendly Community Garden at Heritage Gate, Llantwit Major • New ‘chimney’ art installations at Clare Garden Village, Cowbridge <p>Preliminary work has also been undertaken in 2023/24 for the following ongoing projects:</p> <ul style="list-style-type: none"> • Murchfield Courts Scheme, Dinas Powys – Art consultants appointed to work alongside landscape architects to design the scheme. Following a community consultation in Summer 2023, vegetation management and clearance work was undertaken in February 2024. The tender opportunity for the works was advertised on Sell2Wales in July 2024. It is anticipated that the scheme will commence on site in August 2024 and be completed in October 2024.

Commentary

Crime levels within the Vale of Glamorgan have again remained relatively static over the past year. As in previous years, there have been general fluctuations in each of the various categories however the overall rates remain largely stable. While crime of any nature is of concern, the levels of crime experienced within the Vale of Glamorgan are relatively low compared to other areas of Wales and the Vale of Glamorgan remains a generally safe place in which to live and work. In terms of local distinctiveness, a substantial number of schemes have been approved where section 106 contributions for public art both “in kind” on development sites or through off site contributions have contributed to improved local environments. In addition, the LDP through the application of policy (Policy MD2 – Design of New Development refers) also seeks to reduce the opportunity for crime and anti-social behaviour and to ensure that new developments are of the highest standard and contribute to local distinctiveness in line with the SA target.

7.6 CLIMATE CHANGE

SA Objective	Indicator	Target	Analysis
--------------	-----------	--------	----------

<p>To minimise the causes and manage the effects of climate change.</p>	<p>Emissions of greenhouse gases.</p>	<p>Reduce emissions of greenhouse gases.</p>	<p>While there is limited information available at a local authority level on greenhouse gas emissions, the latest statistical summary for the UK for 2005 to 2020 from the Department for Business, Energy & Industrial Strategy (published in June 2023) indicates that Wales' CO2 per capita emissions as a whole continue to be higher than the rest of the UK regions and stand at 9.4 tonnes of CO2 per person compared with 7.4 tonnes in Scotland and an average 6.0 tonnes in England. This is due to Wales having the highest CO2 per capita emission from the Industrial and Commercial sector (3.6t) reflecting its higher level of industrial installations. UK wide, total territorial greenhouse gas emissions have increased since 2020 across the UK by 5.9%. This is largely as a result of the easing of restrictions associated with the Covid-19 pandemic and colder temperatures increasing the use of heating in buildings. <i>(source: UK local authority greenhouse gas emissions estimates 2021, Department for Energy Security & Net Zero (June 2023)).</i></p> <p>While no local data is available for greenhouse gas emissions, the data collated by StatsWales and illustrated below continues to illustrate a reduction in the levels of emissions within Wales in recent years.</p> <div data-bbox="808 740 1962 1353" data-label="Figure"> <h3 style="text-align: center;">Greenhouse Gas Emissions in Wales</h3> <p>The chart displays a general downward trend in total emissions from 1990 to 2020, with a notable dip around 2001 and a slight increase after 2010. The '2020 Interim target' is set at approximately 42 MtCO2e/year, which is about 27% below the 1990 base year emissions of approximately 57 MtCO2e/year. The largest contributors to emissions are 'Electricity and heat production' and 'Industry and business', which together account for the majority of the total. 'Agriculture' and 'Residential' emissions remain relatively stable over the period.</p> <p><small>*The Public sector in the Greenhouse Gas Inventory is solely represented by emissions from public sector buildings.</small></p> </div>

Annual traffic by vehicle type in The Vale of Glamorgan

Traffic in Great Britain from 1993 to 2021 by vehicle type in vehicle miles (millions)

Source: <https://roadtraffic.dft.gov.uk/local-authorities/18>

610 million vehicle miles were travelled on roads in the Vale of Glamorgan in 2021, this represents an increase of 27.2 million vehicle miles on the previous year and indicates that the trend in vehicular traffic levels remains on the increase with the exception of the significant fall experienced during the covid-19 pandemic. Cars and taxis accounted for 479.9 million vehicles miles. The most recent road traffic statistics for the UK (Department for Transport 2021) indicate that across the UK some 297.6 billion vehicle miles were driven on Great Britain's roads in 2021 an increase of 11.9% on the previous year. However, traffic in 2021 remains 12.1% lower compared to pre-pandemic levels.

In November 2020 the Council introduced the Next Bike scheme to the Vale of Glamorgan which saw the introduction of Nextbikes in the wider Penarth area. Whilst there was evidence of increased usage of the scheme, Nextbike took the decision to cease to operate the scheme in Cardiff and the Vale from January 2024 due to high levels of theft and vandalism across the area.

	Renewable energy generation	Increase the level of energy generated by renewable means.	<p>Since 2014, energy generation from renewable energy sources within the Vale of Glamorgan has steadily increased as illustrated below. The latest national data relates to 2019. However, since 1st April 2020, 7 new renewable energy developments have been granted planning permission within the Vale of Glamorgan. This included 2 solar energy developments delivering 5.6MW capacity of electric generation and 5 biomass boilers delivering 2MW capacity of heat generation.</p> <table border="1" data-bbox="860 395 1935 746"> <thead> <tr> <th colspan="6">Low Carbon Energy Generation (Stats Wales December 2018)</th> </tr> <tr> <th></th> <th>Projects</th> <th>Electrical Capacity (MWe)</th> <th>Heat Capacity (MWth)</th> <th>Electrical Generation (MWh)</th> <th>Heat Generation (MWht)</th> </tr> </thead> <tbody> <tr> <td>2014</td> <td>1,660</td> <td>88</td> <td>2</td> <td>416,982</td> <td>5,094</td> </tr> <tr> <td>2016</td> <td>2,172</td> <td>115</td> <td>4</td> <td>466,643</td> <td>11,152</td> </tr> <tr> <td>2017</td> <td>2,222</td> <td>84</td> <td>9</td> <td>84,365</td> <td>25,280</td> </tr> <tr> <td>2018</td> <td>2,262</td> <td>94</td> <td>10</td> <td>140,934</td> <td>29,640</td> </tr> <tr> <td>2019</td> <td>2,407</td> <td>105</td> <td>11</td> <td>136,952</td> <td>32,147</td> </tr> <tr> <td>2020</td> <td>2,572</td> <td>95</td> <td>12</td> <td>136,644</td> <td>32,764</td> </tr> </tbody> </table> <p>Source: https://statswales.gov.wales/Catalogue/Environment-and-Countryside/Energy</p> <p>Estimated annual renewable energy generation by region and local authority, 2020</p>	Low Carbon Energy Generation (Stats Wales December 2018)							Projects	Electrical Capacity (MWe)	Heat Capacity (MWth)	Electrical Generation (MWh)	Heat Generation (MWht)	2014	1,660	88	2	416,982	5,094	2016	2,172	115	4	466,643	11,152	2017	2,222	84	9	84,365	25,280	2018	2,262	94	10	140,934	29,640	2019	2,407	105	11	136,952	32,147	2020	2,572	95	12	136,644	32,764

Source: Energy generation in Wales 2021 (Welsh Government)

With the addition of 21.9GWh of solar energy through the granting of DNS Ref. 2021/00001/DNS the total consented renewable energy for electricity production amounts to 83.58GWh during the plan period. This equates to 15.6% of the Vale of Glamorgan's projected electricity demand up to 2026. This is an increase on the 11.53% of the target that had been achieved by the previous monitoring period. Regarding the monitoring target for heat energy, no new renewable energy

		<p>developments for heat generation were approved by the Council during the plan period and this remains at 17.06GWh of heat from renewable sources.</p> <p>Nationally, in Wales, the total capacity of renewable energy projects installed in 2021 was more than double that installed in 2020. 116MW of renewable electrical and 29 MW of renewable heat capacity was installed in 2021, in comparison to a total capacity of 65 MW installed in 2020. However, 2021's installation rate remains the second lowest in the last decade and is nearly 90% lower than the 2015 peak. Within the Vale of Glamorgan it is estimated that in 2021 there were 2,390 renewable energy installations (Department for Business, Energy & Industrial Strategy) this is primarily photovoltaic installations but also includes facilities such as anaerobic digestors, sewage gas generation and onshore wind.</p>																																																																																				
<p>Number of incidents of flooding within the Vale of Glamorgan / Properties at risk of flooding</p>	<p>Reduce number of incidents of flooding within the Vale of Glamorgan / Properties at risk of flooding</p>	<p>The National Flood Risk Assessment (NaFRA) together with the National Property Dataset (NPD) is used to determine the number of properties (residential and non-residential) at risk of flooding from rivers and sea in Wales. The most recent data available is as follows:</p> <table border="1" data-bbox="857 568 1935 1129"> <thead> <tr> <th colspan="6">2019</th> </tr> <tr> <th></th> <th>High</th> <th>Medium</th> <th>Medium + High</th> <th>Low</th> <th>Total</th> </tr> </thead> <tbody> <tr> <td colspan="6">All Wales</td> </tr> <tr> <td>Risk River</td> <td>9,652</td> <td>10,866</td> <td>20,518</td> <td>68,070</td> <td>88,588</td> </tr> <tr> <td>Risk Tidal</td> <td>2,298</td> <td>7,494</td> <td>9,792</td> <td>57,932</td> <td>67,724</td> </tr> <tr> <td>Risk Surface</td> <td>35,278</td> <td>18,660</td> <td>53,938</td> <td>75,920</td> <td>129,858</td> </tr> <tr> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td colspan="6">Vale of Glamorgan</td> </tr> <tr> <td>Risk River</td> <td>119</td> <td>148</td> <td>267</td> <td>484</td> <td>751</td> </tr> <tr> <td>%</td> <td>1.2</td> <td>1.4</td> <td>1.3</td> <td>0.7</td> <td>0.8</td> </tr> <tr> <td>Risk Tidal</td> <td>144</td> <td>36</td> <td>180</td> <td>316</td> <td>496</td> </tr> <tr> <td>%</td> <td>6.2</td> <td>0.5</td> <td>1.8</td> <td>0.5</td> <td>0.7</td> </tr> <tr> <td>Risk Surface</td> <td>936</td> <td>839</td> <td>1,775</td> <td>2,906</td> <td>4,681</td> </tr> <tr> <td>%</td> <td>2.7</td> <td>4.5</td> <td>3.3</td> <td>3.8</td> <td>3.6</td> </tr> </tbody> </table> <p>Source: Stats Wales – Properties at Risk of Flooding</p> <p>The chance of flooding is set out in four risk categories: High Risk: Greater than or equal to 1 in 30 (3.3%) chance in any given year Medium Risk: Less than 1 in 30 (3.3%) but greater than or equal to 1 in 100 (1%) chance in any given year for rivers and surface water flooding and less than 1 in 30 (3.3 per cent) but greater than or equal to 1 in 200 (0.5 per cent) for the sea. 			<p>The risk from flooding</p> <p>What does this mean locally?</p> <p>In the Vale of Glamorgan, the communities at highest risk from flooding are Cowbridge, Dinas Powys and parts of Barry. The community of Llantwit Major is also at risk.</p>  <p>Legend</p> <ul style="list-style-type: none"> Unitary Authorities Flood Zone 3 Flood Zone 2 <p>Communities at risk from fluvial flooding</p> <p>MAX_SCORE</p> <ul style="list-style-type: none"> 0 1 - 10 11 - 100 101 - 1000 1001 - 10000 <p><small>* Score is a relative risk score and not the number of properties at risk of flooding.</small></p> <p><i>Source: Natural Resources Wales Public Service Board - Vale of Glamorgan Environmental information for well-being assessments.</i></p> <p>No planning permissions were approved within C1 or C2 floodplain areas during the monitoring period which did not meet all of the TAN 15 tests (LDP Monitoring indicators 2.1 and 2.2 refers). This will help to reduce the number of incidents of flooding / properties at risk of flooding in the authority.</p>
<p>Proportion of new developments with Sustainable Urban Drainage Systems</p>	<p>Increase proportion of new developments with Sustainable Urban Drainage Systems</p>		<p>From the 7th January 2019, all new developments for 1 or more dwelling houses or where the construction area is 100m² or more require Sustainable Drainage Systems (SuDS) for surface water. Schedule 3 of the Flood Water and Management Act 2010 makes SuDS a mandatory requirement for all new developments. The Welsh Government has published Statutory SuDS Standards that must be approved by the SuDS Approving Body (SAB) before construction work begins; the Vale of Glamorgan is a SAB. Accordingly, it is considered that as a consequence of this statutory duty, the monitoring of the SuDS is no longer necessary as SuDS will be statutorily delivered through the planning system on all new developments that meet the specified standards.</p>
<p>Development within flood plains</p>	<p>No inappropriate development</p>		<p>Indicator 2.1 identifies that there have been no planning applications approved within identified C1 or C2 floodplain areas that did not meet all of the tests set out in TAN 15 Flooding.</p>

Percentage change in electricity use per local authority area in Wales between 2005 and 2020

Data source: 2

Source: Energy Use in Wales (Second Edition) Welsh Government

Estimated annual renewable energy generation by region and local authority, 2020

Source: Energy Generation in Wales 2021 (Welsh Government October 2022)

Commentary

Evidence illustrates a varied picture across the indicators and targets. While good progress has been made on the main environmental targets a significant number of trips in the Vale continue to be made by car and the level is again rising following the Covid 19 pandemic. The Council will continue to promote active travel and sustainable transport as alternatives to the car. The introduction of the Next Bike scheme within the Vale of Glamorgan continues to increase and the Council is committed to maintaining and extending the scheme subject to funding.

It is a similar varied picture in terms of energy consumption in Wales, and in the Vale of Glamorgan, where both gas and electricity consumption showed a slight decrease in the level of consumption. Mirroring that within Wales. In 2019 total energy use across Wales totalled 92.8TWh. This represents a reduction of 16% since 2005.

Aberthaw power station was the last operational coal-fired power station in Wales, closing in March 2020. The site has been purchased by the CCR with a view to developing the site as an exemplar for green energy production within the region. The CCR aspirations for the site will be considered as a part of the RLDP process.

Commentary

The latest figures produced by the Welsh Government and published by StatsWales illustrate that the level of municipal waste collected/generated in the Vale of Glamorgan has fallen slightly since the previous AMR reporting period. Notwithstanding this, the percentage of waste reused/recycled/composted remains high above 70%.

7.8 LAND USE

Source: Vale of Glamorgan Council

A substantial proportion of new dwellings in the Vale of Glamorgan continue to be built on brownfield land. While there have been some minor fluctuations since the adoption of the plan, a significant proportion of new dwelling completions have been on brownfield sites.

	Density of new development.	Increase the density of new developments in line with policies.
		LDP Policy MD6 Housing Densities specifies the minimum net residential densities that should be provided within different types of settlements identified in the LDP settlement hierarchy. Within the key, service centre and primary settlements, a minimum of 30 dwellings per hectare should be provided. Within the minor rural settlements, a minimum density of 25 dwellings per hectare will be permitted which reflects their sensitive nature and the character of the existing built form. However, policy MD6 permits lower densities where the development complies with the

			<p>specified criteria e.g. development of a higher density would have an unacceptable impact on surrounding character.</p> <p>See indicator 10.7.</p>
	Agricultural land quality.	Maintain the quality of agricultural land in the Vale of Glamorgan.	<p>National Policy as set out in Planning Policy Wales (Edition 11) paragraph 3.55 seeks to preserve the Best and Most Versatile (BMV) agricultural land except where there is an overriding need for the development. Policies MD1, MD7 and MD19 of the LDP support this position and seek to ensure that BMV land is protected from new development.</p> <p>Between 1st April 2023 and 31st March 2024, the Council approved 3 planning application for one stable block, barn construction and solar panels which resulted in the loss of 0.61 ha of Best and Most Versatile agricultural land as identified on the Welsh Government's Predictive Agricultural Classification Map (Version 2). However, the proposal was approved in accordance with LDP policies, the planning approval of the barn is subject to reassessment of Land quality best and most versatile. Details of the approved application are provided below: Further details on the nature of the applications can be found under LDP monitoring indicator 10.6.</p>
Commentary			
<p>The evidence demonstrates that the relevant LDP policies are being effective in ensuring the protection of green field land and the effective use of land through the application of minimum density standards. While some development has occurred on greenfield sites and BMV agricultural land, this is generally restricted to small scale development associated with existing developments and/or are supported by more detailed evidence.</p>

	% change in the Vale's priority habitats and species.	Improve priority habitats and species.	<p>The interim list of priority habitats and species in Wales has 557 priority species and 55 priority habitats, which were originally selected for prioritised action based on their level of threat, the level of responsibility in Wales for their populations, and the ability to carry out remedial action to improve their status. While there is limited local data available for priority habitats and species, wardens, and rangers at the Vale of Glamorgan Country Parks and on the Glamorgan Heritage Coast undertake regular monitoring of some limited species and engage in species release and habitat management programmes. Much of the regular survey programme has been affected by the coronavirus pandemic and in addition, avian flu was confirmed on the site in March 2022. As a result, regular monitoring and release programmes have been curtailed and species/survey information has not updated. Relevant information has been provided where available.</p>

			<p><i>Source: Cosmeston Lakes Country Park</i> <i>*Includes partial 2019 figures.</i> Note: the tables show data collected at various times throughout the year and have been compiled to provide an indication of the species population visiting Cosmeston Lakes Country Park. The monitoring and improvement programmes currently underway illustrate a healthy species population and will contribute to ensuring continued species and habitat preservation. **Limited survey activities resulting from coronavirus pandemic restrictions. #Partial 2023 figures.</p> <p>In summary, a total of 237 invertebrate species were identified at Cosmeston Lakes in 2021. Of these, 25 (~11%) are deemed to be of 'conservation importance'. This includes: 2 x Section 7 species; 2 x Nationally Rare (RDB 3) species; 6 x Nationally Scarce/Notable (Na or Nb) species; and 15 x Nationally Local species.</p>									
	Proportion of new developments	Increase proportion of new	The Environment (Wales) Act 2016 introduces the Sustainable Management of Natural Resources (SMNR) and sets out a framework to achieve this as part of decision-making. The objective of the SMNR is to maintain and enhance the resilience of ecosystems and the benefits they provide. National planning guidance translates the principles of SMNR into use for the									

<p>delivering habitat creation or restoration.</p>	<p>developments delivering habitat creation or restoration.</p>	<p>planning system and the latest Planning Policy Wales at the time directed that Natural, historic, and cultural assets must be protected, promoted, conserved, and enhanced.</p> <p>In response to these changes, the Council prepared an amended SPG however adoption of the amended SPG was delayed due to competing workloads, namely preparation of the RLDP. Since this time, the Welsh Government has published PPW Edition 12, specifically relating to changes to the planning system that improve biodiversity and the resilience of ecosystems. It is important that biodiversity and ecosystem resilience considerations are taken into account at early stages of development proposals and the revisions and objectives of PPW will be incorporated into the RLDP.</p>																																																								
<p>Proportion of new developments with Sustainable Drainage Systems.</p>	<p>Increase proportion of new developments with Sustainable Drainage Systems.</p>	<p>Since 7th January 2019, all new developments of more than 1 dwelling house or where the construction area is 100m² or more require Sustainable Drainage Systems (SuDS) for surface water. Schedule 3 of the Flood Water and Management Act 2010 makes SuDS a mandatory requirement for all new developments. The Welsh Government has published statutory SuDS standards that must be approved by the SuDS Approving Body (SAB) before construction work begins; the Vale of Glamorgan is a SAB.</p> <p>Accordingly, it is considered that as a consequence of this statutory duty, the monitoring of the SuDS indicator is no longer necessary as SuDS will be statutorily delivered through the planning system on all new developments that meet the required standards.</p>

	<p>Water use per household.</p>	<p>Reduction in water use.</p>	<p>The Vale of Glamorgan falls within the two largest Water Resource Zones in Wales, namely, the South West Wales Water Resource Zone which extends from the Vale of Glamorgan in the east to Carmarthen in the west and Llanwytrd Wells in the north and the South East Wales Water Resource Zone which is the largest of all of the 24 water resource zones in Wales and serves some 1.3 million people including Cardiff, Newport, Chepstow and the South Wales valleys. Dŵr Cymru Welsh Water’s Final Water Resources Management Plan (March 2019) illustrates that over the 30-year planning period of the management plan neither zone will have a supply demand deficit even though both areas are anticipated to experience population increases.</p>  <table border="1"> <caption>Figure 47 - Tywi CUS Annual Average Supply Demand Balance</caption> <thead> <tr> <th>Year</th> <th>Supply (M/d)</th> <th>Demand (M/d)</th> <th>Demand plus uncertainty (M/d)</th> </tr> </thead> <tbody> <tr><td>2020-21</td><td>200</td><td>175</td><td>185</td></tr> <tr><td>2021-22</td><td>200</td><td>170</td><td>180</td></tr> <tr><td>2022-23</td><td>200</td><td>165</td><td>175</td></tr> <tr><td>2023-24</td><td>200</td><td>160</td><td>170</td></tr> <tr><td>2024-25</td><td>200</td><td>155</td><td>165</td></tr> <tr><td>2025-26</td><td>200</td><td>150</td><td>160</td></tr> <tr><td>2026-27</td><td>200</td><td>145</td><td>155</td></tr> <tr><td>2027-28</td><td>200</td><td>140</td><td>150</td></tr> <tr><td>2028-29</td><td>200</td><td>135</td><td>145</td></tr> <tr><td>2029-30</td><td>200</td><td>130</td><td>140</td></tr> <tr><td>2030-31</td><td>200</td><td>125</td><td>135</td></tr> <tr><td>2031-32</td><td>200</td><td>120</td><td>130</td></tr> <tr><td>2032-33</td><td>200</td><td>115</td><td>125</td></tr> <tr><td>2033-34</td><td>200</td><td>110</td><td>120</td></tr> <tr><td>2034-35</td><td>200</td><td>105</td><td>115</td></tr> <tr><td>2035-36</td><td>200</td><td>100</td><td>110</td></tr> <tr><td>2036-37</td><td>200</td><td>95</td><td>105</td></tr> <tr><td>2037-38</td><td>200</td><td>90</td><td>100</td></tr> <tr><td>2038-39</td><td>200</td><td>85</td><td>95</td></tr> <tr><td>2039-40</td><td>200</td><td>80</td><td>90</td></tr> <tr><td>2040-41</td><td>200</td><td>75</td><td>85</td></tr> <tr><td>2041-42</td><td>200</td><td>70</td><td>80</td></tr> <tr><td>2042-43</td><td>200</td><td>65</td><td>75</td></tr> <tr><td>2043-44</td><td>200</td><td>60</td><td>70</td></tr> <tr><td>2044-45</td><td>200</td><td>55</td><td>65</td></tr> <tr><td>2045-46</td><td>200</td><td>50</td><td>60</td></tr> <tr><td>2046-47</td><td>200</td><td>45</td><td>55</td></tr> <tr><td>2047-48</td><td>200</td><td>40</td><td>50</td></tr> <tr><td>2048-49</td><td>200</td><td>35</td><td>45</td></tr> <tr><td>2049-50</td><td>200</td><td>30</td><td>40</td></tr> </tbody> </table> <p>Figure 47 - Tywi CUS Annual Average Supply Demand Balance</p>	Year	Supply (M/d)	Demand (M/d)	Demand plus uncertainty (M/d)	2020-21	200	175	185	2021-22	200	170	180	2022-23	200	165	175	2023-24	200	160	170	2024-25	200	155	165	2025-26	200	150	160	2026-27	200	145	155	2027-28	200	140	150	2028-29	200	135	145	2029-30	200	130	140	2030-31	200	125	135	2031-32	200	120	130	2032-33	200	115	125	2033-34	200	110	120	2034-35	200	105	115	2035-36	200	100	110	2036-37	200	95	105	2037-38	200	90	100	2038-39	200	85	95	2039-40	200	80	90	2040-41	200	75	85	2041-42	200	70	80	2042-43	200	65	75	2043-44	200	60	70	2044-45	200	55	65	2045-46	200	50	60	2046-47	200	45	55	2047-48	200	40	50	2048-49	200	35	45	2049-50	200	30	40

	<p>Historic townscape (Conservation Areas, Listed Buildings, Scheduled</p>	<p>Maintain or improve the historic townscape of the Vale of Glamorgan.</p>	<p>The LDP contains a number of policies which seek to preserve and where appropriate enhance the historic built environment of the Vale of Glamorgan e.g. SP10, MD8 in line with national planning guidance. As shown in Indicator 4.1, during the AMR monitoring period, the Council consulted CADW on 37 planning applications in respect of ancient monuments and 21 times on planning applications relating to historic parks and gardens. No planning applications were approved contrary to the advice of CADW.</p>																																																

	Ancient Monuments).		
	Area (ha) of accessible green space per 1000 population.	Maintain or increase level of accessible green space.	<p>Policy MD2 of the LDP requires open space to be provided in accordance with the Council's adopted standards and these are set out in LDP Policy MD3 and the adopted Planning Obligations SPG as follows:</p> <ol style="list-style-type: none"> 1. Outdoor sports provision at 1.6 hectares per 1,000 head of population. 2. Children's equipped play space at 0.25 hectares per 1,000 head of population. 3. Informal play space at 0.55 hectares per 1,000 head of population. <p>The Council applies these standards to all relevant planning applications and secures new open space and/or contributions for the provision of open space as required. Since the start of the Plan period the Council has secured a significant amount of new and enhanced open space through section 106 contributions including community gardens and informal open space (see SA objective 2 above).</p> <p>During the AMR monitoring period there has been a net increase in open space of 0.61 ha – see LDP indicator 4.7.</p> <p>The Council has used section 106 contributions to provide/enhance public open spaces as follows:</p> <ul style="list-style-type: none"> • New outdoor fitness equipment and new tennis court fencing at Station Road East, Wenvoe • New outdoor fitness equipment at Lougher Place, St. Athan (completed May 2024) • New tree, bulb and wild flower planting at Celtic Way Park, Rhoose • Replacement benches and bin on Dinas Powys Common • New play equipment installed at Drylla play area, Dinas Powys. • Extended footpath to play area at Seel Park, Dinas Powys • Additional tree planting at Central Park, Barry • Additional tree planting at Pencoedtre Park, Barry • Replacement benches at Chickenwood Park, Barry <p>Preliminary work has been undertaken in 2023/24, with completion anticipated in 2024/25 for the following schemes:</p> <ul style="list-style-type: none"> • Murchfield Sports Facilities, Dinas Powys – Following a community consultation in Summer 2023, vegetation management and clearance work was undertaken in February 2024. The tender opportunity for the works was advertised on Sell2Wales in July 2024. It is anticipated that the scheme will commence on site in August 2024 and be completed in October 2024.

			<ul style="list-style-type: none"> • Celtic Way Park improvements in Rhoose – Following a community consultation in May / June 2023, tenders have now been received for the playground upgrade. It is anticipated that the scheme will commence in September 2024. • Upper and Lower Gladstone Gardens, Barry - Interpretation panels and entrance signs designed (installation completed in June 2024). <p>In terms of how the Section 106 contributions translate into the number of hectares of open space provided, the amount of money agreed for open space provision and/or enhancement is calculated on the basis of £1,150 per person of those not catered for through on-site provision (at a ratio of 24m2 per person and an average 2.32 persons per dwelling). This is outlined in the Council's Planning Obligations SPG (2018).</p>
	Number of new developments, which bring historic buildings back to beneficial use.	Increase number of new development, which bring historic buildings back to beneficial use.	No monitoring undertaken during the 2023 – 2024 monitoring period.
Commentary			
The above data shows that the targets are being largely met and good progress being made in many areas.			

7.10 QUALITY OF NEW DEVELOPMENT

SA Objective	Indicator	Target	Analysis
To provide a high-quality environment within all new developments.	Proportion of new developments delivering benefits for the public realm.	Increase proportion of new developments delivering benefits for the public realm.	In July 2018, in order to achieve high standards of design in developments and enhance public places, the Council adopted a new Public Art in New Development SPG. The SPG seeks to ensure that new development incorporates public art which helps foster a sense of place and uniqueness in new development in line with the Council adopted Public Art policy which it adopted in 2003. SA indicators (2) Local Facilities and (5) Community Spirit (above) provide details on the Public Art and open space provision/improvements during the AMR monitoring period. The Council has recently commissioned consultants to prepare a Green Infrastructure Strategy that will consider the networks of multi-functional green infrastructure that play a key role in contributing to a wide range of public benefits – from health and well-being, biodiversity and ecosystem resilience, and climate change and sustainability, to social cohesion, economy and sense of place. The final report will inform the emerging RLDP.
	Number of new developments recognised by design awards.	Increase number of new developments recognised by design awards.	RIBA Awards were postponed during 2021 due to the Covid 19 pandemic until 2022. The Goodsheds in Barry have been shortlisted under the Commercial Development of the Year category by the Wales property awards but unfortunately failed to win. In addition to the above schemes, the Vale of Glamorgan Council continues to run the Building Excellence Awards scheme which is a unique scheme aimed at all sections of the building industry and is designed to encourage and commend high quality building and construction work, environmental, communication skills and customer satisfaction. The award scheme is well patronised and is supported by a range of local and national businesses. The past awards covering the period 2011 to 2021 are available on the Council's website via the following link: https://www.valeofglamorgan.gov.uk/en/living/planning_and_building_control/building_control/Building-Excellence-Awards.aspx
	Proportion of new developments providing community facilities.	Increase proportion of new developments providing community facilities.	LDP Annual Monitoring Indicator 5.2 refers to the delivery of community facilities identified in LDP policy MG7 secured through section 106 contributions in association with new development. Information on community facilities is provided under section 2 Local Facilities in the table above.
Commentary			
The above data shows that the targets are being met and good progress is being made in terms of this SA objective.			

7.11 CULTURAL HERITAGE AND HISTORIC ENVIRONMENT

SA Objective	Indicator	Target	Analysis
To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.	Number of new cultural facilities in the Vale of Glamorgan.	Increase number of new cultural facilities in the Vale of Glamorgan.	Allocated community facilities have been delivered (as detailed in objective 5, indicator 5.2 of the LDP monitoring framework).
	Historic townscape (Conservation Areas, Listed Buildings, Scheduled Ancient Monuments).	Maintain or improve the historic townscape of the Vale of Glamorgan.	CADW were consulted 37 times on planning applications relating to ancient monuments and 21 times in respect of historic parks and gardens during the monitoring period. As detailed in the LDP AMR monitoring table, no planning applications were approved by the Council contrary to the advice of Cadw.
Commentary			
The above information demonstrates how the Council is achieving the SA objective and targets. However, with regard to new cultural activities, a number will have been permitted without the need for planning permission (change of uses) and are therefore not captured through the SA monitoring process.			

7.12 TRANSPORT AND ACCESSIBILITY

SA Objective	Indicator	Target	Analysis																																																						
To reduce the need to travel and enable the use of more sustainable modes of transport.	Car ownership.	Reduce total levels of car ownership	<p>No local data available. The following data is available for the period 2011 to 2020 This shows a decrease in vehicle registration in all categories between 2019 and 2020 (likely a result of the Covid 19 pandemic) New car registration have seen a decrease of 24.5% on the 2019 figure.</p> <table border="1"> <thead> <tr> <th>Wales</th> <th>Cars</th> <th>M/cycles</th> <th>Vans</th> <th>HGV</th> <th></th> <th>Buses</th> <th>Other</th> <th>All</th> </tr> </thead> <tbody> <tr> <td>2011</td> <td>67,730</td> <td>3,950</td> <td>8,980</td> <td>910</td> <td></td> <td>370</td> <td>1,680</td> <td>83,620</td> </tr> <tr> <td>2012</td> <td>72,440</td> <td>3,840</td> <td>9,240</td> <td>990</td> <td></td> <td>420</td> <td>1,820</td> <td>88,750</td> </tr> <tr> <td>2013</td> <td>84,560</td> <td>4,150</td> <td>10,230</td> <td>1,290</td> <td></td> <td>420</td> <td>1,470</td> <td>102,110</td> </tr> <tr> <td>2014</td> <td>92,320</td> <td>4,610</td> <td>11,360</td> <td>1,210</td> <td></td> <td>320</td> <td>1,290</td> <td>111,120</td> </tr> <tr> <td>2015</td> <td>94,220</td> <td>5,500</td> <td>12,700</td> <td>1,210</td> <td></td> <td>400</td> <td>1,110</td> <td>115,150</td> </tr> </tbody> </table>	Wales	Cars	M/cycles	Vans	HGV		Buses	Other	All	2011	67,730	3,950	8,980	910		370	1,680	83,620	2012	72,440	3,840	9,240	990		420	1,820	88,750	2013	84,560	4,150	10,230	1,290		420	1,470	102,110	2014	92,320	4,610	11,360	1,210		320	1,290	111,120	2015	94,220	5,500	12,700	1,210		400	1,110	115,150

Increase in number of schools with travel plans or Safe Routes to Schools schemes.	<p>The following school developments have taken place where a Travel Plan has been prepared:</p> <p>2016/01520/OUT – Land West of Swanbridge Road, Sully, - Residential development of up to 190 units with associated access and associated works – Submitted TP and approved.</p> <p>2020/000434/OUT - Land at Beggars Pound, Cowbridge Road, St. Athan - Outline planning permission for the demolition of existing buildings and erection of Class B1 floorspace (up to 3,000 sqm), revised access onto Cowbridge Road, associated internal access routes, parking areas, fencing, landscaping, building and engineering operations with all matters reserved – Submitted TP and approved.</p> <p>2022/00066/RG3 - St. Nicholas Church In Wales Primary School, St. Nicholas - Proposed replacement primary school for 126 pupils plus additional capacity for 24 part-time nursery places, including associated works – Secured by planning condition.</p>
--	--	---	---

Commentary

Evidence illustrates that good progress is being made across all of the above transport and accessibility indicators and targets in the Vale of Glamorgan. While car ownership levels have increased the provision of active travel infrastructure is increasing largely supported by Welsh Government funding and the awareness of alternative and more sustainable modes of transport is increasing. In addition, major projects such as the South Wales Metro and local projects such as the Barry Docks transport interchange will all contribute to changing attitudes and ultimately increases in the use of more sustainable transport modes. The adopted SPG on Travel Plans appears effective and travel plans have been submitted in support of all planning applications where they are required. The active travel programme continues to develop schemes that encourage walking and cycling throughout the Vale and is developed in consultation with local communities and supported financially through grant schemes run by the Welsh Government.

<h2 style="text-align: center;">7.13 EMPLOYMENT</h2>														
SA Objective	Indicator	Target	Analysis											
To provide for a diverse range of local job opportunities.	Percentage of working age population in employment. <p><i>Source: StatsWales – Employment in the public and private sectors by Welsh local authority and status (year ending 31 Dec 2022)</i></p> <p>The most recent employment data for the Vale of Glamorgan indicates changes across the employment sector. However, the data illustrates a slight increase in employment rates in total which is to be welcomed following the impacts of the COVID 19 pandemic. Notwithstanding the current increase, employment figures have not yet returned to their peak levels experienced during 2019.</p>										
Percentage of allocated employment land developed for employment purposes.	Increase the percentage of allocated employment land developed for employment purposes	<p>The LDP monitoring framework seeks to secure planning permissions on 68% of allocated employment land by 2024, which equates to 251ha. With the approval of 1.347ha in the current monitoring period this takes the total approval on employment land to date up to 26.37% or 97.63ha. This is evidently some way below the 2022 monitoring target and below what would be expected as indicated by the 2024 monitoring target. The situation will therefore continue to be monitored and assessed in the next monitoring period when a more complete assessment against the 2024 target will be possible.</p>								
Commentary										
Future monitoring of the above data will enable more detailed analysis to be undertaken of this SA objective, in particular the impact of COVID 19.										

7.14 RETAIL

SA Objective	Indicator	Target	Analysis
Vacancy rates for properties within the retail centres.	Reduce the proportion of vacant units within town centres.	Reduce the proportion of vacant units within town centres	See Indicator 6.4
Proportion of A1, A2 and A3 uses in the town centre.	Ensure a mix of uses within the town centre with sufficient A1 to maintain the retail function.	Ensure a mix of uses within the town centre with sufficient A1 to maintain the retail function	See Indicator 6.2
	Access by public transport, walking and cycling.	Public Transport Guide, Walking / Cycling Audits.	The Council web site contains information (timetables, route planners and relevant qualifying information) pertaining to all local public transport and local voluntary transport services and organisations, concessionary travel, local bus, rail, and air services including local community transport services and organisations. When relevant, event specific information is also provided on temporary services and alternative means of travelling to events e.g. Vale Show. In accordance with Welsh Government policy, the Council is working to promote and improve opportunities for Active Travel within its area and information including public consultations, is also provided online. In addition, the Council also produces and hosts on its web site information in respect of circular and guided walks and a range of other environmental activities.
Commentary			

The retail monitoring undertaken by the Council suggests that the main town and district retail centres continue to be resilient to changing retail patterns and present a largely favourable picture across the Vale of Glamorgan. While there are some minor variations within the centres with regard to class A1, A2 and A3 uses, class A1 uses remain dominant which is positive and reflects the overall strength and attractiveness of the centres. Notwithstanding the above, local / neighbourhood retail centres are not performing as well in terms of class A1 uses (see LDP AMR indicator 6.3) however the retail sector continues to experience difficult trading conditions and factors such as high energy costs, tax rises, changes to retail shopping habits, high inflation and the continuing impact of Brexit and the war in Ukraine continue to impact on the sector. In such a climate it is understandable that make up of high streets across the country will change. In support of the emerging RLDP, the Council commissioned Nexus Planning consultancy to undertake a retail assessment of the Vales main town and district centres to inform the evidence base of the RLDP. This work considers the key current and future retailing trends, the health of the main centres and provides recommendations, policy advice and centre specific recommendations as to how the RLDP can support retailing within the Vale.

7.15 TOURISM

SA Objective	Indicator	Target	Analysis
To promote appropriate tourism.	Number of new tourist related developments.	Increase the number of tourist related developments in the Vale of Glamorgan.	In the period between 2011 and 2023, the Council has approved 31 planning applications for tourism related development. The applications predominantly relate to the conversion of existing buildings to holiday lets and small-scale low impact tourism accommodation e.g. yurts. During the current monitoring period a number of larger applications relating to tourism related developments have been received and are currently under consideration by the Council. However, some applications related to improvements to existing tourism uses such as the installation of new tourism activities on a site. This significant number of tourism related developments has resulted in a considerable number of tourism related employment opportunities in the Vale of Glamorgan as detailed below:

Source: *The Vale of Glamorgan Steam Final Trend Report 2022*

While the number of FTE jobs has recovered significantly since the 2020 Steam Report, the level remains slightly below the years prior to the pandemic. While below the projected FTE level, the sectoral distribution of the FTE jobs is unchanged with Food & Drink, Shopping, and Accommodation providing the highest levels of employment.

			<p>Source: <i>The Vale of Glamorgan Steam Final Trend Report for 2022</i></p> <p>The total economic impact of tourism in the Vale of Glamorgan in 2022 was £292.49 million, which is a significant increase on the £93.01 million income during the pandemic. This represents a 72.5% increase since 2011 and indicates that the local tourism industry is staging a strong recovery from the Coronavirus pandemic.</p>
	<p>Length of stay.</p>	<p>Increase the average length of stay in the Vale of Glamorgan per tourist.</p>	 <p>Source: <i>The Vale of Glamorgan Steam Final Trend Report for 2022</i></p> <p>The number of tourist visitor days within the Vale of Glamorgan is slightly above the projected level at 5.74 million days. This again reflects a strong recovery from the pandemic.</p>
<p>Commentary</p>			
<p>The evidence from the annual 2022 Vale of Glamorgan STEAM (Scarborough Tourism Economic Activity Monitor) survey indicates that tourism in the Vale of Glamorgan is staging a strong recovery from the impact of the Coronavirus pandemic. This year the measures are slightly above the identified linear trend, demonstrating that recovery has been strong indicating and the Vale of Glamorgan continues to be an attractive tourist destination. The number and variety of tourism related planning applications is also encouraging for the sector.</p>			

8. CONCLUSIONS AND RECOMMENDATIONS

8.1 LDP MONITORING FRAMEWORK CONCLUSIONS

- 8.1.1 This is the sixth AMR to be prepared since the adoption of the Vale of Glamorgan LDP in 2017. It provides an analysis of the performance of the LDP policies in achieving the Plan's strategy and objectives to date. It also highlights some issues which warrant further research and investigation. While these elements will continue to be monitored in future AMRs, as work is now well advanced on preparing a Replacement LDP (RLDP) in line with LDP Regulation 41, any issues highlighted (e.g. triggers hit) will be addressed through the new RLDP. As in previous AMRs, the main conclusion is that good progress continues to be made in delivering the identified targets set out in the LDP monitoring framework.
- 8.1.2 The first AMR (October 2019) identified the need for several new SPG to be prepared to provide further guidance on specific policies e.g. retail and employment. Progress on these documents was originally delayed due to COVID 19 pandemic and other corporate matters taking priority. While the delays were regrettable, they were not seen as a major issue for the performance of the LDP. The SPG were adopted by the Council on the 27th February 2023 (Minute C245 refers).
- 8.1.3 Welsh Government guidance contained within the Development Plan Manual (Edition 3, 2020) sets out five questions that may be relevant in analysing the results of the AMR to establish if a plan review is required. The issues raised in these questions have been considered throughout the AMR as part of the analysis of the monitoring data and are contained in the executive summary. However, any issues raised in this, and subsequent AMRs will now be addressed as part of the new RLDP process. An overview of each objective is set out below:

SUSTAINABLE COMMUNITIES

- 8.1.4 Good progress has been made on meeting the dwelling requirement in the adopted LDP. Although the number of dwellings completed on allocated sites again falls below the identified 2024 target (4,734 against a target of 7,172), the number of dwellings approved on allocated sites again exceeds the 1st April 2024 target of 6,058 dwellings approved with 6,648 dwellings having been approved on allocated LDP sites. The Council will continue to closely monitor indicators 1.1 and 1.2 over the next AMR period and the RLDP will include a review of housing delivery, land supply and the dwelling requirement up to 2036. In terms of employment land, the Council has approved 1 application during this monitoring period on employment allocations which brings the total of approved employment uses on allocated sites to 97.62ha although this remains below the identified target.

CLIMATE CHANGE

- 8.1.5 No developments have been permitted in C1 / C2 flood zones that do not meet all of the TAN 15 tests. In terms of renewable energy, while the monitoring target is outside of the current monitoring period, within the monitoring period, an additional 1.3MW has been approved on 1 solar farm which brings the total consented renewable energy for electricity production to 84.72GWh during the plan period. A Renewable Energy Assessment has been prepared which will form a part of the evidence base for the emerging RLDP.

TRANSPORT

- 8.1.6 The LDP monitoring framework required the completion of six local transport schemes identified under Policies SP7 and MG16 by 2020. This monitoring target was met early in the plan period and the latest AMR again indicates that good progress has been made on several of the other schemes. While work on some future schemes has halted pending the availability of funding for initial phase I investigative works, work on other schemes has progressed well with several schemes including the Barry Waterfront to Dinas Powys walking and cycling route, where detailed design and public consultation has been completed and route construction is anticipated mid-2025. Although work on the Bus priority measures at Merrie Harrier, Cardiff Road, Barry to Cardiff via Barry Road has slowed, detailed design works have been completed and feasibility/modelling work will take place during 2024/25. Ecological surveys and detailed design works have been completed and a planning application has been submitted for the NCN88 and associated connections although construction works will be tied in with the wider site development. Any schemes which have not commenced or made significant progress will be reviewed and considered as a part of the RLDP review. With regard to improvements to the Valley Lines, this work is out of the direct control of the Vale of Glamorgan Council and while overall improvements continue, it is regrettable that proposed increases to frequency on the VoG line have been deferred however a commitment from TfW remains and on a positive note, new Class 321 trains will be running on nearly all services to Barry and Barry Island. All relevant planning applications were accompanied by a Travel Plan or conditioned in line with the Travel Plan SPG and TAN 18. Considerable progress has been made on developing the Active Travel network within the Vale of Glamorgan.

BUILT AND NATURAL ENVIRONMENT

- 8.1.7 No planning applications were approved where there was an objection from Cadw or NRW during the monitoring period. During the current monitoring period the Council did not monitor indicators 4.2 relating to applications approved within designated Special Landscape Areas; 4.3 relating to applications approved within Green Wedges; 4.4 relating to applications approved within the Glamorgan Heritage Coast; 4.5 relating to applications approved which would have adverse impacts of Sites of Special Scientific Interest and 4.6 relating to applications approved which would have an adverse impact on Sites of Importance for Nature Conservation, as invariably any implications of the proposed developments on these designations would have been fully considered.

through the planning application process and found to be acceptable. During the AMR period, there has been a net increase of 0.61ha in open space in accordance with the monitoring target. In February 2024 the Welsh Government published the latest iteration of Planning Policy Wales (PPW). Version 12 of PPW included an updated Chapter 6 Distinctive and Natural Places which saw policy changes relating to Green Infrastructure, Net Benefit for Biodiversity and the Step Wise Approach, Protection for Sites of Special Scientific Interest, and Trees and Woodland. The amended PPW has direct implications for the intended update to the Council's Biodiversity and Development Supplementary Planning Guidance (SPG) which will now be revised to incorporate the changes in PPW when resources permit.

COMMUNITY FACILITIES

8.1.8 Both 2024 monitoring targets were met ahead of schedule and new education facilities were provided at Ysgol St Baruc, Barry Waterfront which opened in April 2023 and provided capacity for 420 pupils and a new primary and nursery school on land to the north of the railway line, Rhoose was opened in January 2022 providing capacity for 210 pupils. While there was no specific monitoring target relating to education facilities identified in Policy MG6 (Provision of Educational Facilities) relevant to this year's AMR, significant progress has been made on the remaining indicators for 2026 relating to land at Darren Farm, Cowbridge (MG6 (4)) and land at Upper Cosmeston Farm, Lavernock (MG6 95)). Similarly, good progress has been made on delivering new community facilities identified in Policy MG7 (Provision of Community Facilities). While there has been a delay in the transfer of land relating to the St Cyres development (MG7(2) refers) caused by continuing site works, it is anticipated that the land transfer will be progressed shortly to the Council and then leased to Dinas Powys Community Council on a 99-year lease. Dinas Powys Community Council are currently considering potential future uses for the site. The remaining monitoring indicator relating to site MG7 (4) Cosmeston Farm, is outside the timeframe of the current AMR however planning application 2020/01179/OUT was approved by the Council in March 2024 (subject to the applicant entering into a s106 agreement) This application was subject to a call-in direction from the Welsh Minister, until the week commencing 30 September 2024, when the Welsh Minister advised that the Local Planning Authority could now determine the application. Public open space provision has marginally increased during the monitoring period and s106 money secured from development continues to be utilised to upgrade a number of public open space facilities. No developments were approved which resulted in the unacceptable loss of community facilities in an area of identified need contrary to Policy MD5 (Development Within Settlement Boundaries).

RETAIL

8.1.9 Since 2017, there has been a reduction (6.8%) of retail floorspace in the town and district centres with corresponding increases in office floorspace (<1.0%) and leisure floorspace (21.7%). This reflects their changing role which is also happening elsewhere in the UK. The Council will continue to closely monitor this trend in future AMRs. No new major retail or leisure floorspace was permitted outside established town and district centre boundaries contrary to the relevant LDP policies. There have been several applications approved for non-A1 uses in primary and secondary frontages in the town and district centres and the monitoring trigger in indicator 6.2 has been hit in some cases. Nevertheless,

there has been a change in policy direction from Welsh Government since the COVID 19 pandemic which supports a more flexible approach in retail areas. The Council will continue to closely monitor this indicator in future AMRs to inform the relevant RLDP policies. In addition, in 2023 the Council appointed NEXUS planning consultancy to undertake and assessment of and make recommendations for the Vale of Glamorgan Town and District retail centres. This report will inform the RLDP and form the basis for policy development and monitoring moving forward.

- 8.1.10 Three applications for non-A1 uses were approved within the local and neighbourhood retail centres none of which resulted in an increase which exceeded the identified monitoring trigger, and the local and neighbourhood centres appear to performing well in the current uncertain economic climate being experienced throughout the UK. Except for Llantwit Major, vacancy rates across the main town and district centres have increased during the current monitoring period. However given the prevailing economic climate this was largely expected. Notwithstanding these increases only one centre, Penarth, hit the monitoring trigger of increases in vacancy rates over two consecutive years. Further monitoring will confirm whether there are any long terms trends and will inform the relevant RLDP policies.

HOUSING

- 8.1.11 On the 26th March 2020, the Welsh Government announced changes in the way that Local Planning Authorities monitor the deliverability of housing and the availability of land for residential purposes. The measures included the revocation of TAN 1 Housing Land Availability Studies (2015) and the need for Local Planning Authorities to undertake annual Joint Housing Land Availability Studies; and the revision of PPW that removes the national five-year housing land supply policy.
- 8.1.12 PPW now makes it explicit that the monitoring of housing delivery is to be undertaken against the housing trajectory to be included in all future LDPs, and as a requirement for LDP AMRs. Accordingly, the Council has amended the monitoring framework to take account of the new requirements.
- 8.1.13 The LDP identifies a housing requirement of 9,460 dwellings over the plan period 2011-2026, equating to an average housing requirement of 630.66 dwellings per annum. At April 2024, the cumulative dwelling target is 8,198 (630.66 x 13 years). The Council has delivered 6,516 dwellings which is 26% below the cumulative target for 2024. Although the annual build rate was lower than anticipated in the early years of the Plan period, since adoption there has been a steady growth in housing delivery and in many years the annual dwelling completions has exceeding the average annual build requirement, albeit this has slowed recently. For the remaining years of the Plan, projected build rates are expected to fluctuate as existing sites under construction, are completed and other approved developments come on stream. The Council will continue to closely monitor the situation in future AMRs. The LDP has also fallen short of the 2024 monitoring target for the total cumulative completions monitored against the anticipated cumulative completion rate in the trajectory. This is considered to be a reflection of the current economic climate and will continue to be closely

monitored. In terms of affordable housing, at April 2024, a total of 2,138 affordable dwellings have been provided against a monitoring target of 2,555.

- 8.1.14 With regard gypsy and traveller accommodation, an updated Gypsy and Traveller Accommodation Assessment for 2022 has identified an increase in need to 9 pitches by 2026 and a further 2 pitches by 2036. Consideration will be given as to how this increased need can be met through the RLDP. The Council is part of a regional working group which is seeking to address the regional need for a traveller transit site.
- 8.1.15 No new dwellings were approved outside a defined settlement boundary contrary to local and national policies.

ECONOMY

- 8.1.16 No new jobs have been created on strategic employment sites during the monitoring period and the total number of jobs approved by reserved matters applications since the LDP was adopted remains at 2,555.
- 8.1.17 During the monitoring period, no planning permissions were granted for non-B class uses on existing or allocated employment sites that were not in accordance with Policy MD15 or MD16.
- 8.1.18 A new SPG on employment land and premises was adopted by the council in February 2023. The Council has approved a draft development brief for consultation purposes to guide the future development of the Bro Tathan Y Porth development site. However as set out in the 2021/22 AMR this remains on hold.

TOURISM

- 8.1.19 The new and enhanced tourism facilities on Barry Island (Policy MG29[1] refers) has not been delivered in line with the 2018 monitoring target. Since the adoption of the LDP, the Pleasure Park has been acquired by a new owner who wishes to maintain the fun fair as a tourist attraction on the site. The Council is continuing to work on the options for Nells Point, Whitmore Bay which presents an opportunity to enhance and support the tourism role of Barry Island. Although the monitoring target for MG29(3) Land at Cottrell Park Golf Course is outside of the timeframe of this AMR a hybrid planning application for inter alia a hotel, 3,375 sqm leisure development, 31 retreat lodges, storage, ancillary parking and new road infrastructure was submitted in December 2022 and is currently awaiting determination. The Council will continue to closely monitor indicator 9.1 and consider the need for preparing development briefs for Barry Island. The latest 2022 STEAM report on tourism which quantifies the local economic impact of tourism through the analysis of a variety of inputs indicates that the economic benefits derived through tourism within the Vale of Glamorgan have largely returned to pre-pandemic levels.

NATURAL RESOURCES

- 8.1.20 The latest SWRAWP Annual Report (2020) states that the Council has a land bank of between 39 years of primary land won aggregates which exceeds the monitoring target of 10 years. No permissions were granted by the Council during the AMR period which would permanently sterilise a mineral safeguarding

area contrary to Policy MG22 (Development in Mineral Safeguarding Areas) or the adopted Minerals SPG. Similarly, no developments were approved within a minerals buffer zone contrary to Policy MG23 (Quarry Buffer Zones).

- 8.1.21 2.85 hectares of greenfield land was granted planning permission during the current AMR monitoring period. However, this was deemed to be in accordance with local and national policies. 66.8% of all new housing developments approved were on brownfield sites which is well above the 38% monitoring target. No windfall developments were permitted on Best and Most Versatile Agricultural Land contrary to the policies of the LDP. A total of 6 planning applications were approved with net densities lower than the minimum thresholds set out in Policy MD6 (Housing Densities 30dph). However, only 1 application was contrary to policy MD6 and the rationale for approving the development is set out in LDP indicator 10.7.

8.2 SA MONITORING CONCLUSIONS

- 8.2.1 Section 6 of the AMR expands the assessment of the performance of the LDP against the SA monitoring objectives. There is an overlap between some of the LDP and SA indicators helping to demonstrate how the LDP monitoring, and SA monitoring are interlinked.
- 8.2.2 The SA monitoring provides a short-term position statement on the performance of the Plan against a number of sustainability indicators. As detailed above, only part of the SA framework has been updated during this AMR monitoring period.

8.3 RECOMMENDATIONS

- 8.3.1 The 2023/2024 AMR shows that good progress is being made in implementing the majority of the Plan's policies and that the overall strategy remains sound. In view of this, the following recommendations are therefore made:
- 1) Submit the sixth AMR to the Welsh Government by 31 October 2024 in accordance with statutory requirements.
 - 2) Publish the sixth AMR on the Council's website in accordance with LDP Regulation 37.
 - 3) Continue to monitor the adopted LDP through the preparation of successive AMRs to inform the Replacement LDP.
 - 4) Progress work on adopting the remaining new or updated SPGs as required.

APPENDIX 1: SUMMARY OF AMR LDP MONITORING RESULTS 2018 – 2023

Policy Performance Traffic Light Rating

To aid the interpretation and understanding of the policy assessment and to provide a quick reference overview of policy performance a ‘traffic light’ rating is included for relevant indicators as follows:

Continue Monitoring (Green)
Where indicators are suggesting the LDP Policies are being implemented effectively and there is no cause for review.
Training Required (Blue)
Where indicators are suggesting that LDP Policies are not being implemented as intended and further officer or Member training is required.
Supplementary Planning Guidance Required and Development Briefs (Purple)
Indicators may suggest the need for further guidance to be provided in addition to those already identified in the Plan. Additionally, should sites not be coming forward as envisaged; the Council will actively engage with developers / landowners to bring forward Development Briefs on key sites to help commence the development process
Policy Research (Yellow)
Where indicators are suggesting the LDP Policies are not being effective as they should further research and investigation is required. This may also include the use of contextual indicators and comparisons with other local authorities and national statistics where appropriate may be required.
Policy Review (Amber)
Where indicators are suggesting the LDP Policies are failing to implement the strategy a formal review of the Policy is required. Further investigation and research may be required before a decision to formally review is confirmed.
Plan Review (Red)
Where indicators are suggesting the LDP strategy is failing and a formal review of the Plan is required. This option to fully review the Plan will need to be fully investigated and undertaken following serious consideration.
